Agile Analytics Ken Collier, 2012 Using Agile methods, you can bring far greater innovation, value, and quality to any data warehousing (DW), business intelligence (BI), or analytics project. However, conventional Agile methods must be carefully adapted to address the unique characteristics of DW/BI projects. In Agile Analytics, Agile pioneer Ken Collier shows how to do just that. Collier introduces platform-agnostic Agile solutions for integrating infrastructures consisting of diverse operational, legacy, and specialty systems that mix commercial and custom code. Using working examples, he shows how to manage analytics development teams with widely diverse skill sets and how to support enormous and fast-growing data volumes. Collier's techniques offer optimal value whether your projects involve back-end data management, front-end business analysis, or both. Part I focuses on Agile project management techniques and delivery team coordination, introducing core practices that shape the way your Agile DW/BI project community can collaborate toward success Part II presents technical methods for enabling continuous delivery of business value at production-quality levels, including evolving superior designs; test-driven DW development; version control; and project automation Collier brings together proven solutions you can apply right now--whether you're an IT decision-maker, data warehouse professional, database administrator, business intelligence specialist, or database developer. With his help, you can mitigate project risk, improve business alignment, achieve better results--and have fun along

the way.

Developments in the Economics of Aging David A. Wise,2009-08-01 The number of Americans eligible to receive Social Security benefits will increase from forty-five million to nearly eighty million in the next twenty years. Retirement systems must therefore adapt to meet the demands of the largest aging population in our nation's history. In *Developments in the Economics of Aging*, David A. Wise and a distinguished group of analysts examine the economic issues that will confront policy makers as they seek to design policies to protect the economic and physical health of these older Americans. The volume looks at such topics as factors influencing work and retirement decisions at older ages, changes in life satisfaction associated with retirement, and the shift in responsibility for managing retirement assets from professional money managers of traditional pension plans to individual account holders of 401(k)s. *Developments in the Economics of Aging* also addresses the complicated relationship between health and economic status, including why health behaviors vary across populations and how socioeconomic measures correlate with health outcomes.

School Meals, Educational Achievement, and School

Competition Christel Vermeersch, Michael Kremer, 2005

Vermeersch and Kremer examine the effects of subsidized school meals on school participation, educational achievement, and school finance in a developing country setting. They use data from a program that was implemented in 25 randomly chosen preschools in a pool of 50. Children's school participation was 30 percent higher in the treatment group than in the comparison group. The meals program led to higher curriculum test scores, but only in schools where the teacher was relatively experienced prior to the program. The school meals displaced teaching time and led to larger class sizes. Despite improved incentives, teacher absenteeism remained at a high level of 30 percent. Treatment schools raised their fees, and comparison schools close to treatment schools decreased their fees. Some of the price effects are caused by a combination of capacity constraints and pupil transfers that would not happen if the school meals were ordered in all schools. The intention-to-treat estimator of the effect of the randomized program incorporates those price effects, and therefore it should be considered a lower bound on the effect of generalized school meals. This insight on price effects generalizes to other randomized program evaluations. This paper--a product of the Poverty Reduction and Economic Management 2, Africa Technical Families--is part of a larger effort in the region to increase our understanding of the impact of programs aimed at reaching the Millennium Development Goals.

Pension Design and Structure Olivia S. Mitchell, Stephen P. Utkus, 2004-07-15 Employees are increasingly asked to make sophisticated decisions about their pension and healthcare plans. Yet recent research shows that the decisions 'real' people make are often not those of the careful and well-informed economic agent conventionally portrayed in economic research. Rather, decision-makers tend to operate with flawed information and make some of the most critical financial decisions of their lives lacking a full understanding of the options before them and

the implications of their decisions. Pension Design and Structure explores the assumptions behind commonly-held theories of retirement decision-making, in order to draw out the consequences of frontier research in behavioral finance and economics for those interested in better design and structure of retirement pensions. Using large datasets newly provided by financial service firms and real-world experiments, this volume tests the hypotheses of this research. This is the first book to explore the implications of behavioral finance research for pensions and retirement studies. The authors blend cutting-edge research from several fields including Finance, Economics, Management, Sociology, and Psychology. The book will be of interest to pension plan participants and sponsors, financial service groups responsible for pensions, and retirement system regulators.

Pricing and Revenue Optimization Robert Phillips,2005-08-05 This is the first comprehensive introduction to the concepts, theories, and applications of pricing and revenue optimization. From the initial success of yield management in the commercial airline industry down to more recent successes of markdown management and dynamic pricing, the application of mathematical analysis to optimize pricing has become increasingly important across many different industries. But,

since pricing and revenue optimization has involved the use of sophisticated mathematical techniques, the topic has remained largely inaccessible to students and the typical manager. With methods proven in the MBA courses taught by the author at Columbia and Stanford Business Schools, this book presents the basic concepts of pricing and revenue optimization in a form accessible to MBA students, MS students, and advanced undergraduates. In addition, managers will find the practical approach to the issue of pricing and revenue optimization invaluable. Solutions to the end-of-chapter exercises are available to instructors who are using this book in their courses. For access to the solutions manual, please contact marketing@www.sup.org.

Chaldean-Americans Mary C. Sengstock, 1982 Chaldean Americans in Detroit, Michigan, a growing community of Roman Catholic immigrants from Iraq, are the focus of this study. A

description is given of the Detroit Chaldean community centers around three key institutions, namely the church, the family, and the ethnic occupation or community economic enterprise, and of how these institutions have been affected by the migration experience and by contact with the new culture. An analysis of the social setting of migration examines religious and economic determinants of migration to America, migration effects on the Detroit community, and Chaldeans' relationships with other social groups in Detroit. An exploration of Chaldeans' adaptation to their new setting considers assimilation and acculturation processes, changes in social structure and values, creation of a balance between old country patterns and new practices, and the development of an ethnic identity and a sense of nationalism. Ethnic conflicts and accommodation processes that arise from efforts to achieve the balance between old and new are explored, and it is suggested that family and friendship ties will offset the divisive effects of conflict and American liberalism and keep the Chaldean community from disintegrating. Finally, an exploration of the future direction of American ethnicity points to the need for unity in a culturally diverse society. (Author/MJL)
