The Logical Must Penelope Maddy,2014-08-01 The Logical Must is an examination of Ludwig Wittgenstein's philosophy of logic, early and late, undertaken from an austere naturalistic perspective Penelope Maddy has called Second Philosophy. The Second Philosopher is a humble but tireless inquirer who begins her investigation of the world with ordinary perceptual beliefs, moves from there to empirical generalizations, then to deliberate experimentation, and eventually to theory formation and confirmation. She takes this same approach to logical truth, locating its ground in simple worldly structures and our knowledge of it in our basic cognitive machinery, tuned by evolutionary pressures to detect those structures where they occur. In his early work Tractatus Logico-Philosophicus, Wittgenstein also links the

logical structure of representation with the structure of the world, but he includes one key unnaturalistic assumption: that the sense of our representations must be given prior to-independently of-facts about how the world is. When that assumption is removed, the general outlines of the resulting position come surprisingly close to the Second Philosopher's roughly empirical account. In his later discussions of logic in *Philosophical Investigations* and *Remarks on the Foundations of Mathematics*, Wittgenstein also rejects this earlier assumption in favor of a picture that arises in the wake of the famous rule-following considerations. Here Wittgenstein and the Second Philosopher operate in even closer harmony-locating the ground of our logical practices in our interests, our natural inclinations and abilities, and very general features of the world-until the Second Philosopher moves to fill in the account with her empirical investigations of the world and cognition. At this point, Wittgenstein balks, but as a matter of personal animosity rather than philosophical principle.

Omniscience and Religious Authority Shinya Moriyama,2014 During the Middle Ages, the relationship between the Buddha's omniscience and his religious authority was a major issue in Buddhist thought. One of the most extensive and sophisticated discussions on this topic is found in the *Pramanavarttikalankarabhasya*, the magnum opus of the 8th-century Buddhist master Prajnakaragupta. In this study, author Shinya Moriyama combines philological acumen with philosophical analysis to present Prajnakaragupta's innovative ideas, offering an important introduction to his religious thought in its historical context of post-Dharmakirtian Buddhist Ēpistemology. Verb Second Horst Lohnstein,Antonios Tsiknakis,2020-03-09 This book addresses a general phenomenon in the European languages: verb second. The articles provide a comprehensive survey of synchronic vs. diachronic developments in the Germanic and Romance languages. New theoretical insights into the interaction of the properties of verbal mood and syntactic structure building lead to hypotheses about the mutual influence of these systems. The diachronic change in the syntax together with changes in the inflectional system show the interdependence between the syntactic and the inflectional component. The fact that the subjunctive can license verb second in dependent clauses reveals further dependencies between these subsystems of grammar. Fronting finiteness furthermore constitutes an instance of a main clause phenomenon. Whether assertion or at-issueness are encoded through this grammatical process will be a matter in the debates discussed in the book. Moreover, information structure appears to be directly related to the fronting of other constituents in front of the finite verb. Questions concerning the interrelations between these various subcomponents of the grammatical system are investigated.

Going There Richard J. Powell,2020-10-02 A kaleidoscopic survey of black satire in 20th- and 21st-century American art In this groundbreaking study,

Richard J. Powell investigates the visual forms of satire produced by black artists in 20th- and 21st-century America. Underscoring the historical use of visual satire as antiracist dissent and introspective critique, Powell argues that it has a distinctly African American lineage. Taking on some of the most controversial works of the past century—in all their complexity, humor, and provocation—Powell raises important questions about the social power of art. Expansive in both historical reach and breadth of media presented, *Going There* interweaves discussions of such works as the midcentury cartoons of Ollie Harrington, the installations of Kara Walker, the paintings of Robert Colescott, and the movies of Spike Lee. Other artists featured in the book include David Hammons, Arthur Jafa, Beverly McIver, Howardena Pindell, Betye Saar, and Carrie Mae Weems. Thoroughly researched and rich in context, *Going There* is essential reading in the history of satire, racial politics, and contemporary art.
