World-maps for Finding the Direction and Distance to Mecca David King,2021-09-06 Two remarkable Iranian world-maps were discovered in 1989 and 1995. Both are made of brass and date from 17th-century Iran. Mecca is at the centre and a highly sophisticated longitude and latitude grid enables the user to determine the direction and distance to Mecca for anywhere in the world between Andalusia and China. Prior to the discovery of these maps it was thought that such cartographic grids were conceived in Europe ca. 1910. This richly-illustrated book presents an overview of the ways in which Muslims over the centuries have determined the sacred direction towards Mecca (qibla) and then describes the two world-maps in detail. The author shows that the geographical data derives from a 15th-century Central Asian source and that the mathematics underlying the grid was developed in 9th-century Baghdad.

Early Islamic Qiblas Dan Gibson,2017 For the first time in history Dan Gibson has undertaken a comprehensive survey of Islamic mosques from the first two centuries of Islam. Using this data, Gibson demonstrates that Muhammad and the first four caliphs never knew of Mecca in Saudi Arabia. This book shatters old perspective about Islamic history and is unlocking the truth about Islam.

Free of Fear Hussain Al-Shahristani,2021-03-29 Free of fear is about a man who overcame his fear to say no to Saddam Hussein when he wanted him to work on a nuclear weapons programme. The book vividly describes the atrocities of Saddam's tyranny and how he and other inmates survived in Abu Ghraib prison. He overcame his fear again when he defied Saddam by escaping from prison after spending ten years in solitary confinement. After the fall of the regime, he was called upon to assume different ministerial positions and played leading roles in new Iraq. This book is an eyewitness account of five decades of modern Iraq with all its turmoil and challenges. It describes successes and failures at nation-building endeavours. Autobiography of Hussain Al-Shahristani is a mirror of recent Iraq's history.

Mobilities, Tourism and Travel Behavior Leszek Butowski,2018-01-17 The notion of mobilities, when looked at from a practical point

of view, turns out to cover different kinds of human activity. It is not surprising, then, that when approached from an academic perspective, it reveals enormous potential for interdisciplinary research, which has proven extremely attractive to many scholars from different continents, disciplines, and schools of academic inquiry. The scholars in this volume focus on the specific aspects of mobilities, namely, tourism and travel behavior, but approach them from a plethora of positions. Such a myriad of perspectives is bound to be challenging in methodological terms, but it seems there is a growing agreement as to the worthiness of this interdisciplinary research. By means of combining various approaches, researchers obtain access to a fascinating and increasingly ubiquitous phenomenon of contemporary human mobility.

The History of al-Ṭabarī Vol. 7 Abū Jaʿfar Muḥammad ibn Jarīr al-Ṭabarī, 1987-01-01 The contents of this volume are extremely significant: The specific events in this earliest period set precedents for what later became established Islamic practice. The book deals with the history of the Islamic community at Medina during the first four years of the Islamic period--a time of critical importance for Islam, both as a religion and as a political community. The main events recounted by Ṭabarī are the battles between Muḥammad's supporters in Medina and their adversaries in Mecca. Ṭabarī also describes the rivalries and infighting among Muḥammad's early supporters, including their early relations with the Jewish community in Medina.

Magnetotellurics in the Context of the Theory of Ill-posed Problems Mark Naumovich Berdichevskii, Vladimir Ivanovich Dmitriev, 2002 This volume serves as an introduction to modern magnetotellurics originating with the pioneering work of Tikhonov and Cagniard. It presents a comprehensive summary of theoretical and methodological aspects of magnetotellurics. It provides a bridge between textbooks on electrical prospecting and numerous papers on magnetotelluric methods scattered among various geophysical journals and collections. The book has been written in the terms of the theory of ill-posed problems and contains a special chapter encouraging readers to master the elements of this theory that defines the philosophy of the physical experiment. The book thus offers the connected and consistent account of the principles of magnetotellurics from that single viewpoint. The book also brings together developments from many sources and involves some little-known results developed in Russia in Tikhonov's magnetotellurics school. Of particular interest are concluding chapters of the book that demonstrate the potential of magnetotellurics in oil and gas surveys, including discovery of the Urengoy gas field in Western Siberia, one of the largest gas fields in the world. This potential also is revealed in studies of the earth's crust and upper mantle.

On Both Sides of the Strait of Gibraltar Julio Samsó, 2020-09-25 In *On Both Sides of the Strait of Gibraltar* Julio Samsó shows that astronomical sources, written in al-Andalus, the Maghrib and the Iberian Peninsula, belong to the same tradition and emphasizes the role of al-Andalus and the Iberian Peninsula in the transmission of Islamic astronomy to medieval Europe.

Finding Mecca in America Mucahit Bilici, 2012-12-18 The events of 9/11 had a profound impact on American society, but they had an even more lasting effect on Muslims living in the United States. Once practically invisible, they suddenly found themselves overexposed. By describing how Islam in America began as a strange cultural object and is gradually sinking into familiarity, *Finding Mecca in America* illuminates the growing relationship between Islam and American culture as Muslims find a homeland in America. Rich in ethnographic detail, the book is an up-close account of how Islam takes its American shape. In this book, Mucahit Bilici traces American Muslims' progress from outsiders to natives and from immigrants to citizens. Drawing on the philosophies of Simmel and Heidegger, Bilici develops a novel sociological approach and offers insights into the civil rights activities of Muslim Americans, their increasing efforts at

interfaith dialogue, and the recent phenomenon of Muslim ethnic comedy. Theoretically sophisticated, *Finding Mecca in America* is both a portrait of American Islam and a groundbreaking study of what it means to feel at home.

Astronomy in the Service of Islam David A. King, 1993 Delineates the two very different traditions of astronomy in medieval Islam: legal scholars watched the crescent moon to keep the calendar, and used shadows to keep the hours and direction of prayer, while astronomers constructed elaborate theories and mathematical tables to approach ever more precision in times and directions. The articles are reproduced from their original publication in various journals, 1982-91.

Architecture Francis D. K. Ching, 2012-07-16 A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated *Architecture: Form, Space, and Order* has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment. Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, *Architecture: Form, Space, and Order* encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

The Topkapi Scroll Gülru Necipoğlu, 1996-03-01 Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding

of geometry with that found in medieval Western art, making this book particularly valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised “dead” drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll’s patterns could be used to design a three-dimensional vault.

Muhammadiyah a Reform Movement Dr. H. Haedar Nashir, M.Si., 2015 Basically, Muhammadiyah is a reform movement. The movement of Tadjid fil-Islam. The most profound essence of the Islamic movement established by Kyai Haji Ahmad Dahlan is the flame of reform/renewal. This characteristic is more prominent than other characteristics. Theology, ideology, and action model of Muhammadiyah are renewal leading to Islamic modernism or reformism. Those reform endeavors are actualized to break the stagnation of ummah by fostering a progressive Islamic teachings. In addition, Muhammadiyah has pioneered the system of modern Islamic education, health, and social services, community empowerment through Al-Ma'un movement, women's movement in the public through 'Aisyiyah, and reform works which revive the advancement of Islamic world and modernization of civil life. This reform is departed from the theme of al-ruju ila al-Qur'an wa al-Sunnah, namely a return to the Qur'an and the Prophet's Sunnah. The endeavours of purification of Islam to pursue the authentic teachings, as well as to establish a progressive Islam. Despite it frequently assumed to be ad-hoc, the span of twentieth century Muhammadiyah reform is a breakthrough. In the advance, directly and indirectly, it has been a state of mind for the majority of Muslim in Indonesia, including the previous oppositions.
