The Accidental Producer Tim Johanson, 2023-09-21 Found yourself organising a show that you didn't mean to? Or frustrated that no one else is producing your show and just want to do it yourself? You're not alone. *The Accidental Producer* is the first-timer's guide to getting a play, musical or anything else on stage. This step by step handbook explains every stage of the production process, from funding your project to selling the show and everything in between. Written by an experienced theatre producer this book additionally shares the perspectives of eleven industry specialists you might encounter on your journey. · Park Theatre Artistic Director, Jez Bond on how to connect to a venue decision maker · Fleabag producer, Francesca Moody on the secrets to success at the Edinburgh Fringe · Arts Council England Relationship Manager, Paula Varjack on how securing their funding actually works · Press representative, Chloe Nelkin on how to maximise a show's press coverage · Agent, Alex Segal on approaching star actors This much-needed book's liberating message is that anyone can produce a successful show, especially if they have in their armoury the advice of those that have come before.

The Visual Effects Producer Charles Finance, Susan Zwerman, 2015-02-11 First published in 2010. Go behind the scene of the behind the scenes to learn how the business of producing the dazzling visual effects we see in movies and on TV works. With decades of combined VFX production and supervisory experience in Hollywood, the authors share their experience with you, illuminating standard industry practices and tips on: * preproduction planning * scheduling * budgeting * evaluating vendors and the bidding process * effective data management * working on-set, off-set, or overseas * dealing with changes in post-production * legal issues (contracts, insurance, business ethics), and more. Also included are interviews with established, successful Hollywood VFX Producers about their career paths and how they got to where they are now. From pre-production to final delivery, this is your complete guide to visual effects production, providing insight on VFX budgeting and scheduling (with actual forms for your own use) and common production techniques such as motion control, miniatures, and pre-visualization.

High Definition Cinematography Paul Wheeler, 2012-11-12 High definition is here to stay. HD changes the whole shooting and editing process in film and television production and this book is to satisfy your hunger for information. The Art of Video Production Leonard Shyles, 2007-02-09 *The Art of Video Production* emphasizes the enduring principles and essential skills of the communication process and the new digital technologies that are necessary to create effective video content. Author Leonard C. Shyles uses a unique approach by explaining how things are done and why things are done rather than just that they are done—it is not about concepts versus skills, but about concepts and skills.

The British Television Pilot Episodes Research Guide 1936-2015 Christopher Perry, 2015-12 A new idea can become an expensive flop for TV executives. So from the earliest days of television, the concept of a pilot episode seemed like a good idea. Trying out new actors; new situations and new concepts before making a series was good economical sense. It was also tax deductible. Sometimes these pilots were shown on television; sometimes they were so awful they were hidden from sight in archives; and sometimes they were excellent one-offs, but a series seemed elusive and never materialised. Chris Perry has always been

fascinated by the pilot episode. So many pilots are made annually, but never seen by audiences. Only a handful appear on screen. It's a hidden world of comedy, variety, drama and factual programming. This volume attempts to lift the lid on the world of the TV pilot by revealing the many transmitted and untransmitted episodes made through the decades.

The EDCF Guide to Digital Cinema Production Lars Svanberg,2013-06-26 A professional introduction to the end-to-end process of digital filmmaking! The EDCF Guide to Digital Cinema Production sheds light on the ongoing and confusing transition from analog to digital technology in film production. In addition to a complete analysis of technical concerns, this text deals with a number of issues where European and Hollywood priorities differ. It adds fuel to the discussion on Photo-Chemical Fundamentalism and the future of traditional film-based cinematography. With special emphasis on new HD production techniques for the big cinema screen, this guide is the one and only resource available from a European perspective. The EDCF Guide to Digital Cinema Production provides film professionals and decisions-makers in European cinema with an excellent basis for discussions on how to handle the transition from analog to digital technology. Look no further for: * Several production case studies, among them Ingmar Bergman's last film *Saraband* (2003) and Lars von Trier's *Dogville* (2003). * Surveys of HD Systems & Cameras and The 37 MFAQ on HD Production. * Expert reports on Audio Recording for HD and the Digital Intermediate Process. * Detailed European initiatives in Digital Cinema. * An up-to-date survey of the problematic standards situation for Digital Cinema. * A comprehensive look at archiving - the Achilles Heel of digital production. * The pros and cons of producing feature films digitally - a unique and professional view of the agony and ecstasy. Editor-in-Chief Lasse Svanberg is a founding member of EDCF. He was DoP on 14 feature films 1966-81, founded TM (Technology & Man) Magazine at the Swedish Film Institute in 1968 and was its Chief Editor until 1998 He was elected Fellow of BKSTS 1979, Fellow of SMPTE 1995 and granted Professor's title by the Swedish Government 2002. He is the author of six books on the history and possible future of film, video and television. The European Digital Cinema Forum (EDCF) was constituted in June 2001 as joint Swedish-British-French effort to establish a European forum for discussions, information exchange and industrial activities in the field of Digital Cinema. This project was initiated because digital production, digital distribution and digital exhibition of film is the most radical technical change facing the film industry since sound film was introduced.

The Kaleidoscope British Christmas Television Guide 1937-2013 Chris Perry,2016-02-03 A Guide to British television programmes shown at Christmas time, throughout the years.

