*Social Impact of Wine Marketing* Mojca Ramšak, 2022-01-24 This book is inspired by the term “digiwine,” a neologism referring to the production and/or marketing of wine through the use of new technologies and robotics such as vineyard information systems, sensor units, weather stations, drones, robotic harvesters, social media videos, digital labels, and wine apps. The alcohol industry is using these technologies to develop digital strategies and online tools for more efficient sales of wine. This book analyzes the use of digital alcohol marketing, the reasons for it, the role of regulation, and its social impact. In particular, malignant forms of alcohol marketing to youth are precisely described through exact case descriptions from the global milieu. The author questions whether the loopholes in the legislation or inefficiency of self-regulation have negative consequences that can no longer be prevented by public health care programs. When and how did the alcohol industry become so deeply interwoven in our lives that we mindlessly advertise and parade in its shadow on social media and that we increasingly buy alcohol digitally for fun, in innovative packaging, and with strange ingredients combinations? Dr. Mojca Ramšak’s book peels back the layers of the alcohol industry’s most obvious yet overlooked marketing tactics. It also reveals the sluggishness of preventive and curative efforts, as well as legal or self-regulatory measures, at keeping up with the alcohol industry’s use of technology. - Nadja Furlan Štante, Principal Research Associate and Professor of Religious Studies, Science and Research Centre of Koper, Slovenia.

*Digital Wine* Tara Brabazon, Mick Winter, Bryn Gandy, 2014-05-12 This book explores the way in which QR codes (Quick Response codes) can help the wine industry facilitate distribution and more effectively market and sell their product. It examines the interventions, invention and opportunities brought about by QR codes for the wine industry. It also investigates how QR codes can help enable regional development as well as information and knowledge about winemakers and regions. The book begins with an introduction to QR codes. It explains how to use them as well as shows how QR codes combine analogue and online promotion and information dissemination. Next, the book explores strategies and examples from the creative industries, small nation theory and emerging wine industries. It then goes on to examine how to integrate QR codes with wine media, including marketing the bottle and using QR codes to build new wine regions. The book concludes with a case study of how Aotearoa/New Zealand wine producers deploy QR codes. QR codes can store and digitally present, a range of helpful data, including URL links, geo-coordinates and text and can be scanned by smart phones, making them a useful marketing and business tool. Presenting detail research on how QR codes can enhance the relationship between producers and consumers as well as aid regional development in the wine industry, this book will be of interest to academics focusing on Wine Studies, small and medium sized enterprises (SMEs) and practitioners and researchers from the creative industries sector. In addition, while this book focuses on the wine industry, the information that it presents about QR codes is relevant and applicable for an array of industries that require a tether between analogue and digital, physical and virtual, especially food and primary production.
