The F.A.T. Manual Geraldine Juárez, 2013 In more than five years of activity, the Free Art and Technology Lab produced an impressive series of projects, all developed with open source software, shared online and documented in a way that allows everybody to copy, improve, abuse or simply use them. This approach situates F.A.T. Lab in a long tradition of DIY, processual, sharable artistic practices based on instructionals, and reveals a democratic idea of art where Fluxus scores meet hacker culture (and rap music). The F.A.T. Manual is a selection of more than 100 projects, done in the belief that printing these bits on paper will allow them to spread in a different way, infiltrate other contexts, and germinate. An archive, a catalogue, a user manual and a software handbook. F.A.T. Lab is an organization dedicated to enriching the public domain through the research and development of creative technologies and media. Co-produced by Link Editions and MU in collaboration with XPO Gallery, Paris.

Make Just One Change features the voices and experiences of teachers in classrooms across the country to illustrate the use of the Question Formulation Technique across grade levels and subject areas and with different kinds of learners.

Job Shop Lean Shahrukh A. Irani, 2020-05-04 In the 1950's, the design and implementation of the Toyota Production System (TPS) within Toyota had begun. In the 1960's, Group Technology (GT) and Cellular Manufacturing (CM) were used by Serck Audco Valves, a high-mix low-volume (HMLV) manufacturer in the United Kingdom, to guide enterprise-wide transformation. In 1996, the publication of the book *Lean Thinking* introduced the entire world to Lean. *Job Shop Lean* integrates Lean with GT and CM by using the five Principles of Lean to guide its implementation: (1) identify value, (2) map the value stream, (3) create flow, (4) establish pull, and (5) seek perfection. Unfortunately, the tools typically used to implement the Principles of Lean are incapable of solving the three Industrial Engineering problems that HMLV manufacturers face when implementing Lean: (1) finding the product families in a product mix with hundreds of different products, (2) designing a flexible factory layout that fits hundreds of different product routings, and (3) scheduling a multi-product multi-machine production system subject to finite capacity constraints. Based on the Author's 20+ years of learning, teaching, researching, and implementing *Job Shop Lean* since 1999, this book Describes the concepts, tools, software, implementation methodology, and barriers to successful implementation of Lean in HMLV production systems Utilizes Production Flow Analysis instead of Value Stream Mapping to eliminate waste in different levels of any HMLV manufacturing enterprise Solves the three Industrial Engineering problems that were mentioned earlier using software like PFAST (Production Flow Analysis and Simplification Toolkit), Sgetti and Schedlyzer Explains how the one-at-a-time implementation of manufacturing cells constitutes a long-term strategy for Continuous Improvement Explains how product families and manufacturing cells are the basis for implementing flexible automation, machine monitoring, virtual cells, Manufacturing Execution Systems, and other elements of Industry 4.0 Teaches a new method, Value Network Mapping, to visualize large multi-product multi-machine production systems whose Value Streams share many processes Includes real success stories of *Job Shop Lean* implementation in a variety of production systems such as a forge shop, a machine shop, a fabrication facility and a shipping department Encourages any HMLV manufacturer planning to implement *Job Shop Lean* to leverage the co-curricular and extracurricular programs of an Industrial Engineering department

River of Dust Virginia Pye,2013-05-14 On the windswept plains of northwestern China, Mongol bandits swoop down upon an American missionary couple and steal their small child. The Reverend sets out in search of the boy and becomes lost in the rugged, corrupt countryside populated by opium dens, sly nomadic warlords and traveling circuses. This upright Midwestern minister develops a following among the Chinese peasants and is christened Ghost Man for what they perceive are his otherworldly powers. Grace, his young ingénue wife, pregnant with their second child, takes to her sick bed in the mission compound, where visions of her stolen child and lost husband begin to beckon to her from across the plains. The foreign couple's savvy and dedicated Chinese servants, Ahcho and Mai Lin, accompany and eventually lead them through dangerous territory to find one another again. With their Christian beliefs sorely tested, their concept of fate expanded, and their physical health rapidly deteriorating, the Reverend and Grace may finally discover an understanding between them that is greater than the vast distance they have come.
