Architects' Data Ernst Neufert, Peter Neufert, 2012-03-26 Neufert's Architects' Data is an essential reference for the initial design and planning of a building project. It provides, in one concise volume, the core information needed to form the framework for the more detailed design and planning of any building project. Organised largely by building type, it covers the full range of preliminary considerations, and with over 6200 diagrams it provides a mass of data on spatial requirements. Most illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. An extensive bibliography and a detailed set of metric/ imperial conversion tables are included. Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 39 editions and many translations. This fourth English language edition is translated from the 39th German edition, and represents a major new edition for an international, English speaking readership. Reviews of the Previous Edition: Neufert's Architects' Data was the first book I bought when I started my studies in architecture.

It was invaluable for me then and it is still a useful aid in my designs.
—Cesar Pelli With this thorough rewrite Neufert has produced yet again an
invaluable reference book. —The Architects' Journal

Successful Supervisory Leadership William J. Rothwell, Behnam

Bakhshandeh, Aileen G. Zaballero, 2023-05-22 Why Study Supervision? This book presents two compelling reasons to study supervision and supervisory leadership: Influential Position: Supervisors exert considerable influence on organizational settings. Supervisors have been schooled, developed, and trained for their responsibilities. They can function more effectively than if they learn through informal, sometimes haphazard means. It thus pays to learn about supervision because supervisors can influence how efficiently and effectively their organization functions. Career Path: Many career paths lead to supervision. Supervisors are everywhere. Supervisors are teachers, doctors, accountants, lawyers, plumbers, and electricians. If you aspire to advance within your occupation, you may find that one career path leads to supervision. Preparing for supervisory responsibilities can prepare you for advancement. You may thus have a personal stake – your own future – in learning about what supervisors do and how they do it. In addition, this book: Provides strategies for building solid relationships with team members. Uses positivity as a foundational practice to lead and encourage other employees. Provides guidelines on how to hold employees accountable and set high expectations. Presents strategies to engage, coach, and develop employees by creating a positive environment to influence attitudes and behaviors. Offers various approaches for managing time and increasing productivity.

Car Park Designers' Handbook Jim Hill, Glynn Rhodes, Steve Vollar, Chris Whapples, 2005 'Car Park Designers' Handbook' looks at multi-storey car parks as being utilitarian constructions. The authors do not see their design as being a finite art but as a compromise between the motorist's spatial desires and the practical need to achieve economy of construction.
