Puppet Animation in the Cinema Loyd Bruce Holman, 1975

Puppets, Gods, and Brands Teri J. Silvio, 2019-09-30 The early twenty-first century has seen an explosion of animation. Cartoon characters are everywhere—in cinema, television, and video games and as brand logos. There are new technological objects that seem to have lives of their own—from Facebook algorithms that suggest products for us to buy to robots that respond to human facial expressions. The ubiquity of animation is not a trivial side-effect of the development of digital technologies and the globalization of media markets. Rather, it points to a paradigm shift. In the last century, performance became a key term in academic and popular discourse: The idea that we construct identities through our gestures and speech proved extremely useful for thinking about many aspects of social life. The present volume proposes an anthropological concept of animation as a contrast and complement to performance: The idea that we construct social others by projecting parts of ourselves out into the world might prove useful for thinking about such topics as climate crisis, corporate branding, and social media. Like performance, animation can serve as a platform for comparisons of different cultures and historical eras. Teri Silvio presents an anthropology of animation through a detailed ethnographic account of how characters, objects, and abstract concepts are invested with lives, personalities, and powers—and how people interact with them—in contemporary Taiwan. The practices analyzed include the worship of wooden statues of Buddhist and Daoist deities and the recent craze for cute vinyl versions of these deities, as well as a wildly popular video fantasy series performed by puppets. She reveals that animation is, like performance, a concept that works differently in different contexts, and that animation practices are deeply informed by local traditions of thinking about the relationships between body and soul, spiritual power and the material world. The

case of Taiwan, where Chinese traditions merge with Japanese and American popular culture, uncovers alternatives to seeing animation as either an expression of animism or as “playing God.” Looking at the contemporary world through the lens of animation will help us rethink relationships between global and local, identity and otherness, human and non-human.

Puppet Animation David Johnson, 1984-01-01

Puppets and People Steven S. Wilson, 1980

Stop-motion Animation Barry JC Purves, 2014-10-23 Stop-motion Animation explores how all the elements of film-making - camera work, design, colour, lighting, editing, music and storytelling - come together in this unique art form. With tips and suggestions to help you get the most out of your films, and with examples from some of the masters of the craft, Barry Purves shows how to make the most of the movement, characters and stories that typify stop-motion. With dozens of beautiful new examples from around the world, this new edition includes a project in each chapter, with pointers on finding a story and characters, developing a script and storyboard, constructing puppets and dealing with the practicalities of film-making. These projects combine to lead you through the creation of your first one-minute stop-motion animation.

The Art of the Princess and the Frog Jeff Kurtti, 2016-05-31 This Fall, The Walt Disney Animation Studios returns to its timeless art form of hand-drawn animation. From the creative minds of directors John Musker and Ron Clements (The Little Mermaid and Aladdin) comes an American fairy tale and musical set in the heart of New Orleans during the Jazz Age. This unforgettable tale of love, enchantment, and discovery features Tiana, a young girl with big dreams who is working hard to achieve them amid the elegance and grandeur of the fabled French Quarter. The Art of The Princess and the Frog showcases the lush concept art of this sure-to-be-classic movie, including sketches,

character designs, lighting studies and storyboards, alongside inspiring quotes from the directors, producers, artists and designers, including veteran hand drawn animators that brought you many of Disney's most classic and unforgettable characters.

International Perspectives on Feminism and Sexism in the Film Industry Sar?, Gül?ah,Çetin,

Derya,2019-11-22 Gender studies has maintained its status as a heavily researched field. However, women and their role in cinema is a vastly understudied topic that deals with various aspects of feminism and sexism. The function of women in the film industry has evolved over time and proven to be an interesting area of research regarding the transition from sexual icons to respected professionals. Feminism is a widely researched subject, yet its specific application within cinema is an area that has yet to be studied. International Perspectives on Feminism and Sexism in the Film Industry is an essential reference source that examines the representation of women in cinema and provides a feminist approach to various aspects of the film industry including labor, production, and the cultural impact of women in motion pictures. Featuring research on topics such as violence against women, feminist film theory, and psychoanalysis, this book is ideally designed for directors, industry professionals, writers, screenwriters, activists, professors, students, administrators, and researchers in fields that include film studies, gender studies, mass media, and communications.

Pervasive Animation Suzanne Buchan,2013-08-22 This new addition to the AFI Film Readers series brings together original scholarship on animation in contemporary moving image culture, from classic experimental and independent shorts to digital animation and installation. The collection - that is also a philosophy of animation - foregrounds new critical perspectives on animation, connects them to historical and contemporary philosophical and theoretical contexts and production practice, and expands the existing canon. Throughout, contributors offer an interdisciplinary roadmap of new directions in film and animation studies, discussing animation in relationship to aesthetics, ideology, philosophy, historiography, visualization, genealogies, spectatorship, representation, technologies, and material culture.

