

Pyramid Antidote Quest

Michael Gorman

Pyramid Quest Robert M. Schoch, Robert Aquinas McNally, 2005-06-02 The Egyptologist acclaimed for re-dating the Great Sphinx at Giza sets his sights on one of the true mysteries of antiquity: the Great Pyramid of Giza. What is the Great Pyramid of Giza? Ask that basic question of a traditional Egyptologist, and you get the basic, traditional answer: a fancy tombstone for a self-important pharaoh of the Old Kingdom. This, Egyptologists argue, is the sole finding based on the data, and the only deduction supported by science. By implication, anyone who dissents from this point of view is unscientific and woolly-minded-a believer in magic and ghosts. Indeed, some of the unconventional ideas about the Great Pyramid do have a spectacularly fabulous ring to them. Yet from beneath the obvious terms of this controversy, a deeper, more significant question arises: how is it that the Great Pyramid exercises such a gripping hold on the human psyche- adding cryptic grace to the back of the one-dollar bill and framing myriad claims of New Age pyramid power? In *Pyramid Quest*, Robert M. Schoch and Robert Aquinas McNally use the rigorous intellectual analysis of scientific inquiry to investigate what we know about the Great Pyramid, and develop a stunning hypothesis: This ancient monument is the strongest proof yet that civilization began thousands of years earlier than is generally thought, extending far back into a little-known time. In tracing that story, we come to understand not only the Great Pyramid but also our own origins as civilized beings.

K2, Quest of the Gods Ralf Ellis, *** The Great Pyramid in the Himalaya *** In 'Thoth, Architect of the Universe' Ralf discovered evidence for megalithic maps. But if these megalithic maps are to be of any use in a quest for the mythical Hall of Records, then they need to be a little more detailed than a simple representation of continents. Luckily, the shaft angles inside the Great Pyramid can refine these maps down to just a few tens of meters. And so Ralf embarked on a long trek into the high Himalaya, to see what lay at the heart of the Giza map. Strangely enough, what he found there was a giant snow-white pyramid, aligned with the cardinal points, with a causeway aligned at 14° from its base - exactly the same as the Great Pyramid itself. Sequel to *Thoth, Architect of the Universe*. v3.6

The Xanth Novels Books 38–40 Piers Anthony,2017-06-13 Three installments of the New York Times–bestselling series set in a land of enchantment filled with magic, surprises, adventure, and—best of all—puns! The world of Xanth is a wacky one full of offbeat heroes and surprising journeys. In these three volumes of this hilarious series, characters bumble their way through many misadventures to find their happy ending on the other side, aided and hindered by puns along the way. Board Stiff: Thanks to a mental typo and an ornery wishing well the once beautiful Irrelevant Kandy is now a board of wood—with mind control powers. And Ease wishes everything wasn't so easy. Fortunately, Humfrey the Good Magician is there to provide them with a quest: saving the puns of Xanth. But who released a virus that could destroy Xanth's essence, and will Kandy and Ease figure out how to stop it in time? Five Portraits: Astrid Basilisk is a sweet girl whose very glance is deadly. As she embarks on a selfless mission to save five difficult children from future Xanth, she must fight the pun virus that threatens to destroy the magical world. Isis Orb: Hapless has the ability to conjure any musical instrument he wants, but he can't carry a tune in a bucket. All he wants is to learn to play an instrument and get a girlfriend. When the

Good Magician hears about his desperate desire, he sends Hapless on a quest to find the elusive Isis Orb, a magical talisman that could fulfill his wish. But the mysterious Egyptian goddess guarding it isn't going to let him simply take it.

Quest for Eternal Sunshine Mendek Rubin, Myra Goodman, 2020-04-14 Quest for Eternal Sunshine chronicles the triumphant, true story of Mendek Rubin, a brilliant inventor who overcame both the trauma of the Holocaust and decades of unrelenting depression to live a life of deep peace and boundless joy. Born into a Hassidic Jewish family in Poland in 1924, Mendek grew up surrounded by extreme anti-Semitism. Armed with an ingenious mind, he survived three horrific years in Nazi slave-labor concentration camps while virtually his entire family was murdered in Auschwitz. After arriving in America in 1946—despite having no money or professional skills—his inventions helped revolutionize both the jewelry and packaged-salad industries. Remarkably, Mendek also applied his ingenuity to his own psyche, developing innovative ways to heal his heart and end his emotional suffering. After Mendek died in 2012, his daughter, Myra Goodman, found an unfinished manuscript in which he'd revealed the intimate details of his healing journey. Quest for Eternal Sunshine—the extraordinary result of a posthumous father-daughter collaboration—tells Mendek's whole story and is filled with eye-opening revelations, effective self-healing techniques, and profound wisdom that have the power to transform the way we live our lives. An inspirational biography of a Holocaust survivor overcoming depression and PTSD. An essential new addition to Jewish Holocaust history.

