Transient Light Ian Cameron,2014-03-17 Although aimed at keen amateur photographers who wish to break into the professional market, the superb images and technical expertise offer something for all levels of skill and will also inspire those just becoming interested in photography and more established photographers who need to re-focus their photographic motivation. The book's primary goal is to draw the attention of readers to the absolute importance of light and how to make the best use of it, with an emphasis on being in the right place at the right time, anticipating fine light and ensuring that for the short duration that those qualities are present, they are successfully recorded to film or pixel. However, composition and technical expertise are also vitally important and Ian outlines the best field techniques for choosing the correct exposure, discusses depth of field, hyper-focal focusing, exposure bracketing and the use of appropriate filters.

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert,Erma Hermens,Marja Peek,1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled Historical Painting Techniques, Materials, and Studio Practice at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.
