*The Inn at Little Washington Cookbook* Patrick O'Connell,2011-11-02 110 sparkingly original recipes from the world-renowned self-taught chef and founder of the three-star Michelin restaurant The Inn at Little Washington Patrick O'Connell, a self-taught chef who read cookbooks to learn how to cook, began his culinary career with a catering business in an old farmhouse, cooking on a wood stove with an electric frying pan purchased for \$1.49 at a garage sale. To O'Connell's surprise, the pan was able for boil, sauté, and deep fry for parties of up to 300 guests, which sharpened his awareness of how much could be done with very little. In 1978, his catering business evolved into a country restaurant and Inn, operating out of a defunct garage in a small Virginia town affectionately referred to as "Little" Washington. Now a multiple James Beard Award-winning and Michelin star restaurant, The Inn at Little Washington was America's first five-star Inn. In *The Little Inn at Washington Cookbook*, O'Connell assembles elegant, simple, and straightforward recipes that elevate everyday ingredients. With helpful, detailed instructions, O'Connell teaches you how to make over one hundred dishes, from Fresh Tuna Tartare on Tuna Carpaccio with Wasabi Mayonnaise and Miniature Caramelized Onion Tartlets to Rockfish Roasted with White Wine, Tomatoes, and Black Olives on Toasted Couscous and Steamed Lobster with Grapefruit Butter Sauce. He also includes delicious desserts, such as Rosemary Crème Brûlée and Double-Pumpkin Roulade, and savory sides, like Creamy Garlic Polenta and My Grandmother's Baked Beans. With over three hundred stunning, mouthwatering photographs and thoughtful reflections from O'Connell, *The Inn at Little Washington Cookbook* is a fresh and glorious resource and a romantic culinary journey through the Virginia countryside.

**Financial Inclusion, Regulation, and Education** Naoyuki Yoshino,Peter J. Morgan,2017 Financial inclusion is receiving increasing attention as having the potential to contribute to economic and financial development while at the same time fostering more inclusive growth and greater income equality. Although substantial progress has been made, there is still much to achieve. East Asia, the Pacific, and South Asia combined account for 55% of the world's unbanked adults, mainly in India and the People's Republic of China. This book surveys the experience of a number of advanced and Asian emerging economies to assess factors affecting the ability of low-income households and small firms to access financial services, including financial literacy, financial education programs, and financial regulatory frameworks, as well as identify policies that can

improve their financial access while maintaining financial stability. It aims to identify successful experiences and important lessons that can be adopted by other emerging economies. The studies cover the experiences of Germany, the United Kingdom, Bangladesh, India, Indonesia, the Philippines, Sri Lanka, and Thailand. The book adopts a practical and holistic approach to issues related to financial inclusion. For example, innovative methods of promoting financial access, such as mobile phone banking and microfinance, require corresponding innovations in regulatory frameworks, perimeters, and capacity. Moreover, programs in the areas of financial education and consumer protection are needed to enable households and firms to take full advantage of improvements in financial access.

**The Taliban's Virtual Emirate** Neil Krishan Aggarwal,2016-05-24 Applying cutting-edge psychiatric theories to an analysis of online Taliban literature in four languages, Neil Krishan Aggarwal constructs a game-changing narrative of the organization's broad appeal and worldview. Aggarwal, a cultural psychiatrist, focuses on the Taliban's creation of culture, evoking religion in Arabic and English writings, nationalism in Dari sources, and regionalism in Urdu texts. The group also promotes a specific form of argumentation, citing religious scriptures in Arabic works, canonical poets in Dari and Urdu writings, and scholars and journalists in English publications. Aggarwal shows how the Taliban categorize all Muslims as members and all non-Muslims as outsiders; how they convince Muslims of the need for violence; and how they apply the insider/outsider dichotomy to foreign policy. By understanding these themes, Aggarwal argues, we can craft better countermessaging strategies.

**Bank 4.0** Brett King,2018-12-17 Winner of best book by a foreign author (2019) at the Business Book of the Year Award organised by PwC Russia The future of banking is already here — are you ready? Bank 4.0 explores the radical transformation already taking place in banking, and follows it to its logical conclusion. What will banking look like in 30 years? 50 years? The world's best banks have been forced to adapt to changing consumer behaviors; regulators are rethinking friction, licensing and regulation; Fintech start-ups and tech giants are redefining how banking fits in the daily life of consumers. To survive, banks are having to develop new capabilities, new jobs and new skills. The future of banking is not just about new thinking around value stores, payment and credit utility — it's embedded in voice-based smart assistants like Alexa and Siri and soon smart glasses which will guide you on daily spending and money decisions. The coming Bank 4.0 era is one where either your bank is embedded in your world via tech, or it no longer exists. In this final volume in Brett King's BANK series, we explore the future of banks amidst the evolution of technology and discover a revolution already at work. From re-engineered banking systems, to selfie-pay and self-driving cars, Bank 4.0 proves that we're not on Wall Street anymore. Bank 4.0 will help you: Understand the historical precedents that flag a fundamental rethinking in banking Discover low-friction, technology experiences that undermine the products we sell today Think through the evolution of identity, value and assets as cash and cards become obsolete Learn how Fintech and tech disruptors are using behaviour, psychology and technology to reshape the economics of banking Examine the ways in which blockchain, A.I., augmented reality and other leading-edge tech are the real building blocks of the future of banking systems If you look at individual technologies or startups disrupting the space, you might miss the biggest signposts to the future and you might also miss that most of we've learned about banking the last 700 years just isn't useful. When the biggest bank in the world isn't any of the names you'd expect, when branch networks are a burden not an asset, and when advice is the domain of Artificial Intelligence, we may very well have to start from

scratch. Bank 4.0 takes you to a world where banking will be instant, smart and ubiquitous, and where you'll have to adapt faster than ever before just to survive. Welcome to the future.
