Acts Chalmer E. Faw,1993-10-08 Chalmer E. Faw brings Acts to life for our day. He blends thorough biblical scholarship with wisdom from extensive and varied experience in missionary work and Bible teaching. His careful exposition of the book of Acts is supplemented with literary and theological discussion. The key word in Acts is witness for Jesus Christ, from Jerusalem to the ends of the earth. God's Spirit anoints the church at Pentecost, leads believers in handling conflicts between converts new and old, and empowers Christians to overcome false beliefs and magic. In Acts, Luke tells this dramatic story with subtle humor.

A Comparative Handbook to the Gospel of Mark

Bruce D. Chilton,Darrell L. Bock,Daniel M. Gurtner,2010 This comparative handbook is intended to provide scholars of the New Testament with detailed, systematic and accurate resources concerning the Judaic context of the gospel of Mark. It aims to serve as a powerful tool to assist the reader - and commentator - in understanding and commenting on the gospel of Mark. Introductions are provided to help with issues of dating and the development of the literatures concerned. Possible interpretations are also presented, where suitable.

Prophetic Figures in Late Second Temple Jewish Palestine Rebecca Gray,1993-05-06 Isolated passages from the writings of Josephus are

routinely cited in general studies of early Jewish prophecy, but the present work is the first comprehensive examination of this material. Gray begins with a discussion of the significance of the belief--widely attested in Jewish sources from the late Second Temple period--that prophecy had ceased. She proceeds to outline a general theory about the nature and status of prophecy in this period. Giving careful consideration to the prophetic claims that Josephus makes for himself, she argues that these claims are more substantial and more important for understanding Josephus than is usually thought. Gray goes on to examine Josephus' reports concerning prophecy among the Essenes and Pharisees, and his accounts of the activities of the sign prophets and other figures. In every instance, Gray interprets the evidence about prophecy in relation to Josephus' personal career and his thought and work as a whole. Drawing on a range of evidence, much of which has not played a significant role in other studies of early Jewish prophecy, this book is essential reading for anyone interested in Josephus, the history of prophecy in Israel, or the historical Jesus.

The Books of Numbers Timothy R.

Ashley, 1993-07-22 Ashley's study on the book of Numbers is part of The New International Commentary on the Old Testament. Like its companion series on the New Testament, this commentary devotes considerable care to achieving a balance between technical information and homiletic-devotional interpretation.

Enhancing the Quality of Life of People with

Intellectual Disabilities Ralph Kober, 2010-09-24

This book contains a series of articles, written by international experts in the fields of intellectual disability and quality of life, that explore a broad range of issues that impact on the quality of life of people with intellectual disabilities and their families. The book commences with a general discussion on defining quality of life and family quality of life and the appropriateness of using these constructs in the field of intellectual disability, and is followed by an analysis on the effects of living arrangements and employment on quality of life. The book concludes with discussions on the unique issues facing children with intellectual disabilities and people living in developing countries and the effect these issues have upon their quality of life.

The Messenger of the Lord in Early Jewish Interpretations of Genesis Camilla Hélena von Heijne, 2010-09-29 The focus of this book is on early Jewish interpretations of the ambiguous relationship between God and 'the angel of the Lord/God' in texts like Genesis 16, 22 and 31. Genesis 32 is included since it exhibits the same ambiguity and constitutes an inseparable part of the Jacob saga. The study is set in the wider context of the development of angelology and concepts of God in various forms of early Judaism. When identifying patterns of interpretation in Jewish texts, their chronological setting is less important than the nature of the biblical source texts. For example, a common pattern is the avoidance of anthropomorphism. In Genesis 'the

angel of the Lord' generally seems to be a kind of impersonal extension of God, while later Jewish writings are characterized by a more individualized angelology, but the ambivalence between God and his angel remains in many interpretations. In Philo's works and Wisdom of Solomon, the 'Logos' and 'Lady Wisdom' respectively have assumed the role of the biblical 'angel of the Lord'. Although the angelology of Second Temple Judaism had developed in the direction of seeing angels as distinct personalities, Judaism still had room for the idea of divine hypostases.

How to Build Social Science Theories Pamela J. Shoemaker, James William Tankard, Jr., Dominic L. Lasorsa, 2003-12-10 As straightforward as its title, *How to Build Social Science Theories* sidesteps the well-traveled road of theoretical examination by demonstrating how new theories originate and how they are elaborated. Essential reading for students of social science research,

this book traces theories from their most rudimentary building blocks (terminology and definitions) through multivariable theoretical statements, models, the role of creativity in theory building, and how theories are used and evaluated. Authors Pamela J. Shoemaker, James William Tankard, Jr., and Dominic L. Lasorsa intend to improve research in many areas of the social sciences by making research more theory-based and theory-oriented. The book begins with a discussion of concepts and their theoretical and operational definitions. It then proceeds to theoretical statements, including hypotheses, assumptions, and propositions. Theoretical statements need theoretical linkages and operational linkages; this discussion begins with bivariate relationships, as well as three-variable, four-variable, and further multivariate relationships. The authors also devote chapters to the creative component of theory-building and how to evaluate theories.

The Faces of the Chariot David Joel Halperin, 1988

Mary Magdalene Bruce Chilton, 2005-11-01 After

2,000 years of flawed history, here at last is a magnificent new biography of Mary Magdalene that draws her out of the shadows of history and restores her to her rightful place of importance in Christianity. Throughout history, Mary Magdalene has been both revered and reviled, a woman who has taken on many forms—witch, whore, the incarnation of the eternal feminine, the devoted companion (and perhaps even the wife) of Jesus. In this brilliant new biography, Bruce Chilton, a renowned biblical scholar, offers the first complete and authoritative portrait of this fascinating woman. Through groundbreaking interpretations of ancient texts, Chilton shows that Mary played a central role in Jesus' ministry and was a seminal figure in the creation of Christianity. Chilton traces the evolving images of Mary Magdalene and the legends surrounding her. He explains why, despite her prominence, the Gospels actually say so little about her and why the Catholic Church for thousands of years has sought to marginalize her importance. In a probing look at the Church's attitudes toward women, he investigates Christian misogyny in the ancient world, including the suppression of women priests who patterned their activities on Mary's; explores the impact of Gnostic ambivalence toward women on its depictions of Mary; and shows that these traditions still influence modern portrayals of her. Chilton's descriptions of who Mary Magdalene was and what she did challenge the male-dominated history of Christianity familiar to most readers. Placing Mary within the traditions of Jewish female savants, Chilton presents a visionary

figure who was fully immersed in the mystical teachings that shaped Jesus' own teachings and a woman who was a religious master in her own right.

Multidimensional Scaling Joseph B. Kruskal, Myron Wish, 1978-01-01 Outlines a set of techniques that enable a researcher to discuss the hidden structure of large data bases. These techniques use proximities, measures which indicate how similar or different objects are, to find a configuration of points which reflects the structure in the data.

Quality of Life in Health Promotion and Rehabilitation Rebecca Renwick, Ivan Brown, Mark Nagler, 1996-03-26 This book convincingly argues that Quality of Life is the vital link between health promotion and rehabilitation. The contributors first review the conceptual basis for understanding and discussing quality of life in health promotion and education. They continue by addressing critical issues such as ethics, policy, quality assurance, and measurement - exploring applications of quality of life in the context of a wide range of current social issues and populations. Finally, they consider the implications for future research and practice.

Turnbull III and Gary Brunk); A Lawyer's Perspective on Quality of Life (Ruth Luckasson); Quality Assurance: Challenges in a Decentralized System (Valerie Bradley); Measuring Quality of Life: Where Have We Been, Where Are We Going?
