Earthquakes Maria Gill, 2018 Thousands of Earthquakes occur in New Zealand every year, some so small we don't feel them. Others such as the recent quakes in Christchurch and Kaikoura cause significant damage. This book explains what causes earthquakes and why New Zealand has so many, what types of quake occur and the most frequently affected areas of the country. It also advises what to do if you experience one.

Canterbury Quake Desna Wallace, 2020-02 An eleven year olds heartfelt account of life through the Canterbury quakes and shakes of 2010/11. In the dark of night, with a terrifying rumble and a deafening roar, Maddys world turns upside down! Instead of celebrating her birthday, suddenly words like liquefaction, aftershocks and state of emergency bubble into her vocabulary. As Maddy navigates the bumps and crashes of life after the big quakes, she discovers how strong family can be, and finds friendship in the most unlikely places.

Living on Shaky Ground Matthew Wright, 2014-09-26 The extraordinary story of New Zealand's earthquakes, the science and forces that shape them, and the danger of earthquakes yet to hit. This is the story of New Zealand's turbulent tectonics, how earthquakes are measured and described, and how scientists are predicting future shakes across New Zealand. It features some of New Zealand's lesser-known quakes, such as the most powerful quake ever recorded in New Zealand, quakes that have had deadly consequences, and the most recent tremors effecting Wellington and Marlborough. On Shaking Ground has an accessible text with in-depth science. It explains why New Zealand is effected by earthquakes and how damage is caused, with accompanying diagrams and data from GNS Science. It also includes the long history of New

Zealand's earthquakes with gripping photographs and personal accounts. The must-have guide for anyone affected by earthquakes in New Zealand, those curious to know what's next in-store, or anyone studying the evolving science behind them.

Portacom City Paul Gorman, 2017-12-08 The ripples the earthquake sent across the region and down the years continue to affect our lives, our livelihoods and endeavours. On 4 September 2010, a magnitude 7.1 earthquake struck 30 kilometres west of Christchurch. Half a year later, a 6.3 aftershock hit Christchurch, killing 185 people and causing widespread damage throughout the city. In November 2016, multiple faults ruptured near Kaikōura in a massive 7.8 earthquake. Paul Gorman reported on the Christchurch and Kaikōura earthquakes. In Portacom City he describes his own deeply personal story of working as a journalist during the quakes, while also speaking more broadly about the challenges that confront reporters at times of crisis.

Volcanoes and Earthquakes Gordon Ell, Sarah Ell, 2019-06-15 Get ready for a new take on New Zealand society, history and geography in one of the first two books in The NZ Series, a snappily designed and fact-packed collection for intermediate and high-school age readers. Here in striking and clear terms are the earth movements above and below New Zealand - with investigation into the history of volcanic and earthquake activity, leading to the present-day status for the country. The informative, easy-to-understand text is accompanied by numerous explanatory diagrams, historical and modern-day photographs and 'Fact File' boxes. Ours is a physically small country but it packs a powerful amount of geological portraiture into its landscape, as does the keen design of Volcanoes and Earthquakes in New Zealand.

Earthquake Chris Moore, Fairfax Media (Firm), 2011-01-01 Powerfully and movingly written by a number of Press staffers and illustrated with striking images from the Press team. DVD includes footage taken 10 minutes after the quake, many personal stories plus the incredible footage that screened at the Day of Remembrance. Content includes: - Prelude to a disaster - What Christchurch was doing on February 22. How the debate of the September 4/Boxing Day quakes was continuing, how those events had shaped lives. - The Event - First hand accounts, the effect on buildings/people. How different areas of the city were affected - Lyttelton/Sumner/Redcliffs. CTV/Forsythe Barr/Pyne Gould Buildings. - An overview of the first hours after the main tremor, extending it into the first night. The official response. The international response. - The science of the earthquake - where centred, duration, energy released etc. Lots of graphs, maps and data. - Survivors stories - the mounting death toll, stories of tragedy and heroism, loss of heritage buildings, Grand Chancellor Hotel, international and local response (hospitals, search teams etc) - The aftermath, the search and rescue/recovery, the civil defence team, the emerging toll, the stories (The Bagpipe Kid, babies born, Farmy army), eastern suburbs claims of being forgotten, the student army, I thought you were dead column, looters in court. - Through to the Day Of Remembrance Grief is the price we pay for love (Prince William) - The rebuilding of Christchurch.

