Peoples of the Buddhist World Paul Hattaway, 2004 In the past 20 years, Christians around the world have launched initiatives to reach Muslims, Communists, Hindus and other major unreached people groups but the Buddhist world has largely been overlooked. Hundreds of millions of Buddhists continue to live and die without any exposure to the Gospel. In *Peoples of the Buddhist World*, researcher and author Paul Hattaway graphically presents prayer profiles of more than 200 Buddhist people groups around the world, beautifully illustrated with color pictures throughout. In addition, experts have contributed articles on various aspects of Buddhism, helping the reader to learn, pray and work until that day when the kingdom of the world has become the kingdom of our Lord and of his Christ and he will reign for ever and ever (Rev. 11:15).--From publisher's description.

Food Price Policy in Thailand Theodore Panayotou, 1987

Trade, Exchange Rate, and Agricultural Pricing Policies in Thailand 'Ammā Sayāmwālā, Suthad Setboonsarng, 1989 Thailand is still largely an agricultural country. In 1984, agricultural work was still the main source of earnings for more than 70 percent of the population. For much of the 25 year period covered by this report, government intervention in the prices of rice, maize, and natural rubber was extensive. For these products, intervention took the form of explicit export taxes and restrictive quotas. Sugar, on the other hand, was imported until 1960. For many years prior to that, government policy was to encourage growers and thus achieve self-sufficiency. One conclusion of this study is that the Thai sugar industry would have shrunk dramatically if the government had refrained from intervention. Intervention in the prices of rice and natural rubber had the effect of penalizing farm producers by reducing their output prices. There was, as a consequence a shift of resources towards Thailand's small industrial sector. In 1981, the Thai government lifted its quota restrictions, and

liberalized its trade by eliminating its intervention in the maize, rice, sugar and natural rubber markets. Unfortunately for export growers, however, the gradual elimination of intervention was overshadowed by sharp declines in the world prices of Thailand's major agricultural exports.

Tax Policies on Tobacco Products in Thailand Who Regional Office for South-East Asia, 2011 In its efforts to control tobacco use, Thailand has used taxation as a price measure and increased excise tax rates significantly over time. This report suggests that a mechanism to raise the price of cigarettes at a rate higher than the inflation along with appropriate taxation on other tobacco products will make the taxation system more effective for tobacco control.

Informal Norms in Global Governance Dr Suerie Moon, Prof Dr Wolfgang Hein, 2013-03-28 Hein and Moon take up a serious problem of contemporary global governance: what can be done when international trade rules prevent the realization of basic human rights? Starting in the 1990s, intellectual property obligations in trade agreements required many developing countries to begin granting medicines patents, which often rendered lifesaving drugs unaffordable. At stake was the question of what priority would be given to health—particularly of some of the world's poorest people—and what priority to economic interests, particularly those of the most powerful states and firms. This book recounts the remarkable story of the access to medicines movement. The authors offer an explanation for how the informal, but powerful norm that every person should have access to essential medicines emerged after a decade of heated political contestation and against long odds. They also explore the stability and scope of the norm. Finally, the book examines the limitations of informal norms for protecting human rights, and when renewed focus on changing formal norms is warranted.

Hedonic Price Model of Secondhand Condominium Units in Bangkok Kongkoon

Tochaiwat, 2020-10-26 In this research, the objective was to explore prices of secondhand condominium units in Bangkok, as well as to generate a hedonic price model. The data from 200 samples of secondhand condominiums posted on six well-known secondhand real estate websites in Thailand were gathered and analyzed by Multiple Regression Analysis. A hedonic price model with a logarithmic form with an adjusted R² of 72.7 percent was proposed. There are a total of 11 determinants regarding customer satisfaction, in which 6 variables have negative effects while the remaining determinants have positive effects. From the paired sample t-test, the means of the observed selling prices and the predicted selling prices are not significantly different, at a 95 percent confidence level.

Price and Exchange Rate Determination Between Laos and Thailand Roselyne

Joyeux, William E. Worner, 1996

The Economics of Financial Markets Roy E. Bailey, 2005-05-26

The Economics of Financial Markets presents a concise overview of capital markets, suitable for advanced undergraduates and for beginning graduate students in financial economics. Following a brief overview of financial markets - their microstructure and the randomness of stock market prices - this textbook explores how the economics of uncertainty can be applied to financial decision-making. The mean-variance model of portfolio selection is discussed, with analysis extended to the capital asset pricing model (CAPM). Arbitrage plays a pivotal role in finance and is studied in a variety of contexts, including the APT model of asset prices. Methods for the empirical evaluation of CAPM and APT are also discussed, together with the volatility of asset prices, the intertemporal CAPM and the equity premium puzzle. An analysis of bond contracts leads into an assessment of theories of the term structure of interest rates.

Finally, financial derivatives are explored, focusing on futures and options contracts.

Thailand International Monetary Fund. Asia and Pacific Dept,2017-05-31 This Selected Issues paper analyzes factors that could bring inflation back to target in Thailand. The paper estimates a hybrid New Keynesian Phillips curve with time varying parameters to gauge the quantitative role of (long-term) inflation trends, economic slack, and import price inflation in shaping inflation dynamics. The analysis reveals some important changes in Thailand's inflation dynamics. It suggests that the impact of lower import prices was a major factor behind the decline in headline inflation in 2015, with low oil prices the largest contributor to inflation dynamics. Monetary policy easing, within a broader

expansionary policy mix, should help bring inflation back to target.

Exchange Rate Systems and Policies in Asia Paul S. L. Yip,2008 This important book comprises insightful papers on lessons learned from some major exchange rate and monetary experiences in Asia, exchange rate crisis management in Asia and choice of exchange rate systems in Asia. Originally published in the Singapore Economic Review, Vol. 52, No. 3, 2007, it deals primarily with the exchange rate systems and policies in the three largest economies in Asia: China, Japan and India. It also contains a paper on Singapore's exchange rate system, whose success could make it a role model for other small open economies. Notable contributors include Ronald McKinnon and John Williamson, among others. The editor is the original designer of China's latest exchange rate system reform.
