Social Media in Industrial China Xinyuan Wang,2016-09-13 Life outside the mobile phone is unbearable.' Lily, 19, factory worker. Described as the biggest migration in human history, an estimated 250 million Chinese people have left their villages in recent decades to live and work in urban areas. Xinyuan Wang spent 15 months living among a community of these migrants in a small factory town in southeast China to track their use of social media. It was here she witnessed a second migration taking place: a movement from offline to online. As Wang argues, this is not simply a convenient analogy but represents the convergence of two phenomena as profound and consequential as each other, where the online world now provides a home for the migrant workers who feel otherwise 'homeless'. Wang's fascinating study explores the full range of preconceptions commonly held about Chinese people – their relationship with education, with family, with politics, with 'home' – and argues why, for this vast population, it is time to reassess what we think we know about contemporary China and the evolving role of social media.

Schooling and Cultural Autonomy Rodrigue Landry,Réal Allard,Kenneth Deveau,2010 The results of the students from the 30 school boards are grouped into four regions: New Brunswick, the other Atlantic provinces, Ontario, the

Western provinces and the territories.² The last chapter summarizes the main study findings and examines the ensuing educational and pedagogical consequences. [...] The institutional completeness component is the place where the main action takes place for the members of the community, the institutions and organizations of civil society. [...] Social proximity is the foundation of the model for cultural autonomy, helping to highlight its central and fundamental role both for the vitality of the language and for the cultural autonomy of the group. [...] These are enculturation (amount of contact with the group's language and culture), personal autonomization (which ensures a person's autonomy as a learner and user of the language), and social conscientization (which encourages the development of a critical consciousness of the group's legitimacy and stability and sparks behaviours of involvement and leadership). [...] It represents the group's management of the cultural and social institutions that breathe life into the group's language in the public domain (Breton, 1964) and marks the community's ability to establish and manage what Fritz Capra (2002) calls identity borders. In fact, institutions are the markers of the group's collective identity and have a major role to play in its historical continuity.

Public Perception of Local Governments Pawel Swianiewicz, 2003 Public Perception of Local Governments concentrates on changes in public attitudes

towards local governments, and on differences in approaches towards various components of the respective municipal systems. As local governments become increasingly important in citizens' everyday lives, political institutions and public actors who can demonstrate greater sensitivity towards public opinion are vital for the success of future reforms. The hidden message of this work is that without regular and systematic analysis of public opinion, viable local government policies will become even more difficult to design and implement in the future. The book comprises research on this issue in the Czech Republic, Hungary, Poland and Slovakia. Public Perception of Local Governments seeks to answer three basic questions: (1) What is the public's opinion on the newly created local governments? (2) How did general public opinion influenced the various decentralization reforms of the past decade? (3) What are the typical forms of communication with the general public at the local level?

The Spanish Connection Eberhard Crailsheim, 2016-09-12 In early modern times, the city of Seville was the most important entrepôt between the Old and the New World, attracting numerous merchants from all of Europe. They provided the American market with European merchandise, especially with textiles and metalware from Flanders and France. This book investigates the networks of Flemish and French merchants in Seville, displaying overall structures of trade as well as collective strategies of both merchant colonies.

The Failure of Economic Diplomacy P. Clavin, 1995-12-17 Based on new archival research, this is the first comprehensive study of the failure of international co-operation to combat the Great Depression. The book explores the impact of protectionism, reparations and war debts, as well as the more well known disagreements on monetary issues which, together, helped to prolong the most profound economic depression of the twentieth century. The economic and diplomatic lessons drawn from this period by the major powers - particularly German intelligence as to the deep divisions in Anglo-American economic relations - also provide an important contribution to understanding the origins of the Second World War and the diplomatic and economic order created in its aftermath.

Processes Of International Negotiations Frances Mautner-markhof, 2019-07-11

The goals of the Conference were to foster increased communication and understanding between practitioners and researchers and among various research disciplines, to present and discuss research results, and to identify possible future research activities. The participation and interaction of both high level negotiations practitioners and researchers were considered especially valuable and unique aspects of the Conference. All of the subjects dealt with at the Conference have direct and obvious relevance to improving negotiations outcomes on, and the ability to deal effectively with, such issues as the trans boundary effects (environmental, economic, etc.) of technological risk, security and confidence-building measures, and international economic cooperation- all of which are high on the negotiations agenda of many countries.

Total Cold War Kenneth Alan Osgood, 2006 Osgood focuses on major campaigns such as Atoms for Peace, People-to-People, and cultural exchange programs. Drawing on recently declassified documents that record U.S. psychological operations in some three dozen countries, he tells how U.S. propaganda agencies presented everyday life in America to the world: its citizens living full, happy lives in a classless society where economic bounty was shared by all. Osgood further investigates the ways in which superpower disarmament negotiations were used as propaganda maneuvers in the battle for international public opinion. He also reexamines the early years of the space race, focusing especially on the challenge to American propagandists posed by the Soviet launch of Sputnik.