The Murchison Earthquake Kevin Boon, 1986-07-01

The Post-Earthquake City Paul Cloke, David

Conradson, Eric Pawson, Harvey C. Perkins, 2023-02-15 This book critically assesses Christchurch, New Zealand as an evolving post-earthquake city. It examines the impact of the 2010–13 Canterbury earthquake sequence, employing a chronological structure to consider ‘damage and displacement’, ‘recovery and renewal’ and ‘the city in transition’. It offers a framework for understanding the multiple experiences and realities of post-earthquake recovery. It details how the rebuilding of the city has occurred and examines what has arisen in the context of an unprecedented opportunity to refashion land uses and social experience from the ground up. A recurring tension is observed between the desire and tendency of some to reproduce previous urban orthodoxies and the experimental efforts of others to fashion new cultures of progressive place-making and attention to the more-than-human city. The book offers several lessons for understanding disaster recovery in cities. It illuminates the opportunities disasters create for both the reassertion of the familiar and the emergence of the new; highlights the divergence of lived experience during recovery; and considers the extent to which a post-disaster city is prepared for likely climate futures. The book will be valuable reading for critical disaster researchers as well as geographers, sociologists, urban planners and policy makers interested in disaster recovery.

Christchurch Ruptures Katie Pickles, 2016-03-15 The devastating earthquake that hit Christchurch in 2011 did more than rupture the surface of the city, argues historian Katie Pickles. It created a definitive endpoint to a history shaped by omission, by mythmaking, and by ideological

storytelling. In this multi-layered BWB Text, Pickles uncovers what was lost that February day, drawing out the different threads of Christchurch's colonial history and demonstrating why we should not attempt to knit them back together. This is an incisive analysis of the way a city's character is interlinked with its geo-spatial appearance: when the latter changes, so too must the former.

We Can Make A Life Chessie Henry, 2019-03-01 Hours after the 2011 Christchurch Earthquake, Kaikoura-based doctor Chris Henry crawled through the burning CTV building to rescue those who were trapped. Six years later, his daughter Chessie interviews him in an attempt to understand the trauma that led her father to burnout, in the process unravelling stories and memories from her own remarkable family history. Chessie rebuilds her family's lives on the page, from her parents' honeymoon across Africa, to living in Tokelau as one of five children under ten before returning to New Zealand, where her mother would set her heart and home in the Clarence Valley only to see it devastated in the 2016 Kaikoura Earthquake, and the family displaced. Written with the same love and compassion that defines her family's courage and strength, We Can Make a Life is an extraordinary memoir about the psychological cost of heroism, home and belonging, and how a family made a life together. I'd always felt that I was emotional because I had been raised by emotional people: talking right from the beginning, unafraid of tears or love or closeness. Was it entrenched in us, to feel things too much? Would we have to fight it—the black shape at the edges, bounding after us, a smudge of darkness in an otherwise colourful scene.

Earthquake Engineering Alberto Bernal,1992-01-01

The official proceedings of the 10th world conference on earthquake engineering in Madrid. Coverage includes damage in recent earthquakes, seismic risk and hazard, site effects, structural analysis and design, seismic codes and standards, urban planning, and expert system application.

