Mobile Telecommunications in a High-Speed World Mr Peter Curwen, Professor Jason Whalley, 2012-08-28 Mobile Telecommunications in a High Speed World tells the story of 3G and higher-speed mobile communication technologies. Over ten years have passed since the first third-generation (3G) licences were awarded following debates about the merits of auctions versus 'beauty contests' then, nothing much happened. More licences were issued, a few roll-outs commenced and everyone began to think it had all been a horribly expensive mistake. That may still turn out to be the case, but in the meantime there have been massive developments in terms of the number of licences and launches worldwide, in the range of services that can be accessed, in the range of devices that can be used to access them, in operator strategies etc. Even the technology has improved considerably with 4G now under discussion. Much of this story has been chronicled, largely on the Internet, but the information is in tens of thousands of bits and pieces and a large part of it is either misleading or just plain wrong. Here, Peter Curwen and Jason Whalley introduce the outcomes of research that has involved the compilation of a unique database which details every licence and launch worldwide involving 3G. The authors discuss the structure of the industry and the strategic behaviour of operators, as well as the social consequences of the spread of 3G. They examine the role of new entry upon competition, and present analysis of the main operators involved, the development of handsets and especially smartphones. A number of country case studies are included. This comprehensive and up-to-date volume includes a number of country studies and is written by two of the world's foremost researchers on this industry. Mobile Telecommunications in a High Speed World will serve the needs of students, academics and those involved, or contemplating involvement, with the telecoms industry. Why pay thousands of dollars to consultancies to separate the wheat from the chaff with respect to 3G when you can read this book.

Fundamentos de los sistemas de implementación de protección social Kathy Lindert,Tina George Karippacheril,Inés Rodríguez Caillava,Kenichi Nishikawa Chávez,2023-01-13 Fundamentos de los sistemas de implementación de protección social: Libro de referencia sintetiza las experiencias reales y las lecciones aprendidas de la aplicación de estos sistemas en todo el mundo mostrando una perspectiva amplia de la protección social sobre diversas poblaciones objetivo, como familias pobres o de bajos ingresos, trabajadores en situación de desempleo, personas en condición de discapacidad y personas en situación de riesgo social. El libro analiza diferentes tipos de intervenciones de los gobiernos para ayudar a las personas, familias u hogares mediante programas categóricos, programas contra la pobreza, programas y servicios laborales, prestaciones y servicios por discapacidad, y servicios sociales. El libro de

referencia aborda preguntas concretas sobre procedimientos, el «cómo», entre las que se encuentran: ¿Cómo distribuyen los países los beneficios y servicios sociales? ¿Cómo logran hacerlo de forma eficaz y eficiente? ¿Cómo garantizan la inclusión dinámica, sobre todo para las personas más vulnerables y necesitadas? ¿Cómo promueven una mejor coordinación e integración, no sólo entre los programas de protección social, sino también entre programas de otros sectores del gobierno? ¿Cómo pueden responder a las necesidades de sus poblaciones objetivo y proporcionar una mejor experiencia al cliente? El marco de sistemas de implementación profundiza en los elementos clave de ese entorno operativo. Dicho marco se basa en fases esenciales a lo largo de la cadena de implementación. Los actores principales, como las personas y las instituciones, interactúan a lo largo de esta cadena a través de las comunicaciones, los sistemas de información y la tecnología. Este marco se puede aplicar a la implementación de uno o varios programas y a la implementación de la protección social adaptativa. El libro de referencia se estructura en torno a ocho principios que encuadran el concepto de los sistemas de implementación: 1. No hay un modelo único para los sistemas de implementación, pero existen puntos en común que constituyen el núcleo del marco de los sistemas de implementación. 2. La calidad de la implementación es importante: Las debilidades en alguno de los elementos principales afectarán negativamente a todo el sistema, lo que, a su vez, reducirá el impacto de los programas a los que dan apoyo. 3. Los sistemas de implementación evolucionan a lo largo del tiempo de forma no lineal, y los puntos de partida son fundamentales. 4. Es necesario buscar «la sencillez» y «hacer bien lo sencillo» desde el inicio. 5. La «primera milla» (la interfaz mediante la cual las personas interactúan directamente con las funciones administrativas) suele ser el eslabón más débil en la cadena de implementación. Reformarlo puede requerir un cambio sistémico, pero mejorará considerablemente la eficacia general y mitigará el riesgo de fallos en la primera instancia. 6. Los programas de protección social no operan en un vacío, por lo que sus sistemas de implementación no deberían desarrollarse de forma aislada. Las sinergias entre distintas instituciones y sistemas de información son posibles y pueden mejorar los resultados de los programas. 7. Los sistemas de implementación de protección social contribuyen a la capacidad del gobierno de ayudar a otros sectores, por ejemplo, las subvenciones para seguros de salud, las becas, las tarifas energéticas sociales, las ayudas para la vivienda y los servicios legales. 8. Los desafíos asociados a la inclusión y a la coordinación son amplios y perennes, y motivan la mejora continua de los sistemas de implementación a través de un planteamiento dinámico, integrado y centrado en las personas.

Estado mundial de la infancia 2019 UNICEF,2020-03-17 Por primera vez en 20 años, el Estado Mundial de la Infancia de UNICEF examina la cuestión de los niños, los alimentos y la nutrición, aportando una nueva perspectiva sobre un problema que evoluciona rápidamente. A pesar de los progresos realizados en las dos últimas décadas, una tercera parte de los niños menores de 5 años están malnutridos (con retraso en el crecimiento, emaciación o sobrepeso), mientras que dos terceras partes corren el riesgo de padecer emaciación y hambre oculta a causa de la deficiente calidad de su alimentación. Estos patrones reflejan una profunda triple carga de malnutrición -desnutrición (retraso en el crecimiento y emaciación), hambre oculta y sobrepeso - que amenaza la supervivencia, el crecimiento y el desarrollo de los niños y de los países. En el núcleo de este desafío se encuentra un sistema alimentario deficiente que no proporciona a los niños los alimentos que necesitan para crecer sanos. Este informe ofrece datos y análisis exclusivos sobre la malnutrición en el siglo XXI y ofrece recomendaciones para situar los derechos de la infancia en el centro de los sistemas alimentarios.
