Human Error in Aviation R.Key

Dismukes, 2017-07-05 Most aviation accidents are attributed to human error, pilot error especially. Human error also greatly effects productivity and profitability. In his overview of this collection of papers, the editor points out that these facts are often misinterpreted as evidence of deficiency on the part of operators involved in accidents. Human factors research reveals a more accurate and useful perspective: The errors made by skilled human operators - such as pilots, controllers, and mechanics - are not root causes but symptoms of the way industry operates. The papers selected for this volume have strongly influenced modern thinking about why skilled experts make errors and how to make aviation error resilient.

IAMSAR Manual International Maritime Organization, 2002

Interagency Helicopter Operations Guide The National Wildfire Coordinating Group, 2019-01-25 The National Wildfire Coordinating Group provides national leadership to enable interoperable wildland fire operations among federal, state, local, tribal, and territorial partners. Primary objectives include: Establish national interagency

wildland fire operations standards. Recognize that the decision to adopt standards is made independently by the NWCG members and communicated through their respective directives systems; Establish wildland fire position standards, qualifications requirements, and performance support capabilities (e.g. training courses, job aids) that enable implementation of NWCG standards; Support the National Cohesive Wildland Fire Management Strategy goals: to restore and maintain resilient landscapes; create fire adapted communities; and respond to wildfires safely and effectively; Establish information technology (IT) capability requirements for wildland fire; and Ensure that all NWCG activities contribute to safe, effective, and coordinated national interagency wildland fire operations. The objectives of the Interagency Helicopter Operations Guide (IHOG) are to: Promote safe, cost-efficient and effective aviation services in support of agency and interagency goals and objectives; Define and standardize national, interagency helicopter management and operational procedures for helicopter users from participating agencies; Through standardization, facilitate the ability of personnel from different agencies to work cooperatively on incidents or projects; and Provide a framework within which areas, regions, states, and local units can provide supplemental, site-specific guidance. The procedures contained in this guide apply to helicopter operations conducted by providers and users of helicopters from participating agencies. This guide addresses both incident and resource helicopter operations.

Into the Abyss Carol Shaben, 2012-10-16 On an icy night in October 1984, a Piper Navajo commuter plane carrying 9 passengers crashed in the remote wilderness of northern Alberta, killing 6 people. Four survived: the rookie pilot, a prominent politician, a cop, and the criminal he was escorting to face charges. Despite the poor weather, Erik Vogel, the 24-year-old pilot, was under intense pressure to fly--a situation not uncommon to pilots working for small airlines. Overworked and exhausted, he feared losing his job if he refused to fly. Larry Shaben, the author's father and Canada's first Muslim Cabinet Minister, was commuting home after a busy week at the Alberta Legislature. After Paul Archambault, a drifter wanted on an outstanding warrant, boarded the plane, rookie Constable Scott Deschamps decided, against RCMP regulations, to remove his handcuffs--a decision that profoundly impacted the men's survival. As they fought through the night to stay alive, the dividing lines of power, wealth and status were erased and each man was forced to confront the precious and limited nature of his existence. The survivors forged unlikely friendships and through them found strength and courage to rebuild their lives. *Into the Abyss* is a powerful narrative that combines in-depth reporting with sympathy and grace to explore how a single, tragic event can upset our assumptions and

become a catalyst for transformation.
