Edward Ruppelt

*Supplement, Alaska* ,2015-10-15

*PC AI.* ,1990

*Official Gazette of the United States Patent Office* United States. Patent Office,1961

**Code of Federal Regulations** ,1983

**The Report on Unidentified Flying Objects (Second Edition)** Edward Ruppelt,2006 Regardless of whether or not one believes that the study of UFO reports has any merit it is a simple fact that such reports were studied by various elements of the U.S. government, most notably the Air Force. Those interested in learning more about this remarkable bit of military history will find this reprint of Edward Ruppelt's classic insider examination of early Air Force interest in UFO phenomena an invaluable resource. (Captain Edward J. Ruppelt was chief of Project Blue Book from early 1951 until September 1953.) This reprint edition is also notable in that it includes the often overlooked additional three chapters added by Ruppelt for the 1960 second-edition release.

**Serious Microhydro** Scott Davis,2010-10-12 Waterpower is the largest source of renewable energy in the world today, and microhydro is a mature, proven technology that can provide clean, inexpensive, renewable energy with little or no impact on the environment. Serious Microhydro brings you dozens of firsthand stories of energy independence covering a complete range of

systems, from household pressure sites to higher pressure installations capable of powering a farm, business, or small neighborhood. Topics include: Low head and medium head sites AC-only systems as well as ones using a battery/inverter subsystem Stand alone power supply or grid intertie setups Hybrid systems (combined with photovoltaics or wind) With all the variables involved in microhydro, there is no “typical” system. These case studies represent the most comprehensive collection of knowledge and experience available for tailoring an installation to meet the needs of a site and its owner or operators. If you are considering building a system, you are bound to find a wealth of creative solutions appropriate to your own circumstances. Serious Microhydro shows how scores of people are achieving a high standard of living from local energy sources with a minimal ecological footprint. It has particular appeal to homeowners, teachers, renewable energy professionals, activists, and decision makers who want to understand the technology from a “hands-on” perspective. Scott Davis is an award-winning renewable energy project developer with decades of experience operating, installing, designing, selling, and teaching microhydro technology. He is a founder and president of Friends of Renewable Energy BC, and the author of Microhydro: Clean Power From Water.

*Textbook of Palliative Nursing* Department of Nursing Education and Research  
City of Hope National Medical Center Betty R. Ferrell Research  
Scientist,Supportive Care Program Nessa Coyle Director, Pain & Palliative  
Service Department of Neurology Memorial Sloan-Kettering Cancer

Center,2005-11-10 Originally published in 2001, the Textbook of Palliative Nursing has become the standard text for the field of hospice and palliative care nursing. In this new edition, the authors and editors have updated each chapter to ensure that the content is evidence-based and current references are included. They also have retained the important focus on case studies throughout the text and practical, clinically-relevant tables, figures, and other resources. Like the previous edition, this text has an introductory section of the general principles of palliative care followed by a comprehensive section on symptom assessment and management encompassing twenty-one different symptoms. Other key sections include psychosocial support and spiritual care, providing holistic perspective on care of patients facing advanced disease. The text also includes an innovative section on special populations addressing those most in need of palliative care. The textbook is a useful resource for all nurses with the excellent section on end-of-life care across settings. In this new edition, the pediatric palliative care section has been greatly expanded and includes seven separate chapters on pediatric care. It includes a section on special issues addressing topics such as ethical considerations, nursing research, and public policy perspectives and concludes with a section presenting models of excellence including six international models. This edition also offers a narrative on dying based on a spouse's perspective. The text includes an appendix with an extensive list of resources for nurses in the field.
