**Energy Efficiency** Daniel M. Martinez, Ben W. Ebenhack, Travis P. Wagner, 2019-05-09 Energy Efficiency: Concepts and Calculations is the first book of its kind to provide an applied, systems oriented description of energy intensity and efficiency in modern economies across the entire energy chain. With an emphasis on analysis, specifically energy flow analysis, lifecycle energy accounting, economic analysis, technology evaluation, and policies/strategies for adopting high energy efficiency standards, the book provides a comprehensive understanding of the concepts, tools and methodologies for studying and modeling macro-level energy flows through, and within, key economic sectors (electric power, industrial, commercial, residential and transportation). Providing a technical discussion of the application of common methodologies (e.g. cost-benefit analysis and lifecycle assessment), each chapter contains figures, charts and examples from each sector, including the policies that have been put in place to promote and incentivize the adoption of energy efficient technologies. Contains models and tools to analyze each stage at the macro-level by tracking energy consumption and how the resulting data might change energy use Includes accessible references and a glossary of common terms at the end of each chapter Provides diagnostic figures, tables and schematics within the context of local, regional and national energy consumption and utilization

**Projected Costs of Generating Electricity** OECD Nuclear Energy Agency, International Energy Agency, Organisation for Economic Co-operation and Development, 1998 This is the fifth study in a series on the future costs of generating electricity. It reviews cost estimates for power plants using nuclear, coal, gas and renewable energy sources.

**Backpacker** , 2007-09 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

**Drawdown** Paul Hawken, 2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically

viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

*Tackling Climate Change Through Livestock* Food and Agriculture Organization of the United Nations, 2013 Greenhouse gas emissions by the livestock sector could be cut by as much as 30 percent through the wider use of existing best practices and technologies. FAO conducted a detailed analysis of GHG emissions at multiple stages of various livestock supply chains, including the production and transport of animal feed, on-farm energy use, emissions from animal digestion and manure decay, as well as the post-slaughter transport, refrigeration and packaging of animal products. This report represents the most comprehensive estimate made to-date of livestock's contribution to global warming as well as the sector's potential to help tackle the problem. This publication is aimed at professionals in food and agriculture as well as policy makers.

*Telework in the 21st Century* Jon C. Messenger, 2019 Technological developments have enabled a dramatic expansion and also an evolution of telework, broadly defined as using ICTs to perform work from outside of an employer's premises. This volume offers a new conceptual framework explaining the evolution of telework over four decades. It reviews national experiences from Argentina, Brazil, India, Japan, the United States, and ten EU countries regarding the development of telework, its various forms and effects. It also analyses large-scale surveys and company case studies regarding the incidence of telework and its effects on working time, work-life balance, occupational health and well-being, and individual and organizational performance.

**An Introduction to Sustainable Business Practices (Collection)** Brian Clegg, Kevin Wilhelm, Eric Olson, 2014-06-30 A brand new collection introducing today's highest-value sustainable business processes... 3 authoritative books, now in a convenient e-format, at a great price! 3 authoritative Books help you drive real competitive advantage from sustainability -- from planning and strategy through execution and metrics Sustainability strategies offer powerful opportunities to increase profitability, accelerate growth, improve brand value, and reduce business risk. In this unique 3 eBook package, three world-class experts introduce business sustainability and show how to achieve these benefits throughout your own organization. In *Return on Sustainability: How Business Can Increase Profitability and Address Climate Change in an Uncertain Economy*, Kevin Wilhelm introduces new best practices for capitalizing on the many business opportunities presented by climate change. Through real-world case studies of firms ranging from Yakima to Lockheed Martin, Wilhelm shows how enterprises have significantly improved business performance by improving their climate performance. Wilhelm also identifies key climate-related business risks that will require businesses to act whether they want to or not. Wilhelm helps you make the business case for seriously addressing climate change -- and, once you've made that case, he offers you practical strategies and techniques for successful execution. Next, in *Better Green Business: Handbook for Environmentally Responsible and Profitable Business Practices*, Dr. Eric G. Olson brings together practical insights and start-to-finish strategies for

driving “win-win-win” gains in revenue, efficiency, and environmental performance. He introduces powerful methodologies and technologies for increasing operational efficiency and reducing waste, including IBM’s impactful Green Sigma™ approach. You’ll find new ways to drive value by “instrumenting the planet,” and discover the technologies that now make this possible. Olson concludes by identifying long-term trends that make “green business” approaches increasingly indispensable. Finally, in Financial Times Briefings: Sustainable Business, Brian Clegg delivers concise, practical, and actionable advice for integrating sustainability in ways that improve both the environment and your bottom line. Organized to deliver fast and realistic answers to today’s most common business sustainability challenges, this FT Briefing presents targeted strategies, detailed tactics, real business cases, crucial consensus-building techniques, effective metrics, proven executive interventions, and much more. Whether you’re new to business sustainability or you want to strengthen your current initiatives, this collection brings together the best practices and expert advice you need right now. From world-renowned business sustainability experts Kevin Wilhelm, Eric Olson, and Brian Clegg

**Half-Earth Socialism** Troy Vettese,Drew Pendergrass,2024-04-23 Empowers readers to write their own recipes for a future in peril: an exercise in democracy few books have dared to undertake. -Andreas Malm, author of How to Blow Up a Pipeline A plan to save the earth and bring the good life to all In this thrilling and capacious book, Troy Vettese and Drew Pendergrass challenge the inertia of capitalism and the left alike and propose a radical plan to address climate disaster and guarantee the good life for all. Consumption in the Global North can't continue unabated, and we must give up the idea that humans can fully control the Earth through technological "fixes" which only wreak further havoc. Rather than allow the forces of the free market to destroy the planet, we must strive for a post-capitalist society able to guarantee the good life the entire planet. This plan, which they call Half-Earth Socialism, means we must: • rewild half the Earth to absorb carbon emissions and restore biodiversity • pursue a rapid transition to renewable energy, paired with drastic cuts in consumption by the world's wealthiest populations • enact global veganism to cut down on energy and land use • inaugurate worldwide socialist planning to efficiently and equitably manage production • welcome the participation of everyone—even you! Accompanied by a climate-modelling website inviting readers to design their own "half earth," Vettese and Pendergrass offer us a visionary way forward—and our only hope for a future.
