Foundations of Information Technology in the Era of Network and Mobile Computing Ricardo Baeza-Yates,Ugo Montanari,Nicola Santoro,2013-06-29

Foundations of Information Technology in the Era of Network and Mobile Computing is presented in two distinct but interrelated tracks: -Algorithms, Complexity and Models of Computation; -Logic, Semantics, Specification and Verification. This volume contains 45 original and significant contributions addressing these foundational questions, as well as 4 papers by outstanding invited speakers. These papers were presented at the 2nd IFIP International Conference on Theoretical Computer Science (TCS 2002), which was held in conjunction with the 17th World Computer Congress, sponsored by the International Federation for Information Processing (IFIP), and which convened in Montréal, Québec, Canada in August 2002.

Relics of the Buddha John S. Strong,2018-06-05 Buddhism is popularly seen as a religion stressing the truth of impermanence. How, then, to account for the long-standing veneration, in Asian Buddhist communities, of bone fragments, hair, teeth, and other bodily bits said to come from the historic Buddha? Early European and American scholars of religion, influenced by a characteristic Protestant bias against relic worship, declared such practices to be superstitious and fraudulent, and far from the true essence of Buddhism. John Strong's book, by contrast, argues that relic veneration has played a serious and integral role in Buddhist traditions in South and Southeast Asia-and that it is in no way foreign to Buddhism. The book is structured around the life story of the Buddha, starting with traditions about relics of previous buddhas and relics from the past lives of the Buddha Sakyamuni. It then considers the death of the Buddha, the collection of his bodily relics after his cremation, and stories of their spread to different parts of Asia. The book ends with a consideration of the legend of the future parinirvana (extinction) of the relics prior to the advent of the next Buddha, Maitreya. Throughout, the author does not hesitate to explore the many versions of these legends and to relate them to their ritual, doctrinal, artistic, and social contexts.

After the Beep Kathleen Heck, 2008-03 Written with the laugh-out-loud humor that can only come from someone well acquainted with the mishaps of everyday corporate life, *After the Beep* is a highly entertaining, always amusing selection of real-and really outlandish-communications delivered via the information superhighway all day, every day in our world of real-time messaging. Filled with humorous vignettes told through e-mails, text messages, and transcripts of voice mails, *After the Beep* will ring with familiarity to anyone who has experienced the strange and unusual communiqués that result from the confusing quagmire of America's convoluted corporate environment. Seasoned businesswoman Kathleen Heck pokes fun at people through their follies and inane comments while depicting how work life in America can turn innocent messages into ridiculous directives. Each entry is followed by Heck's witty commentary, providing a gut-busting sketch of daily corporate life. From the mundane halls of a stodgy mortgage company to the overly exuberant newsletter of a college athletic department, *After the Beep* captures the true comedy of supposedly professional communication gone hopelessly, and hilariously, awry.

On The Move to Meaningful Internet Systems 2003: CoopIS, DOA, and ODBASE Zahir Tari, Douglas C. Schmidt, 2003-10-25 missions in fact also treat an envisaged mutual impact among them. As for the 2002 edition in Irvine, the organizers wanted to stimulate this cross-pollination with a program of shared famous keynote speakers (this year we got Sycara, - ble, Soley and Mylopoulos!), and encouraged multiple attendance by providing authors with free access to another conference or workshop of their choice. We received an even larger number of submissions than last year for the three conferences (360 in total) and the workshops (170 in total). Not only can we therefore again claim a measurable success in attracting a representative volume of scienti?c papers, but such a harvest allowed the program committees of course to compose a high-quality cross-section of worldwide research in the areas covered. In spite of the increased number of submissions, the Program Chairs of the three main conferences decided to accept only approximately the same number of papers for presentation and publication as in 2002 (i. e. , around 1 paper out of every 4-5 submitted). For the workshops, the acceptance rate was about 1 in 2. Also for this reason, we decided to separate the proceedings into two volumes with their own titles, and we are grateful to Springer-Verlag for their collaboration in producing these two books. The reviewing process by the respective program committees was very professional and each paper in the main conferences was reviewed by at least three referees.

