Wearable and Nearable Biosensors and Systems for Healthcare Marco Di Rienzo,Ramakrishna Mukkamala,2021-09-01 Biosensors and systems in the form of wearables and “nearables” (i.e., everyday sensorized objects with transmitting capabilities such as smartphones) are rapidly evolving for use in healthcare. Unlike conventional approaches, these technologies can enable seamless or on-demand physiological monitoring, anytime and anywhere. Such monitoring can help transform healthcare from the current reactive, one-size-fits-all, hospital-centered approach into a future proactive, personalized, decentralized structure. Wearable and nearable biosensors and systems have been made possible through integrated innovations in sensor design, electronics, data transmission, power management, and signal processing. Although much progress has been made in this field, many open challenges for the scientific community remain, especially for those applications requiring high accuracy. This book contains the 12 papers that constituted a recent Special Issue of Sensors sharing the same title. The aim of the initiative was to provide a collection of state-of-the-art investigations on wearables and nearables, in order to stimulate technological advances and the use of the technology to benefit healthcare. The topics covered by the book offer both depth and breadth pertaining to wearable and nearable technology. They include new biosensors and data transmission techniques, studies on accelerometers, signal processing, and cardiovascular monitoring, clinical applications, and validation of commercial devices.

Your step-by-step plan will include: setting your goals for blood pressure and cholesterol, determining the calorie-level you need for maintenance or weight loss, developing meal plans, developing a realistic exercise plan, adjusting the DASH diet to accommodate other health problems, choosing the key DASH diet foods, reading food labels, and learning how to incorporate more vegetables in your diet, and setting up your kitchen to make it easy to stay on track. This book was written by a registered dietitian who is experienced in helping people make sustainable behavior changes, and make healthy eating part of their real lives. She knows that people need flexibility and options to choose different approaches, since not everyone has the time or the interest in cooking or making drastic changes in how they eat. A Kidnapped Mind Pamela Richardson,2006-05-01 How do we begin to describe our love for our children? Pamela Richardson shows us with her passionate memoir of life with and without her estranged son, Dash. From age five Dash suffered Parental Alienation Syndrome at the hands of his father. Indoctrinated to believe his mother had abandoned him, after years of monitored phone calls and impeded access eight-year-old Dash decided he didn't want to be forced to visit her at all; later he told her he would never see her again if she took the case to court. But he didn't count on his indefatigable mother's fierce love. For eight more years Pamela battled Dash's father, the legal system, their psychologist, the school system, and Dash himself to try and protect her son - first from his father, then from himself. A Kidnapped Mind is a heartrending and mesmerizing story of a Canadian mother's exile from and reunion with her child, through grief and beyond, to peace.