The Zero Marginal Cost Society Jeremy Rifkin, 2014-04-01 In The Zero Marginal Cost Society, New York Times bestselling author Jeremy Rifkin describes how the emerging Internet of Things is speeding us to an era of nearly free goods and services, precipitating the meteoric rise of a global Collaborative Commons and the eclipse of capitalism. Rifkin uncovers a paradox at the heart of capitalism that has propelled it to greatness but is now taking it to its death—the inherent entrepreneurial dynamism of competitive markets that drives productivity up and marginal costs down, enabling businesses to reduce the price of their goods and services in order to win over consumers and market share. (Marginal cost is the cost of producing additional units of a good or service, if fixed costs are not counted.) While economists have always welcomed a reduction in marginal cost, they never anticipated the possibility of a technological revolution that might bring marginal costs to near zero, making goods and services priceless, nearly free, and abundant, and no longer subject to market forces. Now, a formidable new technology infrastructure—the Internet of things (IoT)—is emerging with the potential of pushing large segments of economic life to near zero marginal cost in the years ahead. Rifkin describes how the Communication Internet is

converging with a nascent Energy Internet and Logistics Internet to create a new technology platform that connects everything and everyone. Billions of sensors are being attached to natural resources, production lines, the electricity grid, logistics networks, recycling flows, and implanted in homes, offices, stores, vehicles, and even human beings, feeding Big Data into an IoT global neural network. Prosumers can connect to the network and use Big Data, analytics, and algorithms to accelerate efficiency, dramatically increase productivity, and lower the marginal cost of producing and sharing a wide range of products and services to near zero, just like they now do with information goods. The plummeting of marginal costs is spawning a hybrid economy—part capitalist market and part Collaborative Commons—with far reaching implications for society, according to Rifkin. Hundreds of millions of people are already transferring parts of their economic lives to the global Collaborative Commons. Prosumers are plugging into the fledgling IoT and making and sharing their own information, entertainment, green energy, and 3D-printed products at near zero marginal cost. They are also sharing cars, homes, clothes and other items via social media sites, rentals, redistribution clubs, and cooperatives at low or near zero marginal cost. Students are enrolling in free massive open online courses (MOOCs) that operate at near zero marginal cost. Social entrepreneurs are even bypassing the banking establishment and using crowdfunding to finance startup businesses as well as creating alternative currencies in the fledgling sharing economy. In this new world, social capital is as important as financial capital, access trumps ownership, sustainability supersedes consumerism, cooperation ousts competition, and exchange value in the capitalist marketplace is increasingly replaced by sharable value on the Collaborative Commons. Rifkin concludes that capitalism will remain with us, albeit in an increasingly streamlined role, primarily as an aggregator of network services and solutions, allowing it to flourish as a powerful niche player in the coming era. We are, however, says Rifkin, entering a world beyond markets where we are learning how to live together in an increasingly interdependent global Collaborative Commons.

The Billion-Dollar Molecule Barry Werth, 2013-08-20 Join journalist Barry Werth as he pulls back the curtain on Vertex, a start-up pharmaceutical company, and witness firsthand the intense drama being played out in the pioneering and hugely profitable field of drug research. Founded by Joshua Boger, a dynamic Harvard- and Merck-trained scientific whiz kid, Vertex is dedicated to designing -- atom by atom -- both a new life-saving immunosuppressant drug, and a drug to combat the virus that causes AIDS. You will be hooked from start to finish, as you go from the labs, where obsessive, fiercely competitive scientists struggle for a breakthrough, to Wall Street, where the wheeling and dealing takes on a life of its own, as Boger

courts investors and finally decides to take Vertex public. Here is a fascinating no-holds-barred account of the business of science, which includes an updated epilogue about the most recent developments in the quest for a drug to cure AIDS.

The Celestial Tradition Demetres P. Tryphonopoulos, 2010-10-30 Despite the painstaking work of Pound scholars, the mythos of *The Cantos* has yet to be properly understood – primarily because until now its occult sources have not been examined sufficiently. Drawing upon archival as well as recently published material, this study traces Pound's intimate engagement with specific occultists (W.B. Yeats, Allen Upward, Alfred Orage, and G.R.S. Mead) and their ideas. The author argues that speculative occultism was a major factor in the evolution of Pound's extraordinary aesthetic and religious sensibility, much noticed in Pound criticism. The discussion falls into two sections. The first section details Pound's interest in particular occult movements. It describes the tradition of Hellenistic occultism from Eleusis to the present, and establishes that Pound's contact with the occult began at least as early as his undergraduate years and that he came to London already primed on the occult. Many of his London acquaintances were unquestionably occultists. The second section outlines a tripartite schema for *The Cantos* (katabasis/dromena/epopteia) which, in turn, is applied to the poem. It is argued here that *The Cantos* is structured on the model of a initiation rather than a journey, and that the poem does not so much describe an initiation rite as enact one for the reader. In exploring and attempting to understand Pounds' occultism and its implications to his [Pounds'] oeuvre, Tryphonopoulos sheds new light upon one of the great works of modern Western literature.

