HCI International 2014 - Posters' Extended Abstracts Constantine Stephanidis,2014-05-19 This is the second of a two-volume set (CCIS 434 and CCIS 435) that constitutes the extended abstracts of the posters presented during the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014 and consisting of 14 thematic conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences were carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The extended abstracts were carefully reviewed and selected for inclusion in this two-volume set. This

volume contains posters' extended abstracts addressing the following major topics: social media and social networks; learning and education; design for all; accessibility and assistive environments; design for aging; games and exergames; health and well-being; ergonomics and safety; HCI in business, tourism and transport; human-human and human-agent communication; user experience case studies.

Who Needs Light? Kathryn E. May, PsyD,2011-12-06 *Who Needs Light?* is a prescription for what ails the general suffering public in our families and communities throughout the world's philosophically Cartesian cultures where thought is seen as more valuable than emotion. Beginning with infant brain development, the author identifies startlingly familiar influences of Darkness from a new point of view-- that of the difference between Head People and Heart People. The book includes a guide which

defines the characteristics and habits of Abusive Personality Types. In lay terms, it shows how to identify and avoid these archetypal Children of Darkness wherever one might find them. Dr. May uses case studies, meditative exercises, original poetry, science and oral history to lead us step-by-step through the oppressive forces of materialism, self-centeredness and authoritarian religions which have shaped our present-day civilization. Her final vision is one of hope and radical spiritual evolution.

Successful Qualitative Research Virginia Braun, Victoria Clarke, 2013-03-22 *Shortlisted for the BPS Book Award 2014 in the Textbook Category* *Winner of the 2014 Distinguished Publication Award (DPA) from the Association for Women in Psychology (AWP)* Successful Qualitative Research: A Practical Guide for Beginners is an accessible, practical textbook. It sidesteps detailed theoretical discussion in favour of providing a comprehensive overview of strategic tips and skills for starting and

completing successful qualitative research. Uniquely, the authors provide a 'patterns framework' to qualitative data analysis in this book, also known as 'thematic analysis'. The authors walk you through a basic thematic approach, and compare and contrast this with other approaches. This discussion of commonalities, explaining why and when each method should be used, and in the context of looking at patterns, will provide you with complete confidence for your qualitative research journey. Key features of this textbook: Full of useful tips and strategies for successful qualitative work, for example considering the nervous student not just the beginner student. Skills-based, utilising a range of pedagogical features to encourage you to apply particular techniques and learn from your experience. The authors use the same dataset throughout - reproduced in full (with associated research materials) on the companion website - to help you make comparisons across different analytical approaches. A comprehensive suite of student support materials, including practice exam questions, can be found online at www.sagepub.com/braunandclarke. This textbook will be an essential textbook for undergraduates and postgraduates taking a course in qualitative research or using qualitative

approaches in a research project. Electronic Inspection Copy available for instructors here

Applied Choice Analysis David A. Hensher, John M. Rose, William H. Greene, 2005-06-02 Almost without exception, everything human beings undertake involves a choice. In recent years there has been a growing interest in the development and application of quantitative statistical methods to study choices made by individuals with the purpose of gaining a better understanding both of how choices are made and of forecasting future choice responses. In this primer the authors provide an unintimidating introduction to the main techniques of choice analysis and include detail on themes such as data collection and preparation, model estimation and interpretation and the design of choice experiments. A companion website to the book provides practice data sets and software to estimate the main discrete choice models such as multinomial logit, nested logit and mixed logit. This primer will be an invaluable resource to students as well as of immense value to consultants and professionals, researchers and anyone else interested in choice analysis and modelling.

Provisional Measures before International Courts and Tribunals Cameron A. Miles, 2017-01-26

Since the decision of the International Court of Justice in *LaGrand* (Germany v United States of America), the law of provisional measures has expanded dramatically both in terms of the volume of relevant decisions and the complexity of their reasoning. *Provisional Measures before International Courts and Tribunals* seeks to describe and evaluate this expansion, and to undertake a comparative analysis of provisional measures jurisprudence in a range of significant international courts and tribunals so as to situate interim relief in the wider procedure of those adjudicative bodies. The result is the first comprehensive examination of the law of provisional measures in over a decade, and the first to compare investor-state arbitration jurisprudence with more traditional inter-state courts and tribunals.
