New Challenges in Distributed Information Filtering and Retrieval Cristian Lai,Giovanni Semeraro,Eloisa Vargiu,2012-08-10 This volume focuses on new challenges in distributed Information Filtering and Retrieval. It collects invited chapters and extended research contributions from the DART 2011 Workshop, held in Palermo (Italy), on September 2011, and co-located with the XII International Conference of the Italian Association on Artificial Intelligence. The main focus of DART was to discuss and compare suitable novel solutions based on intelligent techniques and applied to real-world applications. The chapters of this book present a comprehensive review of related works and state of the art. Authors, both practitioners and researchers, shared their results in several topics such as Multi-Agent Systems, Natural Language Processing, Automatic Advertisement, Customer Interaction Analytics, Opinion Mining.

Multidisciplinary Information Retrieval Allan Hanbury,Andreas Rauber,Arjen De Vries,2011-06-10 This book constitutes the proceedings of the Second Information Retrieval Facility Conference, IRFC 2011, held in Vienna, Austria, in June 2011. The 10 papers presented together with a keynote talk were carefully reviewed and selected from 19 high-quality submissions. IRF conferences wish to bring young researchers into contact with industry at an early stage. The second conference aimed to tackle four complementary research areas: information retrieval, semantic web technologies for IR, natural language processing for IR, and large-scale or distributed computing for the above areas. The papers are organized into topical sections on patents and multilinguality, interactive retrieval support, and IR and the Net.

Data Mining Applications with R Yanchang Zhao,Yonghua Cen,2013-11-26 Data Mining Applications with R is a great resource for researchers and professionals to understand the wide use of R, a free software environment for statistical computing and graphics, in solving different problems in industry. R is widely used in leveraging data mining techniques across many different industries, including government, finance, insurance, medicine, scientific research and more. This book presents 15 different real-world case studies illustrating various techniques in rapidly growing areas. It is an ideal companion for data mining researchers in academia and industry looking for ways to turn this versatile software into a powerful analytic tool. R code, Data and color figures for the book are provided at the RDataMining.com website. Helps data miners to learn to use R in their specific area of work and

see how R can apply in different industries Presents various case studies in real-world applications, which will help readers to apply the techniques in their work Provides code examples and sample data for readers to easily learn the techniques by running the code by themselves

MultiMedia Modeling Cathal Gurrin, Frank Hopfgartner, Wolfgang Hurst, Håvard Johansen, Hyowon Lee, Noel O'Connor, 2014-01-02 The two-volume set LNCS 8325 and 8326 constitutes the thoroughly refereed proceedings of the 20th Anniversary International Conference on Multimedia Modeling, MMM 2014, held in Dublin, Ireland, in January 2014. The 46 revised regular papers, 11 short papers and 9 demonstration papers were carefully reviewed and selected from 176 submissions. 28 special session papers and 6 papers from Video Browser Showdown workshop are also included in the proceedings. The papers included in these two volumes cover a diverse range of topics including: applications of multimedia modelling, interactive retrieval, image and video collections, 3D and augmented reality, temporal analysis of multimedia content, compression and streaming. Special session papers cover the following topics: Mediadrom: artful post-TV scenarios, MM analysis for surveillance video and security applications, 3D multimedia computing and modeling, social geo-media analytics and retrieval, multimedia hyperlinking and retrieval.

Quantum Interaction Dawei Song, Massimo Melucci, Ingo Frommholz, Peng Zhang, Lei Wang, Sachi Arafat, 2011-10-20 This book constitutes the thoroughly refereed post-conference proceedings of the 5th International Symposium on Quantum Interaction, QI 2011, held in Aberdeen, UK, in June 2011. The 26 revised full papers and 6 revised poster papers, presented together with 1 tutorial and 1 invited talk were carefully reviewed and selected from numerous submissions during two rounds of reviewing and improvement. The papers show the cross-disciplinary nature of quantum interaction covering topics such as computation, cognition, mechanics, social interaction, semantic space and information representation and retrieval.

Computational Geometry, Topology and Physics of Digital Images with Applications James F. Peters, 2019-10-03 This book discusses the computational geometry, topology and physics of digital images and video frame sequences. This trio of computational approaches encompasses the study of shape complexes, optical vortex nerves and proximities embedded in triangulated video frames and single images, while computational geometry focuses on the geometric structures that infuse triangulated visual scenes. The book first addresses the topology of cellular complexes to provide a basis for an introductory study of the computational topology of visual scenes, exploring the fabric, shapes and structures typically found in

visual scenes. The book then examines the inherent geometry and topology of visual scenes, and the fine structure of light and light caustics of visual scenes, which bring into play catastrophe theory and the appearance of light caustic folds and cusps. Following on from this, the book introduces optical vortex nerves in triangulated digital images. In this context, computational physics is synonymous with the study of the fine structure of light choreographed in video frames. This choreography appears as a sequence of snapshots of light reflected and refracted from surface shapes, providing a solid foundation for detecting, analyzing and classifying visual scene shapes.

