Toward a Ludic Architecture Steffen P. Walz,2010 “Toward a Ludic Architecture” is a pioneering publication, architecturally framing play and games as human practices in and of space. Filling the gap in literature, Steffen P. Walz considers game design theory and practice alongside architectural theory and practice, asking: how are play and games architected? What kind of architecture do they produce and in what way does architecture program play and games? What kind of architecture could be produced by playing and gameplaying?

Panic Free Tom Bunn,2019-04-30 “HURRY, BUY THE BOOK AND TRANSFORM YOUR LIFE.” – Marla Friedman, PsyD, PC, board chairman, Badge of Life What if you could stop panic by tapping into a different part of your brain? After years of working to help sufferers of panic and anxiety, licensed therapist (and pilot) Tom Bunn discovered a highly effective solution that utilizes a part of the brain not affected by the stress hormones that bombard a person experiencing panic. This “unconscious procedural memory” can be programmed to control panic by preventing the release of stress hormones and activating the parasympathetic nervous system. This process, outlined in Panic Free, sounds complicated but is not, requiring just ten days and no drugs or doctors. Bunn includes specific instructions for dealing with common panic triggers, such as airplane travel, bridges, MRIs, and tunnels. Because panic is profoundly life-limiting, the program Bunn offers can be a real life-changer.

Tortured Cardboard Philip E. Orbanes,2019-07-23 The term “tortured cardboard” sums up what happens to cardboard when making a board game (bound, cut, folded, punched). And, as you’ll learn, great board games often reflect whatever “tortures” culture. Each gained immortality after a chaotic beginning and a chance survival. Why? Because—be it chess, backgammon, Clue®, Monopoly®, Scrabble®, Settlers of Catan®, or one of ten others featured in this book—each is replete with “lessons” applicable to achievement in your life. As the twenty-first century gathers momentum, our love affair with board games continues to strengthen. They involve us, they refine social skills, and they teach great lessons applicable in real life. “Tortuous” is the journey of every great board game, from birth in chaotic times, through survival by mere chance, to raging popularity and eventual immortality. Tortured Cardboard reveals how the great ones came to endure and—all fun aside—how each teaches us something about our own behavior while providing “rules” that can work in your life.

Home Front Posters Susannah Walker, 2012-07-24 From Coughs and Sneezes Spread Diseases to Keep Calm and Carry On, the Home Front posters from the Second World War have become part of British culture. Some were design classics, others more prosaic, but together they give a fascinating insight into the trials and tribulations of living through World War Two. This was the first total war, with civilians as essential to the war effort as soldiers. So posters instructed people on everything from cooking and salvage to how to speak, and even think, about the war. This book tells the story behind these posters: how they were designed and produced, what they wanted to achieve, and what the British public really thought of them. Looking at famous images and forgotten gems, it is essential reading for anyone interested in both life on the Home Front and the design of the times.

Rise Above Greg Little, 2011-09-01 Rise Above is a detailed description of one man's journey of conquering adversity. You will read how the writer survived a near-fatal motor vehicle accident, which resulted in three skull

fractures, a bruised brain, an eight-day coma and having to relearn how to walk and talk - made all the more challenging by a lingering speech impediment acquired in childhood. Stuttering is an awful burden for a person to carry throughout life. Children can be cruel. The writer's utmost fear, speaking in public, would one day be an ally and allow him to present programs extensively throughout the United States. This book is not about surviving adversity. It's about thriving beyond adversity. Greg Little, a nationally renowned speaker and motivator, has presented to diverse groups, including health care, business and professional organizations, and educational institutions. His programs emphasize active involvement by participants. Whether teaching professionals to cope with stress, bond as a productive group or realize their hidden strengths, his seminars and keynote addresses are hard hitting and memorable. During one of Greg's presentations, I was laughing so hard that tears were literally streaming down my face. - Dr. Ed Kesgen; Sylva, NC One of the most energized, creative and innovate presentations I have ever experienced.- Jim Brennan, National Consultant; Wilbraham, MA Dr. Greg Little is superb speaker. This is an excellent investment in continuing education - Nancy DeBolt; Torrington, WY

Entropic Empire Lieven de Cauter, 2012 What with global warming, the war on terror, extreme political polarization, an unstoppable demographic explosion and migration, anarchy and chaos are becoming parts of our world system in hitherto unprecedented ways. What to call the planetary state of emergency we are now entering--a New World Disorder, perhaps, or Entropic Empire? In his latest book, the Dutch philosopher, art historian, writer and activist Lieven De Cauter suggests that an entropic empire is created by opposing forces or philosophical poles: the state of exception (tyranny) and the state of nature (anarchy). **Entropic Empire: Considerations on the Planetary State of Emergency** is part post-historical sci-fi scenario and part philosophical consideration on the eternal return of prehistory (the state of nature). For De Cauter, the simple but troubling question is: are we falling out of history?
