SOCIAL INTELLIGENCE Prabhu TL, You are aware of other people's thoughts and feelings. You understand why they do things. Social intelligence refers to a person's ability to understand and

manage interpersonal relationships. It is distinct from a person's IQ or "book smarts." It includes an individual's ability to understand, and act on, the feelings, thoughts, and behaviors of other people. This type of intelligence can take place "in the moment" of face-to-face conversations but also appears during times of deliberate thinking. It involves emotional intelligence and self-awareness. Examples of social intelligence include knowing when to talk or listen, what to say, and what to do. Timing is a big part of social intelligence. For example, someone who is imperceptive, may tell a funny joke – but at the wrong time, or not show enough interest when meeting someone new. WHY DOES IT MATTER? Social intelligence helps individuals build relationships – and is important to numerous aspects of a person's life. It allows an individual to form friendships and alliances. And, it assists a person against being taken advantage of. People with social intelligence can "read" other people's faces and know what motivates them. Social intelligence builds over time and as a person ages. In this sense, it is similar to the character strength of perspective. On a group level, social intelligence is what allows us to function as humans. We are social beings and rely on each other's cooperation. By understanding ourselves and other people, we can find ways to collaborate for mutual benefit. Strong leaders often possess social intelligence in abundance. In order to motivate people, leaders must form relationships and inspire others to want to do what needs to be done. What are the key elements

of social intelligence? Verbal Fluency and Conversational Skills. You can easily spot someone with lots of SI at a party or social gathering because he or she knows how to “work the room.” The highly socially intelligent person can carry on conversations with a wide variety of people, and is tactful and appropriate in what is said. Combined, these represent what are called “social expressiveness skills.” Knowledge of Social Roles, Rules, and Scripts. Socially intelligent individuals learn how to play various social roles. They are also well versed in the informal rules, or “norms,” that govern social interaction. In other words, they “know how to play the game” of social interaction. As a result, they come off as socially sophisticated and wise. Effective Listening Skills. Socially intelligent persons are great listeners. As a result, others come away from an interaction with an SI person feeling as if they had a good “connection” with him or her. Understanding What Makes Other People Tick. Great people watchers, individuals high in social intelligence attune themselves to what others are saying, and how they are behaving, in order to try to “read” what the other person is thinking or feeling. Understanding emotions is part of Emotional Intelligence, and Social Intelligence and Emotional Intelligence are correlated – people who are especially skilled are high on both. Role Playing and Social Self-Efficacy. The socially intelligent person knows how to play different social roles – allowing him or her to feel comfortable with all types of people. As a result, the SI individual feels socially self-confident

and effective – what psychologists call “social self-efficacy.” Impression Management Skills. Persons with SI are concerned with the impression they are making on others. They engage in what I call the “Dangerous Art of Impression Management,” which is a delicate balance between managing and controlling the image you portray to others and being reasonably “authentic” and letting others see the true self. This is perhaps the most complex element of social intelligence. How can you develop social intelligence? It takes effort and hard work. Begin by paying more attention to the social world around you. Work on becoming a better speaker or conversationalist. Networking organizations, or speaking groups, such as Toastmasters, are good at helping develop basic communication skills. Work on becoming a more effective listener, through what is called “active listening” where you reflect back what you believe the speaker said in order to ensure clear understanding. Most importantly, study social situations and your own behavior. Learn from your social successes and failures. I’ll give some more specific SI exercises in a future post.
