Make Time Jake Knapp, John Zeratsky, 2018-09-25 From the New York Times bestselling authors of *Sprint* comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (Insider, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. *Make Time* is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. *Make Time* isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., *Make Time* will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

Media Control Robert E. Gutsche, Jr.,2015-10-22 Media Control: News as an Institution of Power and Social Control challenges traditional (and even some radical) perceptions of how the news works. While it's clear that journalists don't operate objectively ? reporters don't just cover news, but they make it ? Media Control goes a step further by arguing that the cultural institution of news approaches and presents everyday information from particular and dominant cultural positions that benefit the power elite. From analysing how the press operate as police agents by conducting surveillance and instituting social order through its coverage of crime and police action to bolstering private business and neoliberal principles by covering the news through notions of boosterism, Media Control presents the news through a cultural lens. Robert E. Gutsche, Jr. introduces or advances readers' applications of critical race theory and cultural studies scholarship to explore cultural meanings within news coverage of police action, the criminal justice system, and embedding into the news democratic values that are later used by the power elite to oppress and repress portions of the citizenry. Media Control helps the reader explicate how the power elite use the press and the veil of the Fourth Estate to further white ideologies and American Imperialism.

The NOW Revolution Jay Baer,Amber Naslund,2011-02-08 The social web has changed the way we do business forever The future of your company is not in measured, considered responses and carefully planned initiatives. Business today is about near-instantaneous response. About doing the best you can with extremely limited information. About every customer being a reporter, and every reporter being a customer. About winning and losing customers in real-time, every second of every day. About a monumental increase in the findable commentary about our companies. Having the time and information required to make a considered business decision is a luxury - a luxury that's quickly facing extinction. Yet business hasn't adapted to this evolution. And adapt you must. This book isn't about how to do social media. Instead, The Now

Revolution outlines how you must retool your organization to make real-time business work for you rather than against you. Read about seven shifts that will help you make your company faster, smarter, and more social: Engineer a New Bedrock Find Talent You Can Trust Organize your Armies Answer the New Telephone Emphasize Response-Ability Build a Fire Extinguisher Make a Calculator The Now Revolution is pushing you to adapt the way you do business, from the inside out. Crisis Management in the Age of Social Media Louis Capozzi, 2013-07-02 Social media has fundamentally changed the contract between institutions and the public. Today, people expect a conversation, not a one-way diatribe. That, combined with the speed of the Internet, changes the game for many companies in anticipating, managing, and ultimately avoiding an “instant crisis”—an instant crisis example is when Verizon added a \$2 charge for all their customers; one hour later 100,000 signatures appeared on a Twitter petition, and soon Verizon was in the middle of a huge public relations crisis. Inside this book, you’ll learn just how to manage this type of situation and meet the challenges of social media. Each chapter includes a description of a crisis, the timeliness of a good response, the effectiveness of this response, and an assessment of what works and what doesn’t. Some examples of social media crises include Apple Computer, Netflix, JetBlue, Bank of America, Fed Ex, and public figures such as Anthony Weiner, Ashton Kutcher, and Jon Bon Jovi.

The Dawn of Everything David Graeber, David Wengrow, 2021-11-09 INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in

archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

The Bad News about the News Robert G. Kaiser, 2014-10-16 The digital revolution has forever changed American journalism, and not for the better. Robert Kaiser, former managing editor of The Washington Post, writes in his new Brookings Essay that the changing media landscape is not only a threat to traditional news, but to the future of democracy. A news industry without a viable business model, distracted by the need to attract eyeballs and discover new revenue streams, could lose the ability to provide the balanced, comprehensive, and investigative journalism that is the lifeblood of a healthy democracy. THE BROOKINGS ESSAY: In the spirit of its commitment to high-quality, independent research, the Brookings Institution has commissioned works on major topics of public policy by distinguished authors, including Brookings scholars. The Brookings Essay is a multi-platform product aimed to engage readers in open dialogue and debate. The views expressed, however, are solely those of the author. Available in ebook only.

Making News at The New York Times Nikki Usher, 2014-04-24 Making News at The New York Times is the first in-depth portrait of the nation's, if not the world's, premier newspaper in the digital age. It presents a lively chronicle of months spent in the newsroom observing daily conversations, meetings, and journalists at work. We see Page One meetings, articles developed for online and print from start to finish, the creation of ambitious multimedia projects, and the ethical dilemmas posed by social media in the newsroom. Here, the reality of creating news in a 24/7 instant information environment clashes with the storied history of print journalism, and the tensions present a dramatic portrait of news in the online world. This news ethnography brings to bear the overarching value clashes at play in a digital news world. The book argues that emergent news values are reordering the fundamental processes of news production. Immediacy, interactivity, and participation now play a role unlike any time before, creating clashes between old and new. These values emerge from the social practices, pressures, and norms at play inside the newsroom as journalists attempt to negotiate the new demands of their work. Immediacy forces journalists to work in a constant deadline environment, an ASAP world, but one where the vaunted traditions of yesterday's news still appear in the next day's print paper. Interactivity, inspired by the new user-computer directed capacities online and the immersive Web environment, brings new kinds of specialists into the newsroom, but exacts new demands upon the already taxed workflow of traditional journalists. And at time where social media presents the

opportunity for new kinds of engagement between the audience and media, business executives hope for branding opportunities while journalists fail to truly interact with their readers.

Magazine Journalism Tim Holmes, Liz Nice, 2011-11-10 For those of us who long ago experienced the magazine love-bite and have been battling the prejudice and scant attention shown this beautiful medium ever since, here at last is the book to set the record straight. - Nicholas Brett, Deputy Managing Director, BBC Magazines At a time when magazines are undergoing active redefinition, this book represents a welcome intervention. It engages with a host of pressing issues in a manner alert to professional priorities while, at the same time, encouraging new ways of thinking about the challenges shaping this fast-moving field. Holmes and Nice are trustworthy guides, taking the reader on what proves to be a fascinating journey. - Stuart Allan, Professor of Journalism, Bournemouth University Magazines are the most successful media format ever to have existed: so begins *Magazine Journalism* as it traces how magazines arose from their earliest beginnings in 1665 to become the ubiquitous format we know today. This book combats the assumptions among media academics as well as journalists that magazines somehow don't count, and presents a compelling assessment of the development and innovation at the heart of magazine publishing. In magazines we find some of the key debates in journalism, from the genesis of 'marketing to the reader' to feminist history, subcultures and tabloidization. Embedding these questions in a thoroughly historical framework, Holmes and Nice argue for an understanding of magazine journalism as essential in the media landscape. Moving beyond the semiotic and textual analysis so favoured by critics of the past, the authors complete the story with an exploration of the production and consumption of magazines. Drawing on interviews with more than 30 magazine journalists across the industry, what emerges is a story of resilience, innovation and a unique ability to embrace new markets and readerships. *Magazine Journalism* takes the reader to the heart of key questions in the past, present and future of journalism and is essential reading for students across journalism and the creative industries.

Routledge Handbook of Internet Politics Philip N. Howard, 2010 The politics of the internet has entered the social science mainstream. From debates about its impact on parties and election campaigns following momentous presidential contests in the United States, to concerns over international security, privacy and surveillance in the post-9/11, post-7/7 environment; from the rise of blogging as a threat to the traditional model of journalism, to controversies at the international level over how and if the internet should be governed by an entity such as the United Nations; from the new repertoires of collective action open to citizens, to the massive programs of public management reform taking place in the name of e-government, internet politics and policy are continually in the headlines. The *Routledge Handbook of Internet Politics* is a collection of over thirty chapters dealing with the most significant scholarly debates in this rapidly growing field of study.
