Buddhist Fasting Practice Wangchen Rinpoche, 2009-06-16 The Tibetan Buddhist practice of Nyungne ("nyoong-nay") has been gaining increased attention in Buddhist centers across North America. Participants say the practice purifies them both physically and spiritually. This volume is the only comprehensive treatment in English of these powerful teachings. Nyungne is a profound, two-and-a-half-day practice, a length of time especially helpful for people whose schedules cannot accommodate long-term retreat. It involves the keeping of strict vows; the second day is devoted to complete silence and fasting. The meditation centers on the recitations, mantras, and guided visualizations of the Thousand-Armed Chenrezig, the embodiment of all the buddhas' loving-kindness and compassion. Translated as "abiding in the fast," Nyungne is said to be effective in the

healing of illness, the nurturing of compassion, and the purification of negative karma.

Probability for Electrical and Computer Engineers Charles Therrien, Murali Tummala, 2004-06-01 Scientists and engineers must use methods of probability to predict the outcome of experiments, extrapolate results from a small case to a larger one, and design systems that will perform optimally when the exact characteristics of the inputs are unknown. While many engineering books dedicated to the advanced aspects of random processes and systems include background information on probability, an introductory text devoted specifically to probability and with engineering applications is long overdue. *Probability for Electrical and Computer Engineers* provides an introduction to probability and random variables. Written in a clear and concise style that makes the topic interesting and relevant for electrical and computer engineering students, the text also features applications and examples useful to anyone involved in other branches of engineering or physical sciences. Chapters focus on the probability model, random variables and transformations, inequalities and limit theorems, random processes, and basic combinatorics. These topics are reinforced with computer projects available on the CRC

Press Web site. This unique book enhances the understanding of probability by introducing engineering applications and examples at the earliest opportunity, as well as throughout the text. Electrical and computer engineers seeking solutions to practical problems will find it a valuable resource in the design of communication systems, control systems, military or medical sensing or monitoring systems, and computer networks.

It Had to Be You Jill Churchill, 2005-03-29 Comfortably ensconced in their late great-uncle's Grace and Favor mansion, brother and sister Robert and Lily Brewster are riding out the Depression, penniless but in high style. Now a new day is heralded by Franklin Roosevelt's inauguration. Barely recovered from his trip to Washington to witness the historic event, Robert is rushed by Lily to a nearby nursing home, where the Brewsters have agreed to lend a helping hand to the staff. But when an elderly resident is murdered in his bed, Robert and Lily realize the local police will need their able assistance as well -- especially since the slaying isn't the only big trouble in tiny Voorburg. The spring thaw has revealed another body, and the Brewster siblings must expose a cold-blooded criminal before he -- or she -- kills again.

The Boy Next Door Laura Dower, 2007 For use in schools and libraries only. Taryn has been friends with her next-door neighbor Jeff forever, but their friendship begins to change when they start sixth grade, in this story told from both Taryn and Jeff's point of view.