Social Media in South India Shriram Venkatraman, 2017-06-09 One of the first ethnographic studies to explore use of social media in the everyday lives of people in Tamil Nadu, *Social Media in South India* provides an understanding of this subject in a region experiencing rapid transformation. The influx of IT companies over the past decade into what was once a space dominated by agriculture has resulted in a complex juxtaposition between an evolving knowledge economy and the traditions of rural life. While certain class

tensions have emerged in response to this juxtaposition, a study of social media in the region suggests that similarities have also transpired, observed most clearly in the blurring of boundaries between work and life for both the old residents and the new. Venkatraman explores the impact of social media at home, work and school, and analyses the influence of class, caste, age and gender on how, and which, social media platforms are used in different contexts. These factors, he argues, have a significant effect on social media use, suggesting that social media in South India, while seeming to induce societal change, actually remains bound by local traditions and practices.

Cooperative and Distributed Intelligent Computation in Fog Computing Hoa Tran-Dang, Dong-Seong Kim, 2023-06-22 This informative text/reference presents a detailed review of the state of the art in fog computing paradigm. In particular, the book examines a broad range of important cooperative and distributed computation algorithms, along with their design objectives and technical challenges. The coverage includes the conceptual fundamental of fog computing, its practical applications, cooperative and distributed computation algorithms using optimization, swarm intelligence, matching theory, and reinforcement learning methods. Discussions are also provided on remaining challenges and open research issues for designing and developing the efficient distributed computation solutions in the next-generation of fog-enabled IoT systems.

Cognitive Computing for Human-Robot Interaction Mamta Mittal, Rajiv Ratn Shah, Sudipta Roy, 2021-08-13 Cognitive Computing for Human-Robot Interaction: Principles and Practices explores the efforts that should ultimately enable society to take advantage of the often-heralded potential of robots to provide economical and sustainable computing applications. This book discusses each of these applications, presents working implementations, and combines coherent and original deliberative architecture for human-robot interactions (HRI). Supported by experimental results, it shows how explicit knowledge management promises to be instrumental in building richer and more natural HRI, by pushing for pervasive, human-level semantics within the robot's deliberative system for sustainable computing applications. This book will be of special interest to academics, postgraduate students, and researchers working in the area of artificial intelligence and machine learning. Key features: Introduces several new contributions to the representation and management of humans in autonomous robotic systems; Explores the potential of cognitive computing, robots, and HRI to generate a deeper understanding and to provide a better contribution from robots to society; Engages with the potential repercussions of cognitive computing and HRI in the real world. Introduces several new contributions to the representation and management of humans in an autonomous robotic system Explores cognitive computing, robots and HRI, presenting a more in-depth understanding to make robots better for society Gives a challenging approach to those several repercussions of cognitive computing and HRI in the actual global scenario

My Life and Other Aggravations Ted Slate, 2013-07 Welcome to the hilarious tapestry of musings of veteran newsman and columnist Ted Slate. In My Life and Other Aggravations, Slate mines the exceedingly rich terrain of his life, careers and experiences to share a uniquely eloquent world view. Whether examining his second-life career as a tour director, or sharing the trials and tribulations of aging, Slate's stories are a privileged invitation to

unlatch a treasure chest of humorous and often intriguing experiences. Slate explores wide-ranging topics like the absurdity of exotic pet ownership, the challenges of texting, drinking calf blood cocktails with Masai tribesmen in Africa, hair-loss woes, to-do-lists, his love-hate relationship with Florida and his failed attempt to bribe a Yankee ticket agent with a colonoscopy, just to name a few. Slate's stories infest the mind as if they were your own. Part memoir, part cultural study, *My Life and Other Aggravations* is a compelling read that masterfully weaves together both the poignant and funny.

