Successful Qualitative Research Virginia Braun, Victoria Clarke, 2013-03-22 *Shortlisted for the BPS Book Award 2014 in the Textbook Category* *Winner of the 2014 Distinguished Publication Award (DPA) from the Association for Women in Psychology (AWP)* Successful Qualitative Research: A Practical Guide for Beginners is an accessible, practical textbook. It sidesteps detailed theoretical discussion in favour of providing a comprehensive overview of strategic tips and skills for starting and completing successful qualitative research. Uniquely, the authors provide a 'patterns framework' to qualitative data analysis in this book, also known as 'thematic analysis'. The authors walk you through a basic thematic approach, and compare and contrast this with other approaches. This discussion of commonalities, explaining why and when each method should be used, and in the context of looking at patterns, will provide you with complete confidence for your qualitative research journey. Key features of this textbook: Full of useful tips and strategies for successful qualitative work, for example considering the nervous student not just the beginner student. Skills-based, utilising a range of pedagogical features to encourage you to apply particular techniques and learn from your experience. The authors use the same dataset throughout - reproduced in full (with associated research materials) on the companion website - to help you make comparisons across different analytical approaches. A comprehensive suite of student support materials, including practice exam questions, can be found online at www.sagepub.com/braunandclarke. This textbook will be an essential textbook for undergraduates and postgraduates taking a course in qualitative research or using qualitative approaches in a research project. Separatism and the State Damien Kingsbury, 2021-02-28 This book proposes and tests a 'theory of separatism' to determine if there are key commonalities as to why separatist movements rise and what fuels them. In the post-Cold War period separatism has been on the rise. Today, there are more than 100 active separatist movements, with around 70 of them engaging in violence. This book focuses on examples from Europe, the Middle East, Africa, and Asia to highlight the commonalities found across the case studies. It examines the idea of separatism, to better understand what drives movements to break away from preexisting states; demonstrates the factors which produce both violent separatism and the rise of armed non-state actors; and shows the options for the resolution of such conflict, based on considering claims for separatism from the perspectives of separatist movements. This book will be applicable for undergraduate and postgraduate students of International Relations and International Politics as well as Conflict/Peace Studies, Anthropology and Post-Colonial Studies.

The History of al-Ṭabarī Vol. 28 Abū Jaʿfar Muḥammad ibn Jarīr al-Ṭabarī, 1995-01-01 The initial years (126-145) of al-Manṣūr's reign presented several significant challenges to nascent 'Abbāsīd hegemony, and the resulting confrontations constitute the central focus of this section of Ṭabarī's Tarikh. After Abu Jafar succeeded his brother Abū Al-'abbās as caliph, the second of the 'Abbāsīd dynasty, he moved against his recalcitrant uncle, 'Abd Allāh ibn 'Alī, and against the potential threat that he perceived in the person of the commander in Khurasan, Abu Muslim. Eliminating the latter and containing the former freed the caliph to address a series of other onslaughts and insurrections. Starting with the year 144, however, Ṭabarī turned to this volume's principal preoccupation, to which half of the book is devoted. Judging by the attention given to it, he clearly perceived the Hasanid rebellions of Muhammad b. Abdallah (the Pure Soul) and of his brother Ibrahim to be the most substantial attack on Abbasid authority to arise in the first years of that dynasty. Ṭabarī's description of the prolonged search for Muhammad and Ibrahim and of the caliphal vengeance visited upon their father and family provides an extended prelude to the vivid battle and death scenes in Medina and Bakhamra. Yet, elaboration of these events does not eclipse mention of all other Abbasid activity. To bridge the account of Muhammad's defeat and that of Ibrahim's uprising, Ṭabarī inserted a narrative interlude depicting the site selection and preliminary construction of al-Manṣūr's most celebrated achievement, the City of Peace, Baghdad.

Evolution of Island Mammals Alexandra van der Geer, George Lyras, John de Vos, 2021-04-27
EVOLUTION OF ISLAND MAMMALS Evolution on islands differs in a number of important ways from evolution on mainland areas. Over millions of years of isolation, exceptional and sometimes bizarre mammals evolved on islands, such as pig-sized elephants and hippos, giant rats and gorilla-sized lemurs that would have been formidable to their mainland ancestors. Evolution of Island Mammals, Second Edition, provides an updated and expanded overview of the current knowledge on fossil island mammals worldwide, ranging from the Oligocene to the onset of the Holocene. The book addresses evolutionary processes and key aspects of insular mammal biology, exemplified by a variety of fossil species. Readers familiar with the first edition will find here a host of updated and enhanced material, including: An entirely new chapter on the island rule Updated and expanded theoretical chapters Updated and improved taxonomic information Extensive coverage of new discoveries Body masses or body size indices for most extinct island mammals New figures visualizing the richness of the fossil record This accessible and richly illustrated textbook is written for graduate level students and professional researchers in evolutionary biology, palaeontology, biogeography, zoology, and ecology.

Museum Theory Andrea Witcomb, Kylie Message, 2020-04-06 MUSEUM THEORY EDITED BY ANDREA WITCOMB AND KYLIE MESSAGE Museum Theory offers critical perspectives drawn from a broad range of disciplinary and intellectual traditions. This volume describes and challenges previous ways of understanding museums and their relationship to society. Essays written by scholars from museology and other disciplines address theoretical reflexivity in the museum, exploring the contextual, theoretical, and pragmatic ways museums work, are understood, and are experienced. Organized around three themes—Thinking about Museums, Disciplines and Politics, and Theory from Practice/Practicing Theory—the text includes discussion and analysis of different kinds of museums from various, primarily contemporary, national and local contexts. Essays consider subjects including the nature of museums as institutions and their role in the public sphere, cutting-edge museum practice and their connections with current global concerns, and the links between museum studies and disciplines such as cultural studies, anthropology, and history.
