Nightingale Online Praxis and Prevention of Cyber Attacks Dr. Mercy M. Popoola, 2015-02-13

Nightingale is best known for her work during the Crimean War, especially her praxis with promoting cleanliness, preventing infection, and publications about the relationship between hygiene and infections. Majority of the time, hackers cannot get to our computer and steal our information and disrupt our life or online learning process if the computer is not infected. Therefore, if we can use or transfer Nightingale zeal as a reformer and educator for infection control to the world of technology and online learning, we can

fight computer virus and prevent our computer from virus infections, which can prevent cyber attacks from hackers. Praxis is a critical thinking process that can be applied to any daily decision-making process, such as deciding whether or not it is smart to download a free online program or click on an unknown link or lock computer to prevent our computer from being infected, just as Nightingale fought for years to prevent infections. For praxis to be experienced, we often start with a question such as How do we get these two boards to stick together? We then theorize on the different methods to use, such as incorporating glue, nails, etc. We make a final decision based on support, research, engineering, weight, and longevity, and we decide to use nails. We measure and remeasure the mark at which the nail will enter the wood. We choose the correct size of the nail, grab our hammer, and aim. With the hammer, we drive the nail into and through the wood. The process of selecting the nail and making the decision to hammer the nail is praxis.

Research Basins and Hydrological Planning R.Z. Xi, Wei-Zu Gu, Klaus-Peter Seiler, 2004-10-14 In the 20th century, water management focused on the local scale of interest. In the 21st century we will be facing changes in the quantity of our water cycle. The forces behind these new challenges are industrialisation, population growth and an insufficiently swift response to climatic change. The magnitude and distribution of global changes are not exactly predictable, because we live in an ever-changing environment and are faced with extreme and interacting processes, which all are not yet sufficiently understood. Therefore, to shoulder this task, hydrology should embrace more integrative and interdisciplinary approaches and achieve more flexibility in assessments and decisions. To better confront this challenge, catchment-related solutions are more important than local solutions, to satisfy the water demand of agriculture, ecosystems, industry and the private sector. It is wise to keep in mind that the environment has a sustainable memory and our knowledge about attenuation capacities and resilience of the environment is still low.

Critique and Praxis Bernard E. Harcourt, 2020-08-11 Critical philosophy has always challenged the division between theory and practice. At its best, it aims to turn contemplation into emancipation, seeking to transform society in pursuit of equality, autonomy, and human flourishing. Yet today's critical theory often seems to engage only in critique. These times of crisis demand more. Bernard E. Harcourt challenges us to move beyond decades of philosophical detours and to harness critical thought to the need for action. In a time of increasing awareness of economic and social inequality, Harcourt calls on us to make society more equal and just. Only critical theory can guide us toward a more self-reflexive pursuit of justice. Charting a vision for political action and social transformation, Harcourt argues that instead of posing the question, "What is to be done?" we must now turn it back onto ourselves and ask, and answer, "What more am I to do?" *Critique and Praxis* advocates for a new path forward that constantly challenges each and every one of us to ask what more we can do to realize a society based on equality and justice. Joining his decades of activism, social-justice litigation, and political engagement with his years of critical theory and philosophical

work, Harcourt has written a magnum opus.

The Praxis of Diversity Christoph Lütge,Christiane Lütge,Markus Faltermeier,2019-10-15 This edited

collection brings together experts from various disciplines to engage critically with diversity theory, diversity politics, and their practical application. Accordingly, the volume provides a provocative discursive space, where the key theoretical as well as practical problems of diversity in business, institutions and culture can speak to each other and can be assessed. The aim is to bridge the gap between two relatively distinct discourses: the discourse on practical applications of diversity concepts and the discourse on theoretical approaches to diversity. This selection of articles delivers the first step towards achieving this goal. Approaching diversity from a business perspective, the chapters discuss its ramifications on democratic institutions and theory, as well as point to its relevance in didactic and educational settings.
