New York Minute Bob Mayer, 2019-05-03 First Blood meets Breaking Bad, but this time the bad protects the innocent. The last time former Green Beret Will Kane was involved in killing someone it made the cover of LIFE Magazine. Eight years later he's getting pushed to the edge of that precipice he vowed never to go over again. New York City, summer 1977. The Bronx is burning. The twin towers of the new World Trade Center loom over the skyline. Son of Sam. Star Wars. Studio 54. The Five Families. The city faces bankruptcy and unrest seethes. On the dark streets of a city the rest of the country believes is going down the toilet, Vietnam vet Kane's life mirrors his hometown. Carrying a past cratered with death and tragedy, Kane has been working as a 'fixer' for a high-priced lawyer since returning to New York in disgrace. But is he really fixing anything? It begins when he takes a compromising picture as part of the job. As the long hot summer boils, so does Kane as the mob, the CIA, the IRA and other forces are brought to bear on him. What they all seem to have forgotten, and Kane wishes he could, is that he is a highly trained and experienced warrior. A skilled killer. What should a good man do when faced with evil that the law can't touch? Kane faces threats, betrayal and shadows from his past, and then, on 13 July 1977, the Blackout occurs and Kane explodes. For fans of the Green Beret series of books, this book is a prelude to the entire series, and introduces a new character in his own series. Dave Riley is here as Will Kane's 17 year old younger cousin. Publishers Weekly reference The Line: Mayer has crafted a thriller in the tradition of John Grisham's The Firm. Publishers Weekly reference Lost Girls: Excellent writing and well-drawn, appealing characters help make this another taut, crackling read from Mayer.

Disaster Risk Reduction Mark Pelling, Ben Wisner, 2012-05-16 Published with ProVention Consortium, UNDP and UN-Habitat 'This excellent book is essential reading for those concerned with urban risk and its reduction in Africa, the most rapidly urbanizing region of the world.' Professor Jo Beall, Development Studies Institute, London School of Economics 'At last a book that recognizes the impacts of disasters on Africa's 350 million urban dwellers, including the many disasters that get overlooked and go unrecorded. But also a book that, through careful case studies, shows what creates disaster risk and what local measures can be taken to address it.' David Satterthwaite, International Institute for Environment and Development (IIED). 'This innovative volume combines the latest conceptualisations of urban disaster risk and vulnerability with case studies from across the

African continent on how existing and innovative information can inform efforts to address the problems. Coverage ranges from the major catastrophes of news headlines to small, everyday disasters with which poor urban residents have to cope in their survival strategies. Written by international authorities and local specialists, this extremely useful book should find a place in the hands of academics and practitioners alike.' Professor David Simon, Department of Geography, Royal Holloway, University of London This is a one-of-a-kind book packed with original research and offering an innovative way of thinking about the reduction of risk in rapidly urbanizing cities across the globe. It is a must-have for professionals, researchers and policy makers. The book addresses four inter-related themes critical for urban risk reduction: environment; livelihood; urban governance and the generation of urban risks. Its focus is on Africa, the most rapidly urbanizing world region, but it illustrates global processes. Part one reviews development, urbanization and disaster risk in Africa as a whole, identifies state-of-the-art practices and policies for building urban resilience and provides a tool kit for urban risk reduction. It also presents a powerful conceptual framework to analyse and compare disaster risk and resilience in different cities and communities. Part two presents detailed case studies from Algeria, Ghana, Senegal, Kenya, Tanzania and South Africa illustrating vulnerability to hazards ranging from earthquake to shack fire, environmental health hazards, traffic hazards and flooding. Part three looks to the future and outlines a vision for a safer urban Africa based on achieving gains in human security through inclusive governance and investment in the creative capacities of Africa's urban dwellers. With foreword by Anna Tibaijuka, Executive Director, UN-HABITAT

PREPARE NOW SURVIVE LATER Bob Mayer, 2016-12-07 I wrote this book for my grandchildren. My son, his wife and their children moved to San Diego and I saw a report that there was an earthquake alert. I became concerned about how prepared they were. Not just for a possible earthquake, but, as importantly, for the chaotic time after a disaster. I reached into my training and experience and This is the most important book you will ever own. It is also the most useful gift you could give someone you care about. Preparation is the most critical component of survival and the most easily accomplished because you can do it NOW. In fact, you have to do it NOW. And you need to plan to survive as a team/family. You, and those you love, will definitely face one or more of the situations covered: power outage, flood, earthquake, hurricane, tornado, wild fire and more. This book gives you a step-by-step procedure to prepare for these emergencies and in the confusion afterwards. Easy-to-follow checklists and specific directions on what to get and do help you prepare. A companion book, *Survive Now. Thrive Later* is the handbook for being in an actual survival or emergency situation But the most important thing is to Prepare Now!

It covers a wide range of topics, reflecting the most recent debates but also older and pioneering discussions in the academic field of disaster studies as well as in the policy and practical areas of disaster risk reduction (DRR). Crowdsourcing Geographic Knowledge Daniel Sui, Sarah Elwood, Michael Goodchild, 2012-08-10 The phenomenon of volunteered geographic information is part of a profound transformation in how geographic data, information, and knowledge are produced and circulated. By situating volunteered geographic information (VGI) in the context of big-data deluge and the data-intensive inquiry, the 20 chapters in this book explore both the theories and applications of crowdsourcing for geographic knowledge production with three sections focusing on 1). VGI, Public Participation, and Citizen Science; 2). Geographic Knowledge Production and Place Inference; and 3). Emerging Applications and New Challenges. This book argues that future progress in VGI research depends in large part on building strong linkages with diverse geographic scholarship. Contributors of this volume situate VGI research in geography's core concerns with space and place, and offer several ways of addressing persistent challenges of quality assurance in VGI. This book positions VGI as part of a shift toward hybrid epistemologies, and potentially a fourth paradigm of

data-intensive inquiry across the sciences. It also considers the implications of VGI and the exaflood for further time-space compression and new forms, degrees of digital inequality, the renewed importance of geography, and the role of crowdsourcing for geographic knowledge production.