The Five Greatest Warriors Matthew Reilly, 2010-12-28 Jack West, Jr., leads a team of loyal followers during an Armageddon-risking adventure that takes them from the deserts of Israel and storm-swept coastal Japan to the steppes of Mongolia and a mysterious island.

Those Forgotten People ANIRUDDHA ROY CHOUDHURY, 2019-01-04 Year 2013! He was educated and was a believer in everything that had a scientifically proven explanation. Sudhir, after constant failures on his part which led to an unwanted divorce, was thrust by a strange twist of faith on an isolated island. He gained unfathomable power, which had no scientific explanation. He was not a politician, and yet, he was forced to pit his mind against a globally powerful nation, and that nation was guided by a man whose magical powers far exceeded that of his own. His school curriculum

never taught him to fight with a sword, nor travel time. Yet, here he was, travelling back in time to unravel a mystery that harassed a royal family. Here he was again, somehow managing to ward off ruthless, bloodthirsty, sword-wielding pirates with his own clumsily held sword! To protect himself from dying? Obviously, yes! But, also to protect the fabulous wealth of gold, silver, rubies, diamonds and so much more that were lost in the seven ships around the year 1782.

Rimbaud in Abyssinia Alain Borer,1991 The author's journey to uncover the mystery behind the disappearance of poet Arthur Rimbaud in Africa.

Reverse Symbolism Dictionary Steven Olderr,2022-09-28 The only dictionary of its kind, this greatly expanded second edition lists objects, concepts, traits and situations ancient and modern and gives their appropriate symbols. A companion to *Symbolism: A Comprehensive Dictionary* (2012), this volume presents symbols and their referents in reverse association (but is not simply a reconfiguring of information). Examples: a symbol for hell is descending stairs; an attribute of Saint Benedict is a raven; joy after sorrow is signified by the gemstone amber. Ethnic, literary, artistic, religious, heraldic, numerological, folkloric, occult and psychological usages are included.

The Enduring Library Michael Gorman,2003-01-23 In this work, one of the library world's thinkers discusses the transformative effect that communications technology has had on information delivery from past to present to future. By tracing these transformations, Michael Gorman writes a roadmap for achieving balance between the tradition of library service and ever-changing technology.

Regulating Aged Care John Braithwaite,Toni Makkai,Valerie A. Braithwaite,2007-01-01 'Regulating Aged Care is a significant achievement and addresses areas of personal caring which do not usually receive attention. [It] is an important book which draws attention to the central problems of providing care for large numbers of vulnerable people. . . [it] should be required reading on undergraduate and postgraduate courses relating to applied social science, health and medical sociology.' Alison M. Ball, *Sociology* 'This book provides an impressive evidence base for both theory development and reassessment of policy and practitioner responses in the field.' *International Social Security Review* 'They have given us a fascinating case study here, rich in detail, and masterfully interpreted against the backdrop of evolving regulatory strategy. It is rare indeed to find this depth of analysis made accessible, laced throughout with humanity, compassion, and humor.' Malcolm Sparrow, Harvard University, US 'This book offers an intelligent and insightful account of the development of nursing home regulation in three countries England, the USA and Australia. But, more than that, it intertwines

theory and more than a decade of empirical work to provide a telling and sophisticated explanation of why and how good regulatory intentions often go awry, and what can be done to create systems of regulation which really work to produce improvement.' Kieran Walshe, University of Manchester, UK

This book is a major contribution to regulatory theory from three members of the world-class regulatory research group based in Australia. It marks a new development in responsive regulatory theory in which a strengths-based pyramid complements the regulatory pyramid. The authors compare the accomplishments of nursing home regulation in the US, the UK and Australia during the last 20 years and in a longer historical perspective. They find that gaming and ritualism, rather than defiance of regulators, are the greatest challenges for improving safety and quality of life for the elderly in care homes. *Regulating Aged Care* shows how good regulation and caring professionalism can transcend ritualism. Better regulation is found to be as much about encouragement to expand strengths as incentives to fix problems. The book is underpinned by one of the most ambitious, sustained qualitative and quantitative data collections in both the regulatory literature and the aged care literature. This study provides an impressive evidence base for both theory development and reassessment of policy and practitioner responses in the field. The book will find its readership amongst regulatory scholars in political science, law, socio-legal studies, sociology, economics and public policy. Gerontology and health care scholars and professionals will also find much to reflect upon in the book.
