Management for Quality Improvement Sigeru Mizuno,2020-08-18 With continuous improvement (kaizen) and Total Quality Control (TQC) becoming increasingly important to world class companies, there's an urgent need to build quality into every management decision. The tools presented in this book allow you to do just that. They represent the most important advance in quality deployment and project management in recent years. Unlike the seven traditional QC tools, which measure quality problems that already exist and are used by quality circles, these seven new QC tools make it possible for managers to plan wide-ranging and detailed TQC objectives throughout the entire organization. These tools, some borrowed from other disciplines and others developed specifically for quality management, include the relations diagram, the KJ method (affinity diagram), the systematic diagram, the matrix diagram, matrix data analysis, the process decision program chart (PDPC), and the arrow diagram. Together they will help you to: Expand the scope of quality efforts company-wide. Set up and manage the systems necessary to resolve major quality problems. Anticipate potential quality problems and actually eliminate defects before they happen. Never before available in English, Management for Quality Improvement is absolutely essential reading if you are in any area of project management, quality assurance, MIS, or TQC.

Organisation 4.0: MITO-Konfigurationsmanagement Hartmut F. Binner, 2018-06-08 Wie

Unternehmen die Herausforderungen, mit denen sie konfrontiert sind, erfolgreich managen können, beschreiben unzählige Ratgeber. Dieses Buch stellt im Detail den Weg dorthin, das „Wie“, in den Vordergrund. Der Autor verfolgt dabei einen ganzheitlichen, prozessorientierten Ansatz der Organisationsentwicklung. In dem Buch wird der Weg von einer funktionsorientierten hin zu einer prozessorientierten Organisation detailliert und anhand von vielen Anwendungsbeispielen beschrieben. Der Autor stellt Modelle, Methoden, Vorgehensweisen und Tools für die Umsetzung vor. Das MITO-Modell mit seinem Methoden-Tool als generischem Methodenbaukasten wird umfassend erläutert. Bezugspunkt für das Changemanagement ist dabei nicht die vertikale, also hierarchische Organisationsstruktur, sondern, ausgehend von einer rollenbasierten Ordnungsstruktur, die horizontale Wertschöpfungskette. Erst aus dieser detaillierten rollenbasierten Beschreibung des End-to-End-Businessprozesses ergeben sich die Prozessaufgaben und Prozessverantwortlichkeiten. Dies wiederum ermöglicht eine hohe Datendurchgängigkeit für die Prozessdigitalisierung mit neuen

Technologien wie Cloud Computing, Enterprise Mobility, Social Business, Big Data in der Organisation 4.0. In dem Buch werden alle Fragen rund um das gemeinsame Führungsverständnis in einer prozessorientierten Organisation besprochen. Auch der Aufbau einer gemeinsamen Wissens- und Lernplattform zur Qualifizierung von Führungskräften und Mitarbeitern wird behandelt. Wie lassen sich Prozesse systematisch beschreiben und im Rahmen eines ganzheitlichen Business Process Management (BPM) umsetzen? Wie können funktionsorientierte Veränderungs-, Anforderungs- und Auswirkungsanalysen durch prozessorientierte Analysen ersetzt werden? Wie lässt sich eine prozessorientierte Organisation evaluieren? Das Buch analysiert diese und weitere Fragen systematisch und detailliert und vermittelt Führungskräften nicht nur das notwendige Wissen, sondern auch die Methodenkompetenz, um Changemanagement-Prozesse umzusetzen. Ob Mittelstand oder Großunternehmen – das Buch richtet sich an alle Führungskräfte in Unternehmen, die sich mit Changemanagement auseinandersetzen.

Holistic Business Model Transformation Hartmut F. Binner,2022-11-17 This book describes the control loop-oriented change management process for implementing a digital business model via the holistic Organization 4.0 MITO configuration management. The content chapter structure of this MITO book with the description of the different transformation design views is based on the higher-level operational control loop principle within the MITO model segments shown in Figure 1. Whereby the management segment (M) is still subdivided on the default side into the process-related management segment and on the feedback side into the fact-related management segment. The MITO business model based on this supplements the 5 model segments with the downstream customer and upstream supplier segments and integrates the hierarchical process level model into the MITO model representation for the conception of the process-oriented target, management and control system. This book is a translation of the original German 1st edition Ganzheitliche Businessmodell-Transformation by Hartmut F. Binner, published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2020. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