Resilience and Recovery in Asian Disasters Daniel P. Aldrich, Sothea Oum, Yasuyuki Sawada, 2014-10-06 This book establishes a new, holistic framework for disaster recovery and mitigation, providing a multidisciplinary perspective on the field of risk management strategies and societal and communal resilience. Going beyond narrow approaches that are all too prevalent in the field, this work builds on an optimum combination of community-level networks, private market mechanisms and state-based assistance strategies. Its chapters describe best practices in the field and elucidate cutting-edge research on recovery, highlighting the interaction between government, industry and civil society. The book uses new data from a number of recent disasters across southeast and east Asia to understand the interactions among residents, the state, and catastrophe, drawing on events in Malaysia, Vietnam, Cambodia, Japan, China and Thailand. Grounded in theories of risk mitigation and empirical research, the book provides practical guidance for decision makers along with future research directions for scholars. The Asian region is highly prone to natural disasters which devastate large and mostly poor populations. This book deals with some of the root issues underlying the continued vulnerability of these societies to catastrophic shocks. The book is unusual in that it comprehensively covers resilience and fragilities from community levels to market mechanisms and governance and it analyses these issues in

very different economic and structural settings. Recommended for development and disaster risk managers—without question. Professor Debarati Guha-Sapir Director, Centre for Research on the Epidemiology of Disasters (CRED); Professor, University of Louvain, Research Institute Health and Society.

Awesome Forces Geoff Hicks, Hamish Campbell, 2012 Informative, generously illustrated, and written by some of New Zealand's leading scientists, this massively revised and updated edition of Te Papa Press's best-selling title is now more relevant than ever. With all-new information on climate change and the social and emotional impact of disasters, this book is a fascinating and essential resource.

Intended Evacuation Behaviour in a Local Earthquake and Tsunami at Napier, New Zealand S. Fraser, G. S. Leonard, David Moore Johnston, 2013

Soil Liquefaction during Recent Large-Scale Earthquakes Rolando P. Orense, Ikuro Towhata, Nawawi Chouw, 2014-04-15 Soil Liquefaction during Recent Large-Scale Earthquakes contains selected papers presented at the New Zealand - Japan Workshop on Soil Liquefaction during Recent Large-Scale Earthquakes (Auckland, New Zealand, 2-3 December 2013). The 2010-2011 Canterbury earthquakes in New Zealand and the 2011 off the Pacific Coast of Tohoku Earthquake in Japan have caused significant damage to many residential houses due to varying degrees of soil liquefaction over a very wide extent of urban areas unseen in past destructive earthquakes. While soil liquefaction occurred in naturally-sedimented soil formations in Christchurch, most of the areas which liquefied in Tokyo Bay area were reclaimed soil and artificial fill deposits, thus providing researchers with a wide range of soil deposits to characterize soil and site response to large-scale earthquake shaking. Although

these earthquakes in New Zealand and Japan caused extensive damage to life and property, they also serve as an opportunity to understand better the response of soil and building foundations to such large-scale earthquake shaking. With the wealth of information obtained in the aftermath of both earthquakes, information-sharing and knowledge-exchange are vital in arriving at liquefaction-proof urban areas in both countries. Data regarding the observed damage to residential houses as well as the lessons learnt are essential for the rebuilding efforts in the coming years and in mitigating buildings located in regions with high liquefaction potential. As part of the MBIE-JSPS collaborative research programme, the Geomechanics Group of the University of Auckland and the Geotechnical Engineering Laboratory of the University of Tokyo co-hosted the workshop to bring together researchers to review the findings and observations from recent large-scale earthquakes related to soil liquefaction and discuss possible measures to mitigate future damage. Soil Liquefaction during Recent Large-Scale Earthquakes will be of great interest to researchers, academics, industry practitioners and other professionals involved in Earthquake Geotechnical Engineering, Foundation Engineering, Earthquake Engineering and Structural Dynamics.

Canterbury Quake Desna Wallace, 2014-02-01 Maddy is a typical 11-year-old girl living in Christchurch - her diary starts in early August with her desperate for a mobile phone, and talking about her best friend Laura, Glee and singing in the school choir, homework, teachers, her siblings ... And then the first earthquake hits on 4 September and her world changes--Publisher information.
