Ports in Proximity César Ducruet, 2016-04-08 Ports in Proximity provides an overview of key contemporary research in the field through a broad range of international case studies. The concepts of strategic management, supply chain management, port and transport economics and economic and transport geography are applied throughout the book to offer an in-depth understanding of the processes underlying spatial and functional dynamics in port systems. The opportunities for cooperation between competing adjacent ports is examined while the avenues for further joint research are identified, setting an agenda for further study.

Current Issues in Shipping, Ports and Logistics Theo Notteboom, 2011 Bringing together an international network of leading scholars, this multidisciplinary book unravels some of the most pressing challenges to shipping, ports, and logistics. Divided into five parts--shipping, the analysis of flows and networks, terminal operations and performance, logistics, and port development and governance--this record is an essential read for practitioners in the maritime and logistics world, postgraduate students, policy makers, and professional organizations. As market players expand and improve their services in line with increased requirements on rates, reliability, environmental footprint, and safety and security, this compendium encourages further systematic thinking.

Port-City Interplays in China James Jixian Wang, 2016-04-08 China has progressed dramatically since 1978 when the country started its economic reforms and opened up to the world economy. It took only three decades for China to develop from a closed, centrally planned economy with little sea-borne trade into the world's second largest economy with the largest container shipment volume in the world. The major coastal cities have been gateways linking China with the world and have experienced rapid urbanization and port growth. How has such port growth been speeded up and realized under strong state control and intervention? How have ports and their cities affected each other? What lessons can China's port-cities learn from other countries, regions and cities? What will be the next stage of port-city interplays in China in this globalizing era? Answering these questions from a geographical perspective, James Wang looks into four sets of port-city relations in China: Economic and functional relations between port and city; port-city spatial relations; external network relations of cities through ports; and port-city governance. These relations formulate a conceptual framework which is used to interpret port-city interplays

in individual ports and cities but also in multi-port regions such as the Pearl River Delta. Based on the author's own research and investigations into more than 25 port cities in China over the past 18 years, this book provides vivid stories about China and challenge existing theories on port development.

Port Management Stephen Pettit,Anthony Beresford,2017-12-03 Port Management looks at the numerous types of business interactions that occur at active ports. These include cooperating with other ports, coordinating deliveries with ships, overseeing port development, advertising and promotion, and enforcing security and environmental protection initiatives. Including research, practical insights and case studies, this book looks at quantitative methods and market analysis, maritime logistics, port planning and pricing, and commercial law. Port Management covers all the main aspects of management, administration and policy, and fills existing gaps in the literature in this area. Edited by two leading academics who have conducted research for the Department of Transport and the United Nations, this text is international in scope and includes research-based findings from a global team of contributors. It provides fascinating insights into the geography, economics, politics and trade involved in port management. Online supporting resources include lecture notes, lesson plans and PowerPoints.

Container Shipping Services and Their Impact on Container Port Competitiveness Wei Yim Yap,2009 Introducing a new methodology for measuring competitiveness in shipping ports, this analysis provides policy makers, industry practitioners, and academics with a pragmatic approach to the peculiarities of large ports around the world. Using quantitative measures as well as holistic and cultural considerations, the manual describes the general workings of the container port and shipping industry and provides in-depth case studies of ports in Southeast Asia, the Pearl River Delta, the Yangtze River Delta, and Northwest Europe.

Business and Economics of Port Management Wei Yim Yap,2020-07-06 Business and Economics of Port Management is a comprehensive but concise textbook and reference for insights into the workings of port industry from the business and economics perspectives. The book examines port management from various entities which include the government, port operator, shipping line, logistics companies and other port service providers. It provides in-depth discussions on strategic issues, challenges and disruptions that are faced by this industry. Given the uniqueness of each port and international nature of the port business, the book comes with useful case studies and lessons from different port regions around the world. Key lessons on challenges and issues faced by port managers, developers and regulators are highlighted and discussed using a combination of professional insights and publicly available information sources. The aim is to illustrate the decision-making process with the purpose of contributing to better outcomes for the industry, government and the public at large. Anyone who is approaching the subject matter will gain utmost understanding of how ports are critical in the global economy and societal well-being.

