**Raymond M. Smullyan, Martin Gardner, Greer Fitting**

*Mathematical Puzzle Tales* Martin Gardner, 2020-04-06 Martin Gardner is widely known for his writing on recreational mathematics, not least for the myriad problems he has devised over some 25 years for Scientific American. In this book are 36 of his best brain teasers. These are not simply cunning puzzles, but serve to illustrate the art of the mathematician as problem solver, and their solution draws on ideas from topology, probability, number theory, logic and beyond. Fully worked answers are given, which, in turn, lead to additional problems for the reader. For anybody who likes to solve mathematical problems, this book will be both entertaining and a challenge.

*Science Fiction Puzzle Tales* Martin Gardner, 1981 Thirty-six science fiction stories contain brain-teasing puzzles for the reader to solve.

*Riddles of the Sphinx* Martin Gardner, 1987 Solving these riddles is not simply a matter of logic and calculation, though these play a role. Luck and inspiration are factors as well, so beginners and experts alike may profitably exercise their wits on Gardner's problems, whose subjects range from geometry to word play to questions relating to physics and geology. We guarantee that you will solve some of these riddles, be stumped by others, and be amused by almost all of the stories and settings that Gardner has devised to raise these questions. --Back cover.
