**Music Apps for Musicians and Music Teachers** Elizabeth C. Axford,2015-02-19 In today's digital age, learning and creating music has never been so easy and affordable. Anyone can enhance their musical knowledge, skills, and creativity with the multitude of music apps available. However, sifting through thousands of music apps in the Apple App Store and Google Play can be a daunting task for any musician or music instructor. But not anymore! Having spent countless hours researching the most interesting useful, educational, fun, and easy-to-use music apps, Elizabeth C. Axford in Music Apps for Musicians and Music Teachers surveys the landscape of music-related apps for both iOS and Android mobile devices, including tablets and smartphones.

Music Apps for Musicians and Music Teachers lists hundreds of music-related apps organized by category, including singing, musical instruments, music theory and composition, songwriting, improvisation, recording, evaluating music performances, listening to music, music history and literature, music appreciation, and more. App developers are listed with each app, including links to their websites for updates and support. The book sections and chapters align with the newly revised National Standards for Music Education released in 2014 by the National Association for Music Education. Suggested activities for educators are provided, as well as key terms and a bibliography. Music Apps for Musicians and Music Teachers is for anyone interested in music, whether hobbyist or professional. It enhances the ability to learn on the go by offering musicians, music students, and music instructors a list of the most useful music apps available.

*The New Landscape of Mobile Learning* Charles Miller, Aaron Doering, 2014-02-24 The New Landscape of Mobile Learning is the first book to provide a research based overview of the largely untapped array of potential tools that m-Learning offers educators and students in face-to-face, hybrid, and distance education. This cutting edge guide provides:

- An essential explanation of the emergence and role of Apps in education
- Design guidelines for educational Apps
- Case studies and student narratives from across the US describing successful App integration into both K-12 and Higher Education
- Robust, research-based evaluation criteria for educational Apps

Although many believe that Apps have the potential to create opportunities for transformative mobile education, a disparity currently exists between the individuals responsible for creating Apps (i.e. developers who often have little to no instructional experience) and the ultimate consumers in the classroom (i.e. K-20 educators and students). The New Landscape of Mobile Learning bridges this gap by illuminating critical design, integration, and evaluation narratives from leaders in the instructional design, distance education, and mobile learning

fields.
