Most organizations need some form of marketing or corporate communications and this text is designed to service both practitioners and students undertaking formal study. The New Nuclear Disorder Stephen J. Cimbala,2016-02-17 In the twenty-first century, the United States confronts an international system of great complexity and shifting security challenges. Among these challenges are those posed by nuclear weapons. Instead of becoming obsolete or being marginalized by the end of the Cold War and the demise of the Soviet Union, nuclear weapons have become more important to present and future international stability and peace but the relationship is paradoxical. On one hand, the spread of nuclear weapons to additional states with unsettled grievances or hegemonic ambitions threatens to destabilize local balances of power and set off regional arms races. In addition, the possible acquisition by terrorists of nuclear weapons or fissile materials creates a threat that may be 'beyond deterrence' according to hitherto accepted concepts. On the other hand, nuclear weapons in the hands of other states can contribute to stable deterrence and help to prevent nuclear proliferation to international miscreants. Certain cases loom large in the short run that highlight this book's relevance, including the possible acquisition and deployment of nuclear weapons by Iran and the continuing tensions created by North Korea's nuclear arsenal. The Obama 'pivot' of national security and defense emphasis to Asia reflects not only the growing economic importance of that region, but also the growing number of security dilemmas in a region that is already awash in nuclear forces. The management of nuclear crises and even the possible need to terminate nuclear wars before they expand beyond a single region are among the possible challenges facing future U.S. and allied policy makers and military leaders.

The Social Psychology of Consumer Behaviour Richard Bagozzi,Zynep Gurhan-Canli,Joseph Priester,2002-08-16 How do consumers process information? How do they make choices and decisions? How are decisions translated into actions of consumption? How can marketing influence and respond to consumers? The Social Psychology of Consumer Behaviour illuminates an area of intense academic and wider interest, bringing together research and practical insights into how theories in social psychology can be applied to consumer behaviour. Core themes include information processing and social cognition, communication processes, attitude models, emotion, social identity theory, and action theory. Within each of the major areas of social psychology, a historical perspective is provided, current knowledge reviewed, theories and findings critiqued, and directions for future research appraised. The Social Psychology of Consumer Behaviour provides a deeper perspective than standard texts which tend to be either atheoretical, overly encyclopedic, or outdated. It considers why consumers buy what they do, and how they go about making individual and group decisions concerning consumption. The result is essential reading for students, researchers and practitioners in psychology and marketing, as well as for those in related fields such as public policy, public health, health psychology, political science and sociology.

Media Freedom and Pluralism Beata Klimkiewicz,2010-05-10 Addresses a critical analysis of major media policies in the European Union and Council of Europe at the period of profound changes affecting both media environments and use, as well as the logic of media policy-making and reconfiguration of traditional regulatory models. The analytical problem-related approach seems to better reflect a media policy process as an interrelated part of European integration, formation of European citizenship, and exercise of communication rights within the European communicative space. The question of normative expectations is to be compared in this case with media policy rationales, mechanisms of implementation (transposing rules from EU to national levels), and outcomes.
