Carbon footprint calculators for citizens Marja Salo, Maija K. Mattinen, 2017-08-16 In this report, we look into Nordic carbon footprint calculators and selected benchmarks from other countries. We present data on 10 carbon footprint calculators for public use. The focus is on the features, recorded number of users, and experiences on using the calculators in campaigns and research projects. The purpose is to highlight good practices in the design and use of calculators for ordinary citizens which can be used to introduce the role of consumption choices in climate change mitigation. The report provides suggestions for the future development of existing or new calculator initiatives. The study was carried out by the Finnish Environment Institute, financed by the Nordic Council of Ministers, administrated by the Sustainable Consumption and Production Working Group and guided by a steering group consisting of representatives from Finland, Iceland, Norway and Sweden.

Pollutant Discharge and Water Quality in Urbanisation Yoshiaki Tsuzuki, 2014-03-26 The main purpose of water quality monitoring may be seen as evaluating water quality conformity against water quality standards, especially for administrative purposes. Moreover, water quality monitoring data can be applied to estimate and evaluate pollutant loads in rivers. Chronological water quality fluctuations and vertical water quality profiles in water bodies are also important when taking into account the effects of land-based pollutants on coastal sea and estuary water quality. This book discusses the relationships between pollutant discharge and water quality, taking into account urban development and indicators like the pollutant load per capita flowing into the water body (PLCwb), an index used to evaluate the contribution of municipal wastewater pollutant discharge to pollutant loads flowing into ambient water bodies such as coastal zones, bays and lakes.

Right College, Right Price Frank Palmasani, 2013-01-01 In the midst of a \$1 trillion student loan debt crisis, students and their families have had the same question on their minds: Can I afford to pay for a college education? Good news: the answer is yes. By shifting the way we think about the college search, every family can find the right college at the right price. Right College, Right Price helps you discover the real cost of a college (after scholarships, work study, loans, etc.) before you even begin to apply—saving you hundreds of dollars in application fees and thousands of dollars in tuition. This guide will walk you through simple, but powerful, steps of the Financial Fit program, which will allow you to: Calculate exactly how much you can afford to spend on college. Find great colleges you can afford. Understand the ins and outs of the financial aid process. Choose the right college and avoid excessive debt. With Right College, Right Price, your student will not only have access to a college education, but also a life after college—without the burden of excessive student loan debt.

Design and Quality Considerations for Developing Mobile Apps for Medication Management: Emerging Research and Opportunities Yap, Kevin, Ali, Eskinder Eshetu, Chew, Lita, 2020-07-31 Medication management is an essential component of therapeutic success in the treatment of chronic diseases. However, patients who do not regularly take their prescribed medications are a primary concern of health systems worldwide. A significant proportion of patients on chronic medications fail to adhere to their treatments, and suboptimal adherence leads to dire clinical and financial consequences on the personal level. Moreover, non-adherence can adversely impact public healthcare costs and the clinical outcomes of patients. Design and Quality Considerations for Developing Mobile Apps for Medication Management: Emerging Research and Opportunities is a collection of innovative research that combines theory and practice on optimizing strategies to improve medication adherence and overall health and wellbeing in patients through the design of usable and reliable mobile app-based systems. Highlighting a broad range of topics including pharmaceutical care, quality assessment, and health behavior frameworks, this book is ideally designed for clinicians, pharmacists, healthcare providers, programmers, software developers, researchers, academicians, and students.

Journal on Data Semantics I Stefano Spaccapietra, Sal March, Karl Aberer, 2003-10-09 This book constitutes the first volume of the first journal in the new LNCS Jo- nal Subline, the Journal on Data Semantics. Publishing a journal in a book series might come as a surprise to customers, readers, and librarians, thus we would like to provide some background information and our motivation for introducing this new LNCS subline. As a consequence of the very tight interaction between the Lecture Notes in Computer Science series and the international computer science research and development community, we receive quite a few proposals for new archive journals. From the successful launch of workshops or conferences and publication of their proceedings in the LNCS series, it might seem like a natural step to approach the publisher about launching a journal once this specific field has gained a certain level of maturity and stability. Each year we receive about a dozen such proposals and even more informal inquiries. Like other publishers, it has been our experience that launching a new journal and making it a long-term success is a hard job nowadays, due to a generally difficult market situation, and library budget restrictions in particular. Because many of the proceedings in LNCS, and especially many of the LNCS post-proceedings, apply the same strict reviewing and selection criteria as established journals, we started discussing with proposers of new journals the alternative of devoting a few volumes in LNCS to their field, instead of going through the painful Sisyphean adventure of establishing a new journal on its own.
