*Real Estate Investing for Double-Digit Returns* Petros Sivitanides, 2008-11-22 Real estate investing is a venture of diligence and foresight, and investors with a good sense of where property rents and values are headed can be very successful. Within this context, the book focuses on the foresight aspect of the real estate market, as it relates to a property's prospects for value gains. In particular, it first uncovers broader circumstances that create opportunities for substantial profits in real estate, and identifies four general categories of properties with significant profit potential. Subsequently, the book examines how such circumstances can be created in the case of residential, office, and retail real estate. Finally, the book describes specific sub-categories of properties with significant profit potential and examines the implications of the material presented in structuring high-return portfolios. The book should be of great interest to property owners, investors, and real estate professionals residing in any free economy around the globe.

**Global Real Estate Investment Trusts** David Parker,2012-02-01 As real estate investment trusts continue to grow exponentially in Asia and Europe - being already well established in the USA and Australasia - a comprehensive guide to the issues involved in REIT property investment decision making is badly needed. This book draws together the most recent developments in REIT management from academic research and professional practice. It is based on current, original academic research, including structured interviews with the managers of a wide range of different types of REITs as well as the research and publications of others, together with the author's 25 years experience in REIT management. It provides a theoretically robust and practically relevant up to date guide to the property investment decision making process for REITs. Presenting new insights, the author breaks the REIT property investment decision making process down into three phases comprising six stages with 30 sequential steps. Each chapter focuses on one stage of the property investment decision making process and introduces the key people in the REIT management team relevant to the activities in that chapter. The theory and principles are considered and illustrated by application to Super REIT, a \$15bn diversified REIT. **Global Real Estate Investment Trusts: People, Process and Management** fuses not only how REITs should undertake property investment decision making - based on how it is undertaken and the underlying property theory, capital market theory and finance theory - but also why each part of the decision making process is important.
