**Prescription for Maximum Savings** Jason Reed, 2018-11-16

You won't look at prescription drug advertisements the same way again after reading this eye-opening book. Although doctors know a lot about diseases, physiology and psychology, most of them know extremely little about the real COST of the medication they prescribe to their patients. In this eye-opening book, Jason Reed exposes the symbiotic relationship between Big Pharma, insurance companies and healthcare providers where profits, not the medical needs and financial well-being of patients, are the primary industry motivators. He explains how they trick unsuspecting patients with low up front copays, only to cost you big-time in the long run. In *Prescription For Maximum Savings*, you're going to learn why it doesn't have to cost you a fortune to be in good health. Here's a snippet of what you're going to discover in this book: How you can realize 50-80% savings over your current medication spend How to ensure you really need medication for the symptoms you have or if they could be caused

by another medication How savvy patients armed with knowledge have specific, actionable conversations with their doctor to optimize wellness How to prevent future medication costs from wiping out your financial freedom How to optimize and make sense of all the options thrown at you and safely navigate the fine print of healthcare contracts. Having worked for large Pharmacy Benefit Manager for well over a decade, Reed will equip you with all the tools you need to navigate deliberately confusing health insurance loopholes with this simple, step-by-step manual chock full with money-saving ideas and obtaining healthcare at the best possible prices. Scroll up and click the button to buy now! Jason Reed graduated from Butler University as a Doctor of Pharmacy and has been involved in various roles with a Pharmacy Benefits Manager for fifteen years. He is an active member and experienced speaker in healthcare industry organizations.

*Prescription Drug Pricing: Background, Discount Programs and Cost Lowering Strategies* Elias B. Toft,2020-03-13 Chapter 1 examines the actions of drug companies in raising prescription drug prices in the United States, as well as the effects of these actions on the Federal and state budgets, and on American families. Chapter 2 addresses frequently asked questions about government and private-sector policies that affect drug prices and availability. Among the prescription drug topics covered are federally funded research and development, regulation of direct-to-consumer advertising, legal restrictions on reimportation, and federal price negotiation. The 340B Drug Pricing Program requires drug manufacturers to sell outpatient drugs at discounted prices to covered entities—eligible clinics, hospitals, and others—in order to have their drugs covered by Medicaid. Covered entities are only allowed to provide 340B drugs to certain eligible patients. Chapter 3 reviews the Health Resources and Services Administration's (HRSA) oversight of the 340B

Program to ensure compliance with program rules. In 2017, nearly 60% of U.S. adults aged 18â64 reported being prescribed medication in the past 12 months. Approximately 70% of prescription medications carry out-of-pocket costs. Strategies to reduce prescription drug costs at the individual level are discussed in chapters 4 and 5. Each year, Americans pay more for prescription drugs, and rising drug prices have a disproportionate impact on older Americans. Chapter 6 examines the history of rising drug prices for the brand-name drugs most commonly prescribed for seniors. Generic drugsâcopies of brand-name drugsâlead to significant cost savings. Before a generic drug can be marketed, FDA must approve the generic drug application. According to FDA, applications go through an average of three cycles of review before being approved, which may take years. Chapter 7 examines 1) the first review cycle approval rate of generic drug applications in recent years and factors that may have contributed to whether applications were approved; and 2) changes FDA has made to increase the first review cycle approval rate.

**Prescription Drug Discount Coupons and Patient Assistance Programs** Congressional Research Service, 2017-07-20 U.S. pharmaceutical manufacturers fund a variety of programs to help consumers defray the cost of prescription drugs. Industry assistance includes drug discount coupons, as well as free drugs and cost-sharing payments for individuals with lower incomes or high medical expenses. According to one analysis, drug manufacturers tendered discount coupons for more than 600 brands in 2016. Nonprofit patient assistance programs (PAPs) offered by drug manufacturers and independent charities dispense billions of dollars in assistance annually, placing them among the nation's largest charitable organizations. Drug manufacturers say the generous aid is evidence of their commitment to patients who cannot afford a prescribed course of medication. Many manufacturer programs are designed to reduce consumer cost sharing for high-cost specialty drugs used to treat cancer, hepatitis C, Crohn's disease, and other serious conditions. Industry analysts and the Department of Health and Human Services' Office of Inspector General say that the programs also are used to bolster prescription drug sales and prices and can increase costs for government and commercial health payers. For example, an insured consumer may use a manufacturer coupon to buy a more expensive brand-name drug even if a lower-cost generic is available. Although the coupon reduces the consumer's cost-sharing obligation for the drug, it does not cut the price paid by the consumer's health care plan. Federal statutes, including an

anti-kickback law, limit the use of coupons and manufacturer donations in conjunction with federal health care programs, such as the Medicare Part D prescription drug benefit. The anti-kickback law in Section 1128B(b) of the Social Security Act prohibits the knowing and willful offer or payment of remuneration to induce a person to buy an item or service that will be reimbursed by a federal health care program. In the private sector, some health plans have barred their enrollees from redeeming coupons for certain drugs or have chosen not to cover certain drugs that qualify for coupon discounts. Other health plans allow or encourage enrollees to redeem coupons for expensive drugs to improve the odds that the enrollees will complete a prescribed course of treatment. This paper provides background on prescription drug coverage and consumer spending and on the role played by coupons and PAPs.
