Fast Fulfillment Sanchoy Das, 2021-08-09 This book provides insights and process details of how to design and build disruptive innovations, so that you are not flying blind or just throwing darts in an effort to pivot/expand to the online order fulfillment world. The fulfillment machine is the delivery side infrastructure of an online business, it is the physical and digital innovations which make it possible to immediately deliver customer orders. Customers want to order everything, while sitting on their couch and they want immediate fulfillment. Fast fulfillment is happening, and everyone knows that, but most are scared of it. Many experts describe the wonders of online retail, but none explains what fast fulfillment is or propose a solution to building a fast fulfillment machine. Managers are frustrated just reading about how great Amazon is, and how startups are innovating fantastic technology driven processes. Here is the book, written in a simple easy to read style which unravels the technical mystery of the fulfillment machine. It levels the knowledge field, reveals the secrets of fast fulfillment, and helps the reader construct a plan to innovate and be ready to face the disruptors. What is happening in retail is contagious across industries, there are no wide moats. Managers and engineers are rushing to redesign their supply chains into fast fulfillment machines. This book provides insights and process details of how to design and build disruptive innovations, so that you are not flying blind or just throwing darts in an effort to pivot/expand to the online order fulfillment world. The book does not story-tell the fast fulfillment machine, it is informative and instructive.

Sino-Soviet Dialogue on the Problem of War S. Yin, 2012-12-06 The author has spent upwards of ten years in working on this book. His objective is to clarify the military aspect of the Moscow-Peking dialogue which has not yet received its deserved treatment. The apogee of that dialogue seems to have been passed toward the end of the rule of Khrushchev. Yet the Vietnam war spawns fresh contention. Our cover age will span the development from 1956 to the present. The beginning of the dispute with regard to the origins of war in general is taken up in the first two chapters. The next three chapters discuss the several types of war with the frame of reference set in what now appears to be a quondam era. But the principle differences between the disputants are just as outstanding today as they were then. The penultimate chapter is somewhat wide in scope in order to deal with the larger and more intensely bitter polemics evolving after Khrushchev left office. There have been many new and startling views held by both sides since then, views splitting them poles apart. Obviously at issue now is the question of Sino-Soviet peaceful coexistence. Our work, obviously, cannot wait until that question is

answered to be finished. The final chapter concludes our study. To write of subjects as dynamic as this one is a challenge because they are current affairs. Due to the swift change of events, no sooner is our typescript put to press than it needs a revision.

Paratransit in African Cities Roger Behrens, Dorothy McCormick, David Mfinanga, 2015-09-07 Public transport systems in contemporary Sub-Saharan African cities are heavily reliant upon paratransit services. These services are defined as informal transportation which operates between the public and individual private spheres. In Africa paratransit is characterized by low quality of vehicles and chaotic management but it also provides cheap, accessible and flexible transport solutions for the urban poor. It is typically poorly regulated and operates as a set of informal businesses. A common result of weak public sector regulation and a fare strategy in which owners claim a fixed daily revenue target and drivers who keep the variable balance as income, is destructive competition and poor quality of service. There is an incontrovertible case for improving the quality, reliability and coverage of public transport systems, and some city governments have attempted to do so by initiating reform projects that envisage the phased replacement of paratransit operations with formalised bus rapid transit systems. In this book the authors argue that there are, however, path dependencies and constraints that limit the possible extent of public transport system reform. Paratransit operations also have some inherent advantages with respect to demand responsiveness and service innovation. Attempts to eradicate paratransit may be neither pragmatic nor strategic. Two future scenarios are likely: hybrid systems comprised of both paratransit and formally planned modes; and systems improved by upgrades and strengthened regulation of existing paratransit services. The business strategies and aspirations of incumbent paratransit operators in three case cities – Cape Town, Dar es Salaam and Nairobi – are discussed, as well as their attitudes towards emerging public transport reform projects. International experiences of hybrid system regulation and paratransit business development are reviewed in order to explore policy options. The authors contend that policies recognising paratransit operators, and seeking contextually appropriate complementarity with formalised planned services, will produce greater benefits than policies ignoring their continued existence.

HIV/AIDS and the Social Consequences of Untamed Biomedicine Graham Fordham,2014-11-13 Drawing on the case of HIV/AIDS in Thailand, this book examines how anthropological and other interpretative social science research has been utilized in modeling the AIDS epidemic, and in the design and implementation of interventions. It argues that much social science research has been complicit with the forces that generated the epidemic and with the social control agendas of the state, and that as such it has increased the weight of structural violence bearing upon the afflicted. The book also questions claims of Thai AIDS control success, arguing that these can only be made at the cost of excluding categories such as intravenous drug users, the incarcerated, and homosexuals, who continue to experience extraordinarily high levels of levels of HIV infection. Considered deviant and undeserving, these persons have deliberately been excluded from harm reduction programs. Overall, this work argues for the untapped potential of anthropological research in the health field, a confident anthropology rooted in ethnography and a critical reflexivity. Crucially, it argues that in context of interdisciplinary collaborations, anthropological research must refuse relegation to the status of an adjunct discipline, and must be free epistemologically and methodologically from the universalizing assumptions and practices of biomedicine.

Restructuring Public Transport Through Bus Rapid Transit Munoz, Juan Carlos,Muñoz Abogabir Muñoz,Paiget-Seekins, Laurel,2016-01-10 Bus Rapid Transit (BRT) is commonly discussed as an affordable way for cities to build sustainable rapid transport infrastructure. This book is the first to offer an in-depth analysis of BRT, examining the opportunities it presents along with the significant challenges cities face in its implementation. A wide range of contributors from both developed and developing countries bring expertise in fields ranging from engineering, planning and public policy to economics and urban design to provide a big picture assessment of BRT as part of a process for restructuring transit systems. Academically rigorous, based on five years of research conducted by the BRT Centre of Excellence in Chile, the book is written in an accessible style making it a valuable resource for academic researchers and postgraduate students as well as policy makers and practitioners.