Diagnostic Radiology Physics International Atomic Energy Agency,D. R. Dance,2014 This publication is aimed at students and teachers involved in programmes that train medical physicists for work in diagnostic radiology. It provides a comprehensive overview of the basic medical physics knowledge required in the form of a syllabus for the practice of modern diagnostic radiology. This makes it particularly useful for graduate students and residents in medical physics programmes. The material presented in the publication has been endorsed by the major international organizations and is the foundation for academic and clinical courses in both diagnostic radiology physics and in emerging areas such as imaging in radiotherapy.

Classical and Quantum Dynamics in Condensed Phase Simulations Bruce J Berne,Giovanni Ciccotti,David F Coker,1998-06-17 The school held at Villa Marigola, Lerici, Italy, in July 1997 was very much an educational experiment aimed not just at teaching a new generation of students the latest developments in computer simulation methods and theory, but also at bringing together researchers from the condensed matter computer simulation community, the biophysical chemistry community and the quantum dynamics community to confront the shared problem: the development of methods

to treat the dynamics of quantum condensed phase systems. This volume collects the lectures delivered there. Due to the focus of the school, the contributions divide along natural lines into two broad groups: (1) the most sophisticated forms of the art of computer simulation, including biased phase space sampling schemes, methods which address the multiplicity of time scales in condensed phase problems, and static equilibrium methods for treating quantum systems; (2) the contributions on quantum dynamics, including methods for mixing quantum and classical dynamics in condensed phase simulations and methods capable of treating all degrees of freedom quantum-mechanically.

Systematische Methodenanwendung im dynamischen Qualitätsmanagement bei KMU. Johannes Schober, 2020-07-23 Eine zielgerichtete Anwendung qualitativer und datenbasierter Methoden im QM ist essentiell für den wirtschaftlichen Erfolg von kleinen und mittleren Unternehmen (KMU). Allerdings muss ein einzelner Mitarbeiter von KMU ein breites Aufgabenspektrum bedienen, wodurch diese häufig mit der Methodenauswahl und -durchführung überfordert sind, so dass KMU insbesondere datenbasierte Methoden deutlich seltener aus eigenem Antrieb einsetzen als Großunternehmen. Hierdurch können die Potentiale der teilweise bereits erfassten Daten nicht genutzt werden. Folglich wird in der vorliegenden Arbeit ein Modell zur Methodenanwendung im dynamischen QM bei KMU entwickelt, mit der die Akzeptanz und daraus folgend die derzeit nur mäßig ausgeprägte Anwendung von Methoden im dynamischen QM verstärkt werden kann. Der Ansatz ist hierbei, die Anwendungsbarrieren der Methodenanwendung systematisch zu reduzieren. Hierfür wird der Nutzer über eine dialogbasierte Auswahl zu einer für seine Problemstellung passenden Methode geführt und anschließend durch die Methodendurchführung und -interpretation verständlich geleitet, so dass eine Anwendung neben dem Tagesgeschäft ermöglicht wird.

Prozessmanagement in Pflegeorganisationen Harald Blonski, 2003 Pflegeorganisationen, die im Wettbewerb erfolgreich sein wollen, müssen dem Thema Qualitätsmanagement einen besonderen Stellenwert einräumen. Bei allen strategischen Planungen und im praktischen Alltagsgeschehen müssen sie die Interessen, Ansprüche und Erfordernisse ihrer Kunden klar vor Augen haben. Die Qualität der Dienstleistungen ist abhängig von einzelnen Prozessen. Daher sind die Organisationsstrukturen und betrieblichen Abläufe ganz neu zu betrachten. Nur wenn man Prozesse effektiv und effizient plant und umsetzt, lassen sich Kunden und Partner zufrieden stellen. Der Prozessgedanke und die Implementierung prozessorientierter Management-systeme in Pflegeorganisationen kommen jedoch nur schleppend in Gang. Häufig fehlen selbst grundlegende Kenntnisse bei der Terminologie, Anwendung und Zielsetzung. Genau diese Lücke schließt das Handbuch: Es bietet einen grundlegenden Einblick und Anregungen aus der praktischen Erfahrung mit dem Prozessmanagement.
