A Networked Self and Birth, Life, Death Zizi Papacharissi,2018-08-06 We are born, live, and die with technologies. This book is about the role technology plays in sustaining narratives of living, dying, and coming to be. Contributing authors examine how technologies connect, disrupt, or help us reorganize ways of parenting and nurturing life. They further consider how technology sustains our ways of thinking and being, hopefully reconciling the distance between who we are and who we aspire to be. Finally, they address the role technology plays in helping us come to terms with death, looking at technologically enhanced memorials, online rituals of mourning, and patterns of grief enabled through technology. Ultimately, this volume is about using technology to reimagine the art of life.

The A.I. Marketer Andrew W. Pearson,2019-04-15 We seem to be living in the age of A.I. Everywhere you look, companies are touting their most recent A.I., machine learning, and deep learning breakthroughs, even when they are far short of anything that could be touted as a “breakthrough.” “A.I.” has eclipsed “Blockchain” and “Crypto” as the buzzword of today. Indeed, one of the best ways to raise VC funding is to stick ‘AI’ or ‘ML’ at the front of your prospectus and “.ai” at the end of your website. Separating fact from fiction is more important than it has ever been. The A.I. Marketer breaks down A.I., machine learning, and deep learning into five unique use cases—sound, time series, text, image, and video—and also reveals how marketing executives can utilize this powerful technology to help them more finely tune their marketing campaigns, better segment their customers, increase lead generation, and foster strong customer loyalty. Today, “Personalization”—the process of utilizing mobile, social, geo-location data, web morphing, context and even affective computing to tailor messages and experiences to an individual interacting with them—is becoming the optimum word in a radically new customer intelligence environment. The A.I. Marketer explains this complex technology in simple to understand

terms and then shows how marketers can utilize the psychology of personalization with A.I. to both create more effective marketing campaigns as well as increase customer loyalty. Pearson shows companies how to avoid Adobe's warning of not using industrial-age technology in the digital era. Pearson also reveals how to create a platform of technology that seamlessly integrates EDW and real-time streaming data with social media content. Analytical models and neural nets can then be built on both commercial and open source technology to better understand the customer, thereby strengthening the brand and, just as importantly, increasing ROI.
