Here's what readers are saying about *Google Drive & Docs In 30*

Minutes: "I am so glad this was made! I've been using Google Docs for a while now and have been encouraging my teacher colleagues to do so as well to facilitate collaboration. It has become my go-to text book to help new users understand quickly. If you're new to Google Drive or Google Documents, this will help you. If you're experienced, and want something to help those who come to you with questions, this is a nice tool to help them remember what you show them. I highly recommend it." "I just got a new position that requires record keeping. Having used Google Docs in the past, I decided to update my knowledge. I googled Docs for dummies and this was one of the results. I liked the concept that the title implies - a concise guide that will distill what I need and allow me to complete a task quickly" "A clear and concise explanation of how to navigate your way through google docs." "Excellent introduction to Google drive. Well researched, easy to read, nicely organized."

Cloud Computing in Libraries Mayank

Yuvaraj, 2020-10-12 Cloud computing is a model where computing resources (processors, storage, software) are offered as a utility from an indistinct location and boundaries to the user. Adoption of Cloud computing in recent years has gained momentum within various avenues round the globe due to its characteristics like elasticity, virtualization and pay-as-you-go pricing. In tune with the trend various companies have evolved which are offering web applications. These companies provide the system required to host the application to users on lease which saves them from purchasing. The book combines both theoretical and practical perspectives of cloud computing with a slant towards library and information centres. The book describes in detail about various companies which are providing cloud computing solutions and infrastructure for library and information centres. Initiatives of OCLC and best practices adopted in other libraries around the world has been discussed at length. Many avenues of the

implementation of cloud computing has been identified in the present study. Various initiatives of the library professionals to move their internet sites, their integrated library system for cataloguing and acquisition, Cloud based library apps, Cloud based Stack Map and their repository systems and inter library loan systems to the cloud has been mentioned. The book further proposes a model which may serve as a blueprint for implementation of cloud computing technologies in libraries. With the timely publication of book, library and information service practitioners after going through the book can outsource the task of maintaining the computer infrastructure and focus on their mission to serve people with right information at right point of time.

The Ridiculously Simple Guide to Google Apps (G Suite) Scott La Counte, 2019-09-11 Chances are you grew up a Word and Office user. Maybe you were a rebel and committed your herd to OpenOffice, or, dare I say, WordPerfect—but for the majority of people, our lives were loyal to Microsoft. In 2005, a small little startup named Upstartle developed something unheard of at the time: a web-based word processor called Writely. It pioneered the idea of writing on the “cloud” and changed the way people thought about word processing. Google noticed the little upstart, and in 2006, they acquired the company. The software was abandoned and turned into what everyone knows today as Google Docs. It disrupted the industry—namely, Microsoft’s industry. Today, Google has a whole suite of productivity apps; from documents to spreadsheets, you can do just about anything from the cloud. Microsoft and Apple have each made big attempts to create cloud-based environments of their own for office productivity, but Google pioneered the idea and its collaborative, online environment make it hard to beat. It’s become so feature-rich that many businesses are finding it to be the preferred way to conduct business. If you are thinking about making the switch to Google, or have already made the switch but want to make sure you are using it correctly, then this guide will walk you through it. It will show you all the basic features to make sure you can get up and running as quickly as possible. It covers Google Drive, Google Docs, Google Slides, Google Sheets, and Google Forms. Let’s get started!
