So Good They Can't Ignore You Cal Newport, 2012-09-18 In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that follow your passion is good advice, and sets out on a quest to discover the reality of how people end up loving their careers. Not only are pre-existing passions rare and have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others

who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for aspiring entertainers was to be so good they can't ignore you, Cal Newport's clearly written manifesto is mandatory reading for anyone fretting about what to do with their life, or frustrated by their current job situation and eager to find a fresh new way to take control of their livelihood. He provides an evidence-based blueprint for creating work you love, and will change the way you think about careers, happiness, and the crafting of a remarkable life.

The Passion Paradox Brad Stulberg, Steve Magness, 2019-03-19 The coauthors of the bestselling *Peak Performance* dive into the fascinating science behind passion, showing how it can lead to a rich and meaningful life while also illuminating the ways in which it is a double-edged sword. Here's how to cultivate a passion that will take you to great heights—while minimizing the risk of an equally great fall. Common advice is to find and follow your passion. A life of passion is a good life, or so we are told. But it's not that simple. Rarely is passion something that you just stumble upon, and the same drive that fuels breakthroughs—whether they're athletic, scientific, entrepreneurial, or artistic—can be every bit as destructive as it is productive. Yes, passion can be a wonderful gift, but only if you know how to channel it. If you're not careful, passion can become an awful curse, leading to endless seeking, suffering, and burnout. Brad Stulberg and Steve Magness once again team up, this time to demystify passion, showing readers how they can find and cultivate

their passion, sustainably harness its power, and avoid its dangers. They ultimately argue that passion and balance--that other virtue touted by our culture--are incompatible, and that to find your passion, you must lose balance. And that's not always a bad thing. They show readers how to develop the right kind of passion, the kind that lets you achieve great things without ruining your life. Swift, compact, and powerful, this thought-provoking book combines captivating stories of extraordinarily passionate individuals with the latest science on the biological and psychological factors that give rise to—and every bit as important, sustain—passion.