High Definition Television Philip J. Cianci, 2014-01-10 The 40-year history of high definition television technology is traced from initial studies in Japan, through its development in Europe, and then to the United States, where the first all-digital systems were implemented. Details are provided about advances in HDTV technology in Australia and Japan, Europe's introduction of HDTV, Brazil's innovative use of MPEG-4 and China's terrestrial standard. The impact of HDTV on broadcast facility conversion and the influx of computer systems and information technology are described, as well as the contributions of the first entrepreneurial HD videographers and engineers. This thoroughly researched volume highlights several of the landmark high-definition broadcasts from 1988 onward, includes input gathered from more than 50 international participants, and concludes with the rollout of consumer HDTV services throughout the world.

High Definition and 24P Cinematography Paul Wheeler, 2012-10-12 This authoritative new reference demystifies the technologies of high definition and 24P cinematography. It is written for the director of photography, camera crew and producer or director and deals with the subject from their point of view. It provides a thorough and logical description of the five scanning formats 24P, 25P, 30P, 50i and 60i as well as recording formats, editing options, delivery potential and discussions on the financial implications these decisions might have. It looks at comparative costs between different decisions surrounding camera formats, such as 16mm to 35mm shooting for different examples, such as a 100-minute low budget movie or 30 second commercial. There is also considerable discussion on the advantages and disadvantages of using HD versus film, seen from a producer's perspective and what the impact is on all those involved in making a movie. Different delivery systems and camera equipment are discussed as well as editing. Filled with practical advice for tackling everyday decisions and choices, this is a must-have guide for anyone using or considering using high definition technology.

Video Production Handbook Gerald Millerson, Jim Owens, 2012-11-12 Techniques matter! Great ideas don't automatically translate into great programs. It's not enough simply to show what is going on. The way you present your subject will influence how your audience responds. You need to choose your picture and sound carefully, to convey your ideas in an interesting, persuasive way. This book will show you how. Video Production Handbook shows the full production process, from inception of idea to final distribution. The book focuses especially on why each step occurs as it does and provides guidance in choosing the simplest methods of creating the shots you want in your video project. Concentrating on the techniques and concepts behind the latest equipment, this book demonstrates the fundamental principles needed to create good video content on any kind of budget. Suitable for students and beginning videographers, the new edition of this classic text retains its clarity and directness but has been completely revised and updated. This practical sourcebook has been specially prepared to give you an at-a-glance guide to quality video program-making on a modest budget. Emphasis throughout is on excellence with economy; whether you are working alone or with a small multi-camera group. The well-tried techniques detailed here will steer you through the hazards of production, helping you to avoid those frustrating, time-wasting problems, and to create an effective video program. For many years Video Production Handbook has helped students and program-makers in a wide range of organizations. Now in its thoroughly revised 4th edition, Video Production Handbook guides you step-by-step, explaining how to develop your initial program ideas and build them into a successful working format. It covers the techniques of persuasive camerawork, successful lighting and sound treatment, and video editing. You will find straightforward up-to-the-minute guidance with your daily production problems, and a wealth of practical tips based on the authors' personal experiences.

Television Production Jim Owens, Gerald Millerson, 2012 *Television Production* offers you a very practical guide to professional TV and video production techniques. Here you will find straightforward descriptions and explanations of the equipment you will use, and discover the best ways to use it. The authors also tell you how to anticipate and quickly overcome commonly-encountered problems in television production. You will explore in detail all the major features of television production, learning the secrets of top-grade camerawork, persuasive lighting techniques, effective sound treatment, as well as the subtle processes of scenic design and the art of video editing. Successful program-making is about communication and persuasion. It is not merely a matter of knowing which buttons to press, but how to influence and persuade your audience, hold their attention, develop their interest, and arouse their emotions. This book tells you how to do all this - and much more. The 15th edition has been completely revamped to include lessons on: * 3D- how to use 3D cameras, field-tested 3D workflows, and more * Shooting with DSLRs * Lighting with LEDs * Field-proven lessons and techniques on everything you need to know about the tools and tricks of television production, telling you how, as well as why and when to employ certain techniques and tools * New edition updated to include lessons on 3D-workflows and working with 3D cameras, shooting with DSLRs, lighting with LEDs, and more * Full of inspiring 4-color images that visually drive home the lessons conveyed in the text

Television Production Gerald Millerson, Jim Owens, 2009 The bible of television production books--now thoroughly overhauled for the new millennium!

The Ethics of Horror Michael J. Burke, 2024-03-06 *The Ethics of Horror: Spectral Alterity in Twenty-First Century Horror Film* examines the theme of spectral haunting in contemporary American horror cinema through the lens of ethical responsibility. Arguing that moral obligation can manifest as terror to the complacent self, the text extracts this dimension of ethics in twenty-first century horror films. Drawing on the ethical theories of Emmanuel Levinas and Jacques Derrida, which posit the asymmetrical obligation of the self to the other, Michael Burke highlights how recent horror films portray spectral antagonists as ethical others that hound protagonists and summon them to an accountability that they can neither evade nor ever completely fulfill. Burke observes the resulting destabilization of notions of ethical responsibility and justice in a variety of contemporary horror subgenres, including technohorror, haunted house and zombie films.

The Complete Film Production Handbook Eve Light Honthaner, 2013-09-23 This book is for working film/TV professionals and students alike. If you're a line producer, production manager, production supervisor, assistant director or production coordinator--the book has everything you'll need (including all the forms, contracts, releases and checklists) to set up and run a production--from finding a production office to turning over delivery elements.
