**Einstein Never Used Flash Cards** Kathy Hirsh-Pasek,Roberta Michnick Golinkoff,Diane Eyer,2004-08-12 Now Available in Paperback! In Einstein Never Used Flashcards highly credentialed child psychologists, Kathy Hirsh-Pasek, Ph.D., and Roberta Michnick Golinkoff, Ph.D., with Diane Eyer, Ph.D., offer a compelling indictment of the growing trend toward accelerated learning. It's a message that stressed-out parents are craving to hear: Letting tots learn through play is not only okay-it's better than drilling academics! Drawing on overwhelming scientific evidence from their own studies and the collective research results of child development experts, and addressing the key areas of development-math, reading, verbal communication, science, self-awareness, and social skills-the authors explain the process of learning from a child's point of view. They then offer parents 40 age-appropriate games for creative play. These simple, fun--yet powerful exercises work as well or better than expensive high-tech gadgets to teach a child what his ever-active, playful mind is craving to learn.

Slides for Students Gary D. Fisk,2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that.Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

*Learning to Teach Inclusively* Celia Oyler,2017-09-25 This book—co-authored by a teacher educator, a diverse group of five pre-service student teachers, and their student teaching supervisor—takes a unique, illuminating look at the experience of student teaching from the perspective of student teachers. It is premised on learning to teach as an inquiry process enriched by collaborative conversations. Readers are invited into student teachers’ dilemmas and decisions as they negotiate between their public school placements and their university-based coursework. Throughout the year of student teaching, the authors document their discussions and reflections about teaching in inclusive classrooms that shed light on the complex process of learning to teach and also offer insights into issues of teaching for equity. Each of the central chapters is written by an individual student teacher and tracks a specific question over the course of two semesters. Topics include: \*contrasting models of inclusion and teachers’ differing orientations toward issues of community, difference, and normalcy; \*how teachers foster peer relationships; \*classroom management and discipline; \*heterogeneous instruction; and \*school-wide culture and systems that promote or mitigate against inclusion. A new perspective on what can be learned from student teaching is provided by the student teachers’ supervisor. In the concluding chapter, the teacher educators address the connections among the student teachers’ inquiries and offer an analysis from a disability studies/disability rights perspective on how inclusion fits into a social (rather than a medical) model of disability. All of the authors of this book seek to contribute to conversations that place advocacy, inquiry, contestation, and challenge at the center of the teacher’s role. This volume is their invitation to readers to join in a larger conversation about the challenges of, and necessity for, becoming inclusive teachers. Learning to Teach Inclusively is intended for inservice and preservice courses in elementary education, inclusion, and teacher research, and for field experience seminars. It is also suitable for graduate courses in teacher research, supervision, and research in teacher education.