Puppetry, Puppet Animation and the Digital Age Rolf Giesen, 2018-09-27 Rolf Giesen's Puppetry, Puppet Animation and the Digital Age explores the unique world of puppetry animation and its application in the digital age. With the advent of digital animation, many individuals see puppetry and 2D animation as being regulated to a niche market. Giesen's text argues against this viewpoint, by demonstrating the pure aesthetic value they have, as well as examples of some of the greatest cinematic uses of puppets. Such samples include, The Adventures of Prince Achmed, Ladislav Starevich, O'Brien, Harryhausen and Danforth, Trnka and Švankmajer, Aardman and Laika Studios, ParaNorman, and the Boxtrolls. Even live-action blockbusters, such as the Star Wars saga utilize puppetry for costume applications as noted within the text. The use of puppets not only helps create a wondrous world and memorable characters, but is also one of the purest extensions of an artist. Key Features Includes interviews with past and present practitioners of model animation as well as computer animation Reviews of classic and recent entries in both fields Comparison of what is better in stop motion versus computer animation A detailed history of animation and stop motion films

Theatre of Animation Marion Baraitser, 1999

Cinema of the Other Europe Dina Iordanova, 2003 Cinema of the Other Europe: The Industry and Artistry of East Central European Film is a comprehensive study of the cinematic traditions of Poland, Hungary, the Czech Republic and Slovakia from 1945 to the present day, exploring the major schools of filmmaking and the main stages of development across the region during the period of state socialism up until the end of the Cold War, as well as more recent transformations post-1989. In encouraging a more inclusive and comprehensive understanding of European cinema, much needed for the new unified Europe 'enlarged' towards its Eastern periphery, this book maps out the interactions, key concerns, thematic spheres and stylistic particularities that make the cinema of East Central Europe a vital part of European film tradition. Cinema of the Other Europe is thus a timely appraisal of Film Studies debates ranging from the representation of history and memory, the reassessment of political content, ethics and society, the rehabilitation of popular cinema, and the rethinking of national and regional cinemas in the context of globalisation.

Stop-Motion Armature Machining Tom Brierton, 2015-09-16 Stop-motion puppet animation is one of the most unusual and demanding art forms in the world. It uses a variety of skills, including design, sculpting, metal work, mold making and casting, taxidermy, filmmaking, storytelling and acting, and can be seen in the simplest commercial spots on television to more complex animated shorts and science fiction and fantasy feature films. This work, with over 200 photographs and illustrations, demonstrates the construction of armatures for film industry stop-motion puppets and the technical aspects of how to machine metal into the desired shape. It describes in detail the milling machine and the metal lathe, the two main tools used in constructing the armature, other cutting tools, and how the anatomical makeup of the puppet determines the armature design. The book then examines the six main types of joints used in armature construction: the sandwich plate ball-and-

socket joint, the ball-and-socket collet joint, the step-block ball-and-socket joint, the swivel joint, the hinge joint, and the universal joint. Also described are the different types of metals used in armature construction.

The Kwagh-hir Theater Iyorwuese Hagher, 2013-11-14 This book describes how the Tiv people of Nigeria use their indigenous theater to fight against British colonialism and oppression by dominant groups in Nigeria. It celebrates the power of the theater to give voice to the voiceless and to become a catalyst for positive change.

Shadow of a Mouse Donald Crafton, 2012-11-05 “Donald Crafton, our lively guide, shows us around a Tooniverse populated by performers, not just images, who engage us in all the ways their flesh-and-blood counterparts do, and then some. Taking classical animation as his terrain, Crafton nevertheless pushes ongoing discussions of performance, liveness, and corporeality in the directions in which they need to go if they are to help us describe and navigate our increasingly virtual worlds.” Philip Auslander, author of *Liveness: Performance in a Mediatized Culture* Every once in a while a book comes along that marks a transformational point in its discipline. Such a book is Donald Crafton's *Shadow of a Mouse*. Crafton skillfully draws together theoretical sources, animation history, technological development, and social analysis, deftly weaving together thinkers from Disney to Deleuze and Sito to Stanislavsky. The result is a substantial rethinking of animation that will reshape traditional approaches to the medium. Crafton's magisterial grasp of theory and history is livened by a true fan's passion for the subject and a keen sense of humor. *Shadow of a Mouse* is a must-read for anyone with an interest in performance, embodiment, popular culture, race, or reception. Mark Langer, Associate Professor of Film Studies, Carleton University

Aardman Animations Annabelle Honess Roe, 2020-02-06 The Bristol-based animation company

Aardman is best known for its most famous creations Wallace and Gromit and Shaun the Sheep. But despite the quintessentially British aesthetic and tone of its movies, this very British studio continues to enjoy international box office success with movies such as Shaun the Sheep Movie, Flushed Away and Wallace and Gromit: Curse of the Were-Rabbit. Aardman has always been closely linked with one of its key animators, Nick Park, and its stop motion, Plasticine-modelled family films, but it has more recently begun to experiment with modern digital filmmaking effects that either emulate 'Claymation' methods or form a hybrid animation style. This unique volume brings together leading film and animation scholars with children's media/animation professionals to explore the production practices behind Aardman's creativity, its history from its early shorts to contemporary hits, how its films fit within traditions of British animation, social realism and fantasy cinema, the key personalities who have formed its ethos, its representations of 'British-ness' on screen and the implications of traditional animation methods in a digital era.

Puppetry in Theater George Capaccio, 2017-12-15 The creation and manipulation of puppets for a play is a fine art. Perhaps the most famous puppets today are the Muppets, but the use of puppets has a long history in entertainment. Readers learn some of the finer points in how to make and move these wonderful creations.

Dream Worlds: Production Design for Animation Hans Bacher, 2012-11-12 A truly unique visual delight offering insight into the development of animation classics like Bambi, Beauty and the Beast, The Lion King, Lilo and Stitch as well as a tantalizing examination of unfinished Disney projects.
