Zbigniew Petrovich, Luc Baert, Luther W. Brady

Carcinoma of the Kidney and Testis, and Rare Urologic Malignancies Zbigniew Petrovich, Luc Baert, Luther W. Brady, 2013-11-11 Current information on the etiology, diagnosis, and treatment of carcinomas of the kidney and testis, as well as several less common tumors of the genitourinary tract. Recent contributions in epidemiology and molecular genetics are discussed with a view to their importance for clinical practice, while novel approaches to the treatment of several important tumors are presented, with emphasis on multidisciplinary patient management. Numerous illustrations assist readers in obtaining a better understanding of the data presented.

Climate Change and the Role of Education Walter Leal Filho, Sarah L. Hemstock, 2019-11-28 This book offers insights into the educational dimensions of climate change and promotes measures to improve education in this context. It is widely believed that education can play a key role in finding global solutions to many problems related to climate change. Indeed, education as a process not only helps young people to better understand and address the impact of global warming, but also fosters better attitudes and behaviours to aid efforts towards mitigating climate change and adapting to a changing environment. But despite the central importance of education in relation to climate change, there is a paucity of publications on this theme. Against this background, the book focuses on the educational aspects of climate change and showcases examples of research, projects and other initiatives aimed at educating various audiences. It also provides a platform for reflections on the role education can play in fostering awareness on a changing climate. Presenting a wide range of valuable lessons learned, which can be adapted and replicated elsewhere, the book appeals to educators and

practitioners alike.
