### Free Will and Human Agency: 50 Puzzles, Paradoxes, and Thought Experiments

Garrett Pendergraft, 2022-07-21 In this new kind of entrée to contemporary discussions of free will and human agency, Garrett Pendergraft collects and illuminates 50 of the most relevant puzzles, paradoxes, and thought experiments. Assuming no familiarity with the philosophical literature on free will, each chapter describes a case, explains the questions that it raises, briefly summarizes some of the key responses to the case, and provides a list of suggested readings. Every chapter is accessible, succinct, and self-contained. The puzzles are divided into five broad categories: the threat from fatalism, the threat from determinism, practical reason, social dimensions, and moral luck. Entries cover topics such as the grandfather paradox, theological fatalism, the consequence argument, manipulation arguments, luck arguments, weakness of will, action explanation, addiction, blame and punishment, situationism in moral psychology, and Huckleberry Finn. Free Will and Human Agency is an effective and engaging teaching tool as well as a handy resource for anyone interested in exploring the questions that have made human agency a topic of perennial philosophical interest. Key Features: Though concise overall, offers broad coverage of the key areas of free will and human agency. Describes each imaginative case directly and in a memorable way, making the cases accessible and easy to remember. Provides a list of suggested readings for each case.

**Surfing through Hyperspace** Clifford A. Pickover, 2001-05-17 Do a little armchair time-travel, rub elbows with a four-dimensional intelligent life form, or stretch your mind to the furthest corner of an uncharted universe. With this astonishing guidebook, *Surfing Through Hyperspace*, you need not be a mathematician or an astrophysicist to explore the all-but-unfathomable concepts of hyperspace and higher-dimensional geometry. No subject in mathematics has intrigued both children and adults as much as the idea of a fourth dimension. Philosophers and parapsychologists have meditated on this mysterious space that no one can point to but may be all around us. Yet this extra dimension has a very real, practical value to mathematicians and physicists who use it every day in their calculations. In the tradition of *Flatland*, and with an infectious enthusiasm, Clifford Pickover tackles the problems inherent in our 3-D brains trying to visualize a 4-D world, muses on the religious implications of the existence of higher-dimensional consciousness, and urges all curious readers to venture into the unexplored territory lying beyond the prison of the obvious. Pickover alternates sections that explain the science of hyperspace with sections that dramatize mind-expanding concepts through a fictional dialogue between two futuristic FBI agents who dabble in the fourth dimension as a matter of national security. This highly accessible and entertaining approach turns an intimidating subject into a scientific game open to all dreamers. *Surfing Through Hyperspace* concludes with a number of puzzles, computer experiments and formulas for further exploration, inviting readers to extend their minds across this inexhaustibly intriguing scientific terrain.

**Surfing with Sartre** Aaron James,2017-08-08 From the bestselling author of Assholes: A Theory, a book that—in the tradition of Shopclass as Soulcraft, Barbarian Days and Zen and the Art of Motorcycle Maintenance—uses the experience and the ethos of surfing to explore key concepts in philosophy. The existentialist philosopher Jean-Paul Sartre once declared the ideal limit of aquatic sports . . . is waterskiing. The avid surfer and lavishly credentialed academic philosopher Aaron James vigorously disagrees, and in Surfing with Sartre he intends to expound the thinking surfer's view of the matter, in the process elucidating such philosophical categories as freedom, being, phenomenology, morality, epistemology, and even the emerging values of what he terms leisure capitalism. In developing his unique surfer-philosophical worldview, he draws from his own experience of surfing and from surf culture and lingo, and includes many relevant details from the lives of the philosophers, from Aristotle to Wittgenstein, with whose thought he engages. In the process, he'll speak to readers in search of personal and social meaning in our current anxious moment, by way of doing real, authentic philosophy.

In every situation we encounter, that complex prediction machinery is already buzzing, proactively trying to anticipate the sensory barrage.