Super Thinking Gabriel Weinberg, Lauren McCann, 2019-06-18 A WALL STREET JOURNAL BESTSELLER! You can't really know anything if you just remember isolated facts. If the facts don't hang together on a latticework of theory, you don't have them in a usable form. You've got to have models in your head. - Charlie Munger, investor, vice chairman of Berkshire Hathaway The world's greatest problem-solvers, forecasters, and decision-makers all rely on a set of frameworks and shortcuts that help them cut through complexity and separate good ideas from bad ones. They're called mental models, and you can find them in dense textbooks on psychology, physics, economics, and more. Or, you can just read *Super Thinking*, a fun, illustrated guide to every mental model you could possibly need. How can mental models help you? Well, here are just a few examples... • If you've ever been overwhelmed by a to-do list that's grown too long, maybe you need the Eisenhower Decision Matrix to help you prioritize. • Use the 5 Whys model to better understand people's motivations or get to the root cause of a problem. • Before concluding that your colleague who messes up your projects is out to sabotage you, consider Hanlon's Razor for an alternative explanation. • Ever sat through a bad movie just because you paid a lot for the ticket? You might be falling prey to Sunk Cost Fallacy. • Set up Forcing Functions, like standing meeting or deadlines, to help grease the wheels for changes you want to occur. So, the next time you find yourself faced with a difficult decision or just trying to understand a complex situation, let *Super Thinking* upgrade your brain with mental models.

Proceedings of the 2023 4th International Conference on Education, Knowledge and Information Management (ICEKIM 2023) Xueming Yuan, Yohannes Kurniawan, Zhenyan Ji, 2023-06-29 This is an open access book. With the successful experience of the past 3 years, we believe that the 2023 4th International Conference on Education, Knowledge and Information Management (ICEKIM 2023) will be an even greater success in 2023, and welcome all scholars and experts to submit their papers for the conference! The 2023 4th International Conference on Education, Knowledge and Information Management (ICEKIM 2023) will be held on January 13-15, 2023 in Zhengzhou, China. In the era of information explosion, there is no doubt that education is an important way of knowledge production, dissemination and diffusion. Education plays an important role in promoting human development and promoting the development of society and human knowledge. ICEKIM 2023 is to bring together innovative academics and industrial experts in the field of Education, Knowledge and Information Management to a common forum. The primary goal of the conference is to promote research and developmental activities in Education, Knowledge and Information Management and another goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working all around the world. The

conference will be held every year to make it an ideal platform for people to share views and experiences in international conference on Education, Knowledge and Information Management and related areas.

Networks, Crowds, and Markets David Easley, Jon Kleinberg, 2010-07-19 Are all film stars linked to Kevin Bacon? Why do the stock markets rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.

Computer Aided Verification E. Allen Emerson, 2000-06-28 This book constitutes the refereed proceedings of the 12th International Conference on Computer Aided Verification, CAV 2000, held in Chicago, IL, USA in July 2000. The 35 revised full papers presented together with 9 tool papers were carefully reviewed and selected from 91 submissions. The papers address all current aspects of the theory and practice of formal methods for hardware and software verification. Emphasis is given to verification algorithms, methods, and tools and their implementation.

The World Beyond Digital Rights Management Jude C. Umeh, 2007 Content owners and commercial stakeholders face a constant battle to protect their intellectual property and commercial rights. Umeh outlines the issues behind this battle, current solutions to the problem, and looks to a future beyond digital rights management.

Computational Science and Its Applications - ICCSA 2003 Vipin Kumar, Marina L. Gavrilova, C.J. Kenneth Tan, Pierre L'Ecuyer, 2003-08-03 The three-volume set, LNCS 2667, LNCS 2668, and LNCS 2669, constitutes the refereed proceedings of the International Conference on Computational Science and Its Applications, ICCSA 2003, held in Montreal, Canada, in May 2003. The three volumes present more than 300 papers and span the whole range of computational science from foundational issues in computer science and mathematics to advanced applications in virtually all sciences making use of computational techniques. The proceedings give a unique account of recent results in computational science.