After the War is Over Jennifer Robson, 2015-01-06 The International bestselling author of *Somewhere in France* returns with her sweeping second novel—a tale of class, love, and freedom—in which a young woman must find her place in a world forever changed. After four years as a military nurse, Charlotte Brown is ready to leave behind the devastation of the Great War. The daughter of a vicar, she has always been determined to dedicate her life to helping others. Moving to busy Liverpool, she throws herself into her work with those most in need, only tearing herself away for the lively dinners she enjoys with the women at her boarding house. Just as Charlotte begins to settle into her new circumstances, two messages arrive that will change her life. One, from a radical young newspaper editor, offers her a chance to speak out for those who cannot. The other pulls her back to her past, and to a man she has tried, and failed, to forget. Edward Neville-Ashford, her former employer and the brother of Charlotte's dearest friend, is now the new Earl of Cumberland—and a shadow of the man he once was. Yet under his battle wounds and haunted eyes Charlotte sees glimpses of the charming boy who long ago claimed her foolish heart. She wants to help him, but dare she risk her future for a man who can never be hers? As Britain seethes with unrest and post-war euphoria flattens into bitter disappointment, Charlotte must confront long-held insecurities to find her true voice . . . and the courage to decide if the life she has created is the one she truly wants.

Unbecoming Rebecca Scherm, 2015-12 After a heist she planned lands two men she loves in prison, a woman flees Paris and assumes a new identity, furtively checking news from her hometown as her web of deception unravels.

Mastering Autodesk VIZ 2008 Jon McFarland, 2008-01-03 In *Mastering Autodesk VIZ 2008*, VIZ expert Jon McFarland teaches you how to get the most out of Autodesk's potent 3D modeling, animation, and rendering software. As you follow real-world examples, you'll quickly see how to apply these techniques to your design projects. Whether you're entirely new to VIZ or simply want to master its newest features, this book offers the clear explanations and step-by-step instruction you need to make VIZ work for you. Coverage includes: Finding your way around in VIZ Linking to AutoCAD files Modeling using primitive and compound objects Editing using modifiers and sub-objects Creating complex shapes with surface modeling tools

Managing your design data more efficiently
Simulating lighting effects accurately with global illumination
Rendering real-world surfaces with Architectural material
Setting up animated walk-throughs
Using radiosity to create accurate scene lighting
Using mental ray to achieve the most realistic rendering
Producing design presentation views
Understanding keyframes and function curve editing

Chomsky's Universal Grammar Vivian Cook,Mark Newson,2014-03 This new edition introduces the reader to Noam Chomsky's theory of language by setting the specifics of syntactic analysis in the framework of his general ideas. It explains its fundamental concepts and provides an overview and history of the theory.

Bigger Than Life Jeffrey Escoffier,2010-10-19 Hardcore porn - both the straight and gay varieties - entered mainstream American culture in the 1970s as the sexual revolution swept away many of the cultural inhibitions and legal restraints on explicit sexual expression. The first porn movie ever to be reviewed by Variety, the entertainment industry's leading trade journal, was Wakefield Poole's Boys in the Sand (1971), a sexually-explicit gay movie shot on Fire Island with a budget of \$4000. Moviegoers, celebrities and critics - both gay and straight - flocked to see Boys in the Sand when it opened in mainstream movie theaters in New York, Los Angeles and San Francisco. Within a year, Deep Throat, a heterosexual hardcore feature opened to rave reviews and a huge box office - exceeding that of many mainstream Hollywood features. Almost all of those involved in making "commercial" gay pornographic movies began as amateurs in a field that had virtually never existed before, either as art or commerce. Many of their "underground" predecessors had repeatedly suffered arrest and other forms of legal harassment. There was no developed gay market and any films made commercially were shown in adult x-rated theaters. After the Stonewall riots and the emergence of the gay liberation movement in 1969, a number of entrepreneurs began to make gay adult movies for the new mail order market. The gay porn film industry grew dramatically during the next thirty years and transformed the way men - gay men in particular - conceived of masculinity and their sexuality. Bigger Than Life tells that story.
