Battery Management Systems H.J. Bergveld, W.S. Kruijt, P.H.L. Notten, 2013-03-09 Battery Management Systems - Design by Modelling describes the design of Battery Management Systems (BMS) with the aid of simulation methods. The basic tasks of BMS are to ensure optimum use of the energy stored in the battery (pack) that powers a portable device and to prevent damage inflicted on the battery (pack). This becomes increasingly important due to the larger power consumption associated with added features to portable devices on the one hand and the demand for longer run times on the other hand. In addition to explaining the general principles of BMS tasks such as charging algorithms and State-of-Charge (SoC) indication methods, the book also covers real-life examples of BMS functionality of practical portable devices such as shavers and cellular phones. Simulations offer the advantage over measurements that less time is needed to gain knowledge of a battery's behaviour in interaction with other parts in a portable device under a wide variety of conditions. This knowledge can be used to improve the design of a BMS, even before a prototype of the portable device has been built. The battery is the central part of a BMS and good simulation models that can be used to improve the BMS design were previously unavailable. Therefore, a large part of the book is devoted to the construction of simulation models for rechargeable batteries. With the aid of several illustrations it is shown that design improvements can indeed be realized with the presented battery models. Examples include an improved charging algorithm that was elaborated in simulations and verified in practice and a new SoC indication system that was developed showing promising results. The contents of Battery Management Systems - Design by Modelling is based on years of research performed at the Philips Research Laboratories. The combination of basic and detailed descriptions of battery behaviour both in chemical and electrical terms makes this book truly multidisciplinary. It can therefore be read both by people with an (electro)chemical and an electrical engineering background.

*Never Lose Hope* Mark Wilson, 2018-03-27 John is a child convict, transported to New South Wales for stealing a shirt. Life is grim in the fledgling colony and when food runs short, John once again has to steal to survive. Starving and alone, he is taken in by Australia's first schoolteacher, Isabella Rosson. In her simple classroom, John learns to read and write and soon becomes her star pupil - until he is discovered by the soldiers and again sent away in chains. Yet John never forgets Isabella's lessons, the power of words - and the hope for a brighter future. Inspired by the life of convict Isabella Rosson, the first teacher in the colony at Port Jackson, and John Hudson, the youngest First Fleet convict, this touching story is illustrated with Mark Wilson's vividly realistic and evocative artwork.

*Shipwrecks of the Great Lakes* Anna Lardinois, 2021-07-01 Submerged stories from the inland seas The newest addition to Globe Pequot's Shipwrecks series covers the sensational wrecks and maritime disasters from each of the five Great Lakes. It is estimated that over 30,000 sailors have lost their lives in Great Lakes wrecks. For many, these icy, inland seas have become their final resting place, but their last moments live on as a part of maritime history. The tales, all true and well-documented, feature some of the most notable tragedies on each of the lakes. Included in many of these tales are legends of ghost ship sighting, ghostly shipwreck victims still struggling to get to shore, and other chilling lore. Sailors are a superstitious group, and the stories are sprinkled with omens and maritime protocols that guide decisions made on the water.

The Phoenix Encounter Method: Lead Like Your Business Is on Fire! Ian C. Woodward,V. "Paddy" Padmanabhan,Sameer Hasija,Ram Charan,2020-10-27 A radical new leadership strategy to transform business as we know it—from a dream team of INSEAD professors and mega-bestselling author Ram Charan The business landscape is littered with the wreckage of companies that crashed and burned when an apocalypse came—in the shape of new competitive technologies, upstart entrants, demographic shifts, and new world orders. Who can feel safe in firestorm change? The authors of The Phoenix Encounter Method don't advise safety. In fact, their method of leadership thinking requires you to imagine burning your business to the ground—throwing yourself into a firestorm change—and turning the upheaval to your organization's advantage. It can then rise, phoenix-like, from the ashes, stronger and more powerful than ever. Written with a sense of urgency and purposefully radical provocation, The Phoenix Encounter Method represents the forward thinking of legendary business guru Ram Charan and professors from the senior global leadership program of INSEAD, one of the world's top graduate business schools. The resulting methodology, based on analysis of thousands of articles, studies, reports, and academic and business practice, was field tested in real-life Phoenix Encounters conducted with more than fifteen hundred senior executives—from startups and family businesses to legacy companies—representing a broad range of industry and sectors in both developed and developing economies. Whatever your sector or industry, if you're responsible for your organization's ability to use change as a transformative opportunity, you'll appreciate the dramatic impact The Phoenix Encounter Method will have on you, your leadership, and your organization.
