Brendan G. Carr

Disease Control Priorities in Developing Countries Dean

T. Jamison, Joel G. Breman, Anthony R. Measham, George Alleyne, Mariam Claeson, David B. Evans, Prabhat Jha, Anne Mills, Philip Musgrove, 2006-04-02 Based on careful analysis of burden of disease and the costs of interventions, this second edition of 'Disease Control Priorities in Developing Countries, 2nd edition' highlights achievable priorities; measures progress toward providing efficient, equitable care; promotes cost-effective interventions to targeted populations; and encourages integrated efforts to optimize health. Nearly 500 experts - scientists, epidemiologists, health economists, academicians, and public health practitioners - from around the world contributed to the data sources and methodologies, and identified challenges and priorities, resulting in this integrated, comprehensive reference volume on the state of health in developing countries.

Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Communities in Action National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on Community-Based Solutions to Promote Health Equity in the United States,2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The Outbreak Atlas Rebecca Katz,Mackenzie S.

Moore,2024-04-18 The public has taken a new level of interest in outbreak response since 2020, learning epidemiological terms and seeking information about how to stay prepared in a pandemic. Public health professionals are calling on citizen scientists' participation as outbreaks are increasingly occurring in complex environments, expanding the number of people and types of activities required to control the spread of disease. However, there is no comprehensive source mapping this complexity and detailing needed actions tailored to the public. For years the Georgetown University Center for Global Health Science and Security has curated an interactive online tool for professionals that identifies the activities involved across all phases of an outbreak. The Georgetown Outbreak Activity Library (GOAL) captures what needs to get done, when, and by whom. Now, in The Outbreak Atlas, Rebecca Katz and Mackenzie S. Moore have translated this complex material into a book designed for a public audience. This book provides an overview of outbreak activities alongside compelling case studies and visuals to guide readers through the

complexity involved in outbreak preparedness, response, and recovery. It lifts the curtain on the rationale and interconnectedness of outbreak responses across different fields and at various levels, presenting accessible information that ensures a shared understanding of the essential activities to control an outbreak.

An Act to Amend Title 38, United States Code, to Extend Certain Expiring Veterans' Health Care Programs, and for Other Purposes United States,1994
