**Start-up Nation** Dan Senor, Saul Singer, 2011-09-07 What the world can learn from Israel's meteoric economic success. *Start-Up Nation* addresses the trillion dollar question: How is it that Israel -- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the Israel effect, there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

**Sound for Moving Pictures** Neil Hillman, 2021-04-26 *Sound for Moving Pictures* presents a new and original sound design theory called the Four Sound Areas framework, offering a conceptual template for constructing, deconstructing and communicating all types of motion picture soundtracks; and a way for academics and practitioners to better understand and utilize the deeper, emotive capabilities available to all filmmakers through the thoughtful use of sound design. The Four Sound Areas framework presents a novel approach to sound design that enables the reader to more fully appreciate audience emotions and audience engagement, and provides a flexible, practical model that will allow professionals to more easily create and communicate soundtracks with greater emotional significance and meaning. Of obvious benefit to sound specialists, as well as motion picture professionals such as film producers, directors and picture editors, *Sound for Moving Pictures* also provides valuable insight for others interested in the subject; such as those involved with teaching soundtrack analysis, or those researching the wider topics of film studies and screen writing.

Copyright and the Music Marketplace United States Copyright Office,2015-12-21  
The Copyright Office has previously highlighted the outmoded rules for the licensing of musical works and sound recordings as an area in significant need of reform. Moreover, the Office has underscored the need for a comprehensive approach to copyright review and revision generally. This is especially true in the case of music licensing the problems in the music marketplace need to be evaluated as a whole, rather than as isolated or individual concerns of particular stakeholders.

The Long Tail Chris Anderson,2006-07-11 What happens when the bottlenecks that stand between supply and demand in our culture go away and everything becomes available to everyone? The Long Tail is a powerful new force in our economy: the rise of the niche. As the cost of reaching consumers drops dramatically, our markets are shifting from a one-size-fits-all model of mass appeal to one of unlimited variety for unique tastes. From supermarket shelves to advertising agencies, the ability to offer vast choice is changing everything, and causing us to rethink where our markets lie and how to get to them. Unlimited selection is revealing truths about what consumers want and how they want to get it, from DVDs at Netflix to songs on iTunes to advertising on Google. However, this is not just a virtue of online marketplaces; it is an example of an entirely new economic model for business, one that is just beginning to show its power. After a century of obsessing over the few products at the head of the demand curve, the new economics of distribution allow us to turn our focus to the many more products in the tail, which collectively can create a new market as big as the one we already know. The Long Tail is really about the economics of abundance. New efficiencies in distribution, manufacturing, and marketing are essentially resetting the definition of what's commercially viable across the board. If the 20th century was about hits, the 21st will be equally about niches.

*We Gotta Get Out of This Place* Doug Bradley,Craig Werner,2016-01-06 "The diversity of voices and songs reminds us that the home front and the battlefield are always connected and that music and war are deeply intertwined." —Heather Marie Stur, author of *21 Days to Baghdad* For a Kentucky rifleman who spent his tour trudging through Vietnam's Central Highlands, it was Nancy Sinatra's "These Boots Are Made for Walkin'." For a black marine distraught over the assassination of Martin Luther King Jr., it was Aretha Franklin's "Chain of Fools." And for countless other Vietnam vets, it was

"I Feel Like I'm Fixin' to Die" or the song that gives this book its title. In *We Gotta Get Out of This Place*, Doug Bradley and Craig Werner place popular music at the heart of the American experience in Vietnam. They explore how and why U.S. troops turned to music as a way of connecting to each other and the World back home and of coping with the complexities of the war they had been sent to fight. They also demonstrate that music was important for every group of Vietnam veterans—black and white, Latino and Native American, men and women, officers and "grunts"—whose personal reflections drive the book's narrative. Many of the voices are those of ordinary soldiers, airmen, seamen, and marines. But there are also "solo" pieces by veterans whose writings have shaped our understanding of the war—Karl Marlantes, Alfredo Vea, Yusef Komunyakaa, Bill Ehrhart, Arthur Flowers—as well as songwriters and performers whose music influenced soldiers' lives, including Eric Burdon, James Brown, Bruce Springsteen, Country Joe McDonald, and John Fogerty. Together their testimony taps into memories—individual and cultural—that capture a central if often overlooked component of the American war in Vietnam.

Along the way, Gleick profiles key innovators, including Charles Babbage, Ada Lovelace, Samuel Morse, and Claude Shannon, and reveals how our understanding of information is transforming not only how we look at the world, but how we live. The Brand Innovation Manifesto John Grant, 2006-05-12 The days of the image brands are over, and 'new marketing' has gone mainstream. The world's biggest companies are pursuing a post-advertising strategy, moving away from advertising and investing in leading edge alternatives. In the vanguard of the revolution has been John Grant, co-founder of the legendary agency St. Luke's and author of The New Marketing Manifesto, whose radical thinking has informed a generation. Now Grant is set to stun the industry again. In The Brand Innovation Manifesto, he redefines the nature of brands, showing why old models and scales no longer work and revealing that the key to success today is impacting people's lifestyles (think Starbucks, iPod and eBay). At the heart of the book is the concept of the 'brand molecule' to which new cultural ideas can be constantly added to keep pace with change. Cataloguing 32 classes of idea, Grant presents a practical approach to mixing and matching them within your own market to develop new brand ideas - and new ideas for existing brands.

**The Google Story (2018 Updated Edition)** David A. Vise, Mark Malseed, 2005-11-15 The definitive, bestselling account of the company that changed the way we work and live, updated for the twentieth anniversary of Google's founding with analysis of its most recent bold moves to redefine the world—and its even more ambitious plans for the future. Moscow-born Sergey Brin and Midwest-born Larry Page dropped out of graduate school at Stanford University to, as they said, "change the world" through a powerful search engine that would organize every bit of information on the Web for free. The Google Story takes you deep inside the company's wild ride from an idea that struggled for funding in 1998 to a firm that today rakes in billions in profits. Based on scrupulous research and extraordinary access to Google, this fast-moving narrative reveals how an unorthodox management style and a culture of innovation enabled a search-engine giant to shake up Madison Avenue, clash with governments that accuse it of being a monopoly, deploy self-driving cars to forever change how we travel, and launch high-flying Internet balloons. Unafraid of controversy, Google is surging ahead with artificial intelligence that could cure diseases but also displace millions of people from their jobs, testing the founders' guiding mantra: DON'T BE EVIL. Praise for The Google Story "[The authors] do a fine job of recounting Google's rapid rise and explaining its search business."—The New York Times "An intriguing insider view of the Google culture."—Harvard Business Review "An interesting read on a powerhouse company . . . If you haven't read anything about one of today's most influential companies, you should. If you don't read The Google Story, you're missing a few extra treats."—USA Today "Fascinating . . . meticulous . . . never bogs down."—Houston Chronicle