Pioneering Solutions in Supply Chain Performance Management Thorsten Blecker,Wolfgang Kersten,Christian M. Ringle,2013-08-22 As competition between value chains on globalized markets is constantly getting fiercer, there

is a growing trend to achieve closer collaboration and integration within these value chains and increasingly more complex supply networks. Additionally, in the wake of the thrilling possibilities of using information technology and its potential in boosting the performance of supply chains, researchers are increasingly looking for technology-enabled solutions for a better supply chain performance management. This volume, edited by Thorsten Blecker, Wolfgang Kersten and Christian Ringle, provides valuable insights into: - Maritime Logistics – Challenges and Opportunities - Leveraging Logistics Processes for Supply Chain Performance Management - Innovative Technology Solutions in Supply Chains - Knowledge Management in Logistics. This volume appeals to researchers and practitioners alike, who are interested in current contributions by international authors, providing theoretical, empirical and case-study oriented background and information on their research work.

Economic Cooperation Between Singapore and India Faizal bin Yahya, 2008-05-15 Asian interregional economic cooperation has assumed greater prominence with the rise of Asia's two giant economies of China and India. The economic liberalization of China's economy in 1979, followed by India in 1991, signalled the presence of business opportunities to foreign investors - including those from Asia. This book examines the growing economic relations between India and Singapore which has culminated in a Free Trade Agreement (FTA), the Comprehensive Economic Cooperation Agreement (CECA), signed by both economies in June 2005. Using the information technology sector as the main case study of the 'alliance' between Singapore and India, the book examines the challenges that both have overcome to expand their bilateral trade. In the process, Singapore has become one of the top five foreign investors in India. The CECA is important as it is the first free trade agreement that Singapore signed with a developing country; and furthermore it provided a blueprint for India to conclude similar FTAs with other ASEAN members. This book provides a competitive analysis for intra-regional foreign direct investment. Faizal Yahya demonstrates that the economic relationship between Singapore and India illuminates how both economies are attempting to meet future challenges. It will be of interest to scholars of international business studies, cross-cultural management, international trade, international relations, information management and South and Southeast Asian Studies.

50 Years Of Transportation In Singapore: Achievements And Challenges Tien Fang Fwa, 2016-07-22 This unique volume presents the achievements of the land, sea and air transport industry of Singapore in the last 50 years after

Singapore gained its independence in 1965. It provides a comprehensive overview of Singapore's progress in transportation from a typical third world system in the 1960s to one that is currently in the top league globally in all aspects of passenger and freight transportation. Singapore's successes in land transport planning, urban traffic management, and public transport systems provide valuable experience for major cities worldwide. The emergence of the Singapore Port as the most efficient container port in the world is another success story that inspires both established and up-and-coming port operators alike. The ambitious goal of Singapore to develop itself into a maritime knowledge hub of the future is a bold and exciting undertaking catching worldwide attention. In air transport, Singapore is well known for its efficiency as a major regional hub. This book examines in detail the important milestones and background developments that have led to the highly advanced state of transportation systems in the land, sea and air transport of Singapore today. Each chapter is written by professionals who are themselves part of the success stories presented. The chapter authors are specially invited to provide a professional account of the topics of their expertise. The authors have been able to draw on extensive amounts of published and unpublished documents and reports to present a comprehensive picture for the subject of interest in each chapter. As a whole, the book offers a holistic and informative professional reference book on the major happenings and achievements of Singapore in the transportation sector.

Therapy and Prevention of Atopic Dermatitis and Psoriasis Masutaka Furue ,Takeshi Nakahara,Gaku Tsuji,2020-12-10 Atopic dermatitis and psoriasis are common inflammatory skin diseases. The excellent therapeutic success of anti-IL-4/IL-13 biologics for atopic dermatitis and anti-TNF- α /IL-23/IL-17A biologics for psoriasis highlights the major pathogenic roles of these cytokines in the respective diseases. Although atopic dermatitis and psoriasis are distinct clinical entities, they share similar inflammatory processes, including increased Th17, Th22, and Th1 signatures. In addition to skin inflammation, both skin diseases exhibit a significant association with systemic diseases such as cardiovascular diseases, metabolic syndrome, and autoimmune diseases. In contrast to atopic dermatitis, males are more susceptible to psoriasis than females. Differential risk factors may be involved in the development and exacerbation in atopic dermatitis and psoriasis. In this issue, we will publish cutting-edge information regarding skin inflammation, clinical aspects, risk factors, microbiome, and therapeutics related to psoriatic and atopic inflammation.
