Susan Crawford

National Interim Primary Drinking Water Regulations United States. Environmental Protection Agency. Office of Water Supply, 1984

Fundamentals for the Academic Liaison Richard Moniz, Jo Henry, Joe Eshleman, 2014-03-21 A core resource for any LIS student or academic librarian serving as a liaison, this handbook lays out the comprehensive fundamentals of the discipline, helping librarians build the confidence and cooperation of the university faculty in relation to the library.

Captive Audience Susan Crawford, 2013-01-08 Ten years ago, the United States stood at the forefront of the Internet revolution. With some of the fastest speeds and lowest prices in the world for high-speed Internet access, the nation was poised to be the global leader in the new knowledge-based economy. Today that global competitive advantage has all but vanished because of a series of government decisions and resulting monopolies that have allowed dozens of countries, including Japan and South Korea, to pass us in both speed and price of broadband. This steady slide backward not only deprives consumers of vital services needed in a competitive employment and business market—it also threatens the economic future of the nation. This important book by leading telecommunications policy expert Susan Crawford explores why Americans are now paying much more but getting much less when it comes to high-speed Internet access. Using the 2011 merger between Comcast and NBC Universal as a lens, Crawford examines how we have created the biggest monopoly since the breakup of Standard Oil a century ago. In the clearest terms, this book explores how telecommunications monopolies have affected the daily lives of consumers and America's global economic standing.
