Theological Dictionary of the Old Testament, Volume XI G. Johannes Botterweck, Helmer Ringgren, Heinz-Josef Fabry, 1974 This multivolume work is still proving to be as fundamental to Old Testament studies as its companion set, the Kittel-Friedrich Theological Dictionary of the New Testament, has been to New Testament studies. Beginning with father, and continuing through the alphabet, the TDOT volumes present in-depth discussions of the key Hebrew and Aramaic words in

the Old Testament. Leading scholars of various religious traditions (including Roman Catholic, Lutheran, Reformed, Anglican, Greek Orthodox, and Jewish) and from many parts of the world (Denmark, France, Germany, Great Britain, Greece, Israel, Italy, the Netherlands, Norway, Sweden, Switzerland, and the United States) have been carefully selected for each article by editors Botterweck, Ringgren, and Fabry and their consultants, George W. Anderson, Henri Cazelles, David Noel Freedman, Shemaryahu Talmon, and Gerhard Wallis. The intention of the writers is to concentrate on meaning, starting from the more general, everyday senses and building to an understanding of theologically significant concepts. To avoid artificially restricting the focus of the articles, TDOT considers under each keyword the larger groups of words that are related linguistically or semantically. The lexical work includes detailed surveys of a word's occurrences, not only in biblical material but also in other ancient Near Eastern writings. Sumerian, Akkadian, Egyptian, Ethiopic, Ugaritic, and Northwest Semitic sources are surveyed, among others, as well as the Qumran texts and the Septuagint; and in cultures where no cognate word exists, the authors often consider cognate ideas. TDOT's emphasis, though, is on Hebrew terminology and on biblical usage. The contributors employ philology as well as form-critical and tradition-historical methods, with the aim of understanding the religious statements in the Old Testament. Extensive bibliographical information adds to the value of this reference work. This English edition attempts to serve the needs of Old Testament students without the linguistic background of more advanced scholars; it does so, however, without sacrificing the needs of the latter. Ancient scripts (Hebrew, Greek, etc.) are regularly transliterated in a readable way, and meanings of foreign words are given in many cases where the meanings might be obvious to advanced scholars. Where the Hebrew text versification differs from that of English Bibles, the English verse appears in parentheses. Such features will help all earnest students of the Bible to avail themselves of the manifold theological insights contained in this monumental work.

Gender and Prestige in Literature Alexandra Dane, 2020-07-10 Gender and Prestige in Literature: Contemporary Australian Book Culture explores the relationship between gender, power, reputation and book publishing's consecratory institutions in the Australian literary field from 1965-2015. Focusing on book reviews, literary festivals and literary prizes, this work analyses the ways in which these institutions exist in an increasingly cooperative and generative relationship in the contemporary publishing industry, a system designed to limit field transformation. Taking an intersectional approach, this research acknowledges that a number of factors in addition to gender may influence the reception of an author or a title in the literary field and finds that progress towards equality is unstable and non-linear. By combining quantitative data analysis with interviews from authors, editors, critics, publishers and prize judges Alexandra Dane maps the circulation of prestige in Australian publishing, addressing questions around gender, identity, literary reputation, literary worth and the resilience of the status quo that have long plagued the field.

Occupational Prestige in Comparative Perspective Donald J. Treiman, 2013-10-22 *Occupational Prestige in Comparative Perspective* provides information pertinent to the study of the nature of inequality in human society. This book discusses that stratification is inevitable in complex societies as they are characterized by a highly developed division of labor into distinct occupational roles. Organized into five parts encompassing 10 chapters, this book begins with an overview of the nature of occupational prestige systems that is rooted in power relations. This text then examines the extent of intrasocial variation in occupational prestige evaluations. Other chapters consider the contrast between the consensus that characterizes occupational prestige evaluations and the lack of consensus that characterizes the evaluation of other social categories. This book discusses as well the basic pattern of occupational evaluations and the worldwide uniformity in occupational evaluations. The final chapter deals with the development of the occupational scale and discusses its potential uses. This book is a valuable resource for sociologists.

Power, Constraint, and Policy Change Robert M. Howard, Christine H. Roch, Susanne Schorpp, Shane A. Gleason, 2021-02-01 *Power, Constraint, and Policy Change* analyzes state court influence on state education finance reform. Beginning in the early 1970s litigants began filing suits in state courts to change state education funding in order to prevent disparities in education resources between wealthy and poor communities. These cases represent a fundamental policy debate in American society, pitting the importance of education against the cost and method of funding it. Through education finance, the authors explore how and why courts often end up determining and resolving policy funding debates. Education funding has involved both the federal constitution and state constitutions, as well as legislation and court-mandated remedies, which, ultimately, determine who and how we pay for this critical American value.

Highlights of Astronomy Volume 11B Johannes Andersen, 2012-12-06 Since 1967, the main scientific events of the General Assemblies of the International Astronomical Union have been published in the separate series, *Highlights of Astronomy*. The present Volume 11 presents the major scientific presentations made at the XXIIIrd General Assembly, August 18-30, 1997, in Kyoto, Japan. The two volumes (11A+B) contain the texts of the three Invited Discourses as well as the proceedings or extended summaries of the 21 Joint Discussions and two Special Sessions held during the General Assembly.

Ban Chiang, Northeast Thailand, Volume 2C Joyce C. White, Elizabeth G. Hamilton, 2020-02-07 This third volume in the series is devoted to presenting and interpreting the metallurgical evidence from Ban Chiang, northeast Thailand, in the broader regional context. Because the production of metal artifacts must engage numerous communities in order to acquire and process the raw materials and then create and distribute products, understanding metals in past societies requires a regional perspective. This is the first book to compile, summarize, and synthesize the English-language copper production and exchange evidence available so far from Thailand and Laos in a thorough and systematic manner. Chapters by Vincent C. Pigott and Thomas O. Pryce examine in detail the mining and smelting of copper in several sites, and the lead-isotope evidence for the sourcing of artifacts found in two of the consumption sites included in the study. Another chapter compiles the metal consumption evidence, including results of technical studies on prehistoric metals recovered from more than 35 sites excavated in central and northeast Thailand. This compilation demonstrates important regional variation in chaînes opératoires, allowing explication and synthesis of the technological traditions found in this region during prehistory. The review and compilation sheds new light on the social and economic context for the adoption and

development of metallurgy in this part of the world. One key insight is that Thailand presents a case for a community-driven bronze age, where the choices of peaceful local communities, not elites or centralized political entities, shaped how metal technological systems were implemented in this region. This fresh perspective on the role of metallurgy in ancient societies contributes to an expanded global understanding of how humans have engaged metal technologies, contributing to debunking the conventional paradigm that emphasized a top-down view and a standardized metallurgical sequence, a paradigm that has dominated archeometallurgical studies for the last century or more.
